Preface

Since the G20 leaders met at their first summit in 2008 in Washington, the G20 Research Group at the University of Toronto has produced reports on their progress in implementing the priority commitments made at each summit. These reports monitor each G20 member's efforts to implement a carefully chosen selection of the many commitments produced at each summit. The reports are offered to the general public and to policy makers, academics, civil society, the media and interested citizens around the world in an effort to make the work of the G20 more transparent, accessible and effective, and to provide scientific data to enable the meaningful analysis of the causes of compliance, including those that leaders can change to improve compliance and the impact of this important informal international institution. Previous reports are available at the G20 Information Centre at <https://www.g20.utoronto.ca/compliance>.

After initiating this G20 compliance research in 2009, after the Washington Summit in November 2008, the G20 Research Group has worked with the Center for International Institutions Research of the Russian Presidential Academy of National Economy and Public Administration (RANEPA), and formerly with the International Organizations Research Institute at the National Research University Higher School of Economics, in Moscow. The initial report, covering only one commitment made at that summit, tested the compliance methodology developed by the G7 Research Group and adapted it to the G20.

Starting with the compliance reports for the 2023 New Delhi Summit, the G20 Research Group and RANEPA teams are issuing their compliance reports separately.

With its addition as a full member in 2023, the African Union is included in the compliance assessments as of the 2024 Rio de Janeiro Summit.

To make its assessments, the G20 Research Group relies on publicly available information, documentation and media reports. To ensure accuracy, comprehensiveness and integrity, we encourage comments from stakeholders. Indeed, scores can be recalibrated if new material becomes available. All feedback remains anonymous. Responsibility for the contents of this report lies exclusively with the authors and analysts of the G20 Research Group.

Introduction and Summary

The 2024 G20 Rio de Janeiro Final Compliance Report is prepared by the G20 Research Group based at the University of Toronto. The report analyzes compliance by G20 members with priority commitments selected from the total of 174 commitments made at the Rio Summit hosted by Brazil on 18–19 November 2024. This final report covers relevant actions taken by the G20 members between 20 November 2024 to 20 August 2025. It builds on the 2024 G20 Rio de Janeiro Summit Interim Compliance Report for the period of 20 November 2024 to 31 May 2025, thus offering a snapshot of compliance around the time of the handover from Brazil's 2024 presidency to South Africa's 2025 presidency.

Methodology and Scoring System

This report draws on the methodology developed by the G7 Research Group, which has been monitoring G7/8 compliance since 1996. The use of this methodology builds cross-institutional and cross-member consistency and also allows compatibility with compliance assessments of other institutions.

The methodology uses a scale from –1 to +1, where +1 indicates full compliance with the stated commitment, –1 indicates a failure to comply or action taken that is directly opposite to the stated instruments or goal of the commitment, and 0 indicates partial compliance or work in progress, such as initiatives that have been launched but are not yet near completion and whose full results can therefore not be assessed. Each member assessed receives a score of –1, 0 or +1 for each commitment. For convenience, the scores in the tables have been converted to percentages, where –1 equals 0 per cent and +1 equals 100 per cent.¹

A compliance score of –1 does not necessarily imply an unwillingness to comply on the part of G20 members. In some cases, policy actions can take multiple compliance cycles to implement and measure. As the G20 Research Group continues to monitor developments, progress made by members can be recorded in future compliance reports.

The Compliance Coding Manual that describes the methodology in detail is available on the G20 Information Centre website at <http://www.g20.utoronto.ca/analysis/index.html#method>.

Commitment Breakdown

The G20 made a total of 174 commitments at the Rio Summit.² These commitments, as identified by the G20 Research Group, are drawn from the G20 Rio Leaders' Declaration.

Selection of Commitments

For each compliance cycle (that is, the period between summits), the research team selects commitments that reflect the breadth of the G20 agenda and also reflect the priorities of the summit's host, while balancing the selection to allow for comparison with past and future summits, following the methodology developed by the G7 Research Group. The selection also replicates the breakdown of issue areas and the proportion of commitments in each one. Primary criteria for priority commitment selection are the comprehensiveness and relevance to the summit, the G20 and the world, as well as individual and collective pledges. Selected commitments must also meet secondary criteria of performance measurability and ability to comply to some degree within a year, as well as the tertiary criterion of significance as identified by scientific teams and relevant stakeholders in the host country.

For the 2024 G20 Rio Summit Final Compliance Report, 13 priority commitments were selected for assessment by the G20 Research Group (see Table 1).

¹ The formula to convert a score into a percentage is $P = 50 \times (S + 1)$, where P is the percentage and S is the score.

² A commitment is defined as a discrete, specific, publicly expressed, collectively agreed statement of intent; a promise by summit members that they will undertake future action to move toward, meet or adjust to an identified target. More details are contained in the Reference Manual for Summit Commitment and Compliance Coding).

2024 Rio de Janeiro Summit Final Compliance Scores

This assessment is based on relevant, publicly available information relating to actions taken from 20 November 2024 to 20 August 2025. The compliance scores by commitment are contained in Table 2. Country rankings are listed in Table 3 and commitment rankings are listed in Table 4. For the compliance period, for all 13 commitments selected for analysis, G20 members achieved average compliance of +0.40 (70%), up from the interim score of +0.28 (64%). Table 5 list compliance scores for all G20 summits by member in Table 5.

2024 Rio de Janeiro Summit Final Compliance by Member

For compliance with the 13 selected Rio Summit's priority commitments, 2024 host Brazil and the European Union had the highest compliance at +0.85 (92%), followed by Japan and the United Kingdom at +0.77 (88%). They were followed by Australia, Canada, Korea and Italy at +0.62 (81%) and China, France and Indonesia at +0.54 (77%). The United States had the lowest compliance at -0.46 (27%). The difference between the highest and lowest G20 member compliance is 1.3. The scores ranked by member are listed in Table 3.

2024 Rio de Janeiro Summit Final Compliance by Commitment

At +0.86 (93%), the commitment on energy transition supply chains had the highest score, followed by disaster risk reduction at +0.71 (88%) and the commitments on biodiversity, inclusive health systems and macroeconomic policy with +0.67 (83%). The commitment on humanitarian efforts in Gaza and Lebanon had the lowest compliance, with a score of -0.05 (48%). All the scores ranked by commitment are listed in Table 4.

Table 1: 2024 G20 Rio de Janeiro Summit Commitments Selected for Compliance Monitoring*

1	We support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. (2024-122)
2	We reaffirm our commitment in the New Delhi Leaders' Declaration to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. (2024-150)
3	[We]...support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. (2024-168)
4	In order to deliver on the promises of the United Nations and other relevant international organizations around the world, we pledge to work for a reinvigorated and strengthened multilateral system, rooted in the purposes and principles of the UN Charter and international law, with renewed institutions and a reformed governance that is more representative, effective, transparent and accountable, reflecting the social, economic and political realities of the 21st century. (2024-137)
5	We recognize the need for deep, rapid and sustained reductions in greenhouse gas emissions in line with 1.5 C pathways [and call on members to contribute to the global efforts against climate change, in a nationally determined manner, taking into account the Paris Agreement and their different national circumstances, pathways and approaches, as addressed in GST-1.]. (2024-102)
6	We commit to accelerating international disaster risk reduction cooperation in line with the Sendai Framework for Disaster Risk Reduction. (2024-78)
7	We reaffirm the commitment to the swift, full, and effective implementation of the Kunming-Montreal Global Biodiversity Framework (KM-GBF) adopted at the COP15 to the Convention on Biological Diversity (CBD). (2024-124)
8	We remain committed to building more resilient, equitable, sustainable, and inclusive health systems for the provision of integrated people-centered health services, including mental health. (2024-43)
9	Our fiscal policies will safeguard fiscal sustainability and rebuild buffers, remain growth-friendly, and catalyze public and private investments towards productivity enhancing reforms. (2024-10)
10	While expressing our deep concern about the catastrophic humanitarian situation in the Gaza Strip and the escalation in Lebanon, we emphasize the urgent need to expand the flow of humanitarian assistance and to reinforce the protection of civilians [and demand the lifting of all barriers to the provision of humanitarian assistance at scale.] (2024-16)
11	We also aim to address the challenges of fertilizer shortages, including through strengthening local production, trade, increase fertilizer efficiency, and utilize biofertilizers while addressing the need to improve soil health and minimize water pollution. (2024-25)
12	We commit to implementing the G20 Roadmap Towards and Beyond the Brisbane Goal. (2024-32)
13	In this sense, we emphasize the need for digital platforms' transparency and responsibility in line with relevant policies and applicable legal frameworks and will work with platforms and relevant stakeholders in this regard. (2024-59)

*For the full list of commitments, please contact the G20 Research Group at g20@utoronto.ca.

Background

Since the 2009 Pittsburgh Summit, the G20 has consistently referred to the necessity of adopting renewable energy technologies and increasing renewable energy supplies as part of G20 members’ climate and sustainable development goals. Since the 2021 Rome Summit, the G20 has specifically highlighted the importance of supply chain resilience in regard to critical minerals and materials, as well as semiconductors and other technologies. In recognition of its global leadership position, the G20 reiterated its commitment to developing supply chains for energy transitions as part of its climate goals and the United Nations’ Sustainable Development Goals at the 2024 Rio de Janeiro Summit.

At the 2009 Pittsburgh Summit, G20 leaders noted the importance of increasing renewable energy supplies and adopting renewable energy technology for promoting sustainable growth and strengthening energy security.³

At the 2010 Seoul Summit, G20 leaders committed to creating “environments conducive to the development and deployment of energy efficiency and clean energy technologies” through policies including “technical transfer and capacity building.”⁴

³ G20 Leaders Statement: Pittsburgh Summit, G20 Research Group (Toronto) 25 September 2009. Access Date: 7 March 2025. <https://www.g20.utoronto.ca/2009/2009communiqué0925.html>

⁴ G20 Seoul Summit Leaders' Declaration, G20 Research Group (Toronto) 12 November 2010. Access Date: 7 March 2025. <https://www.g20.utoronto.ca/2010/g20seoul-doc.pdf>

At the 2011 Cannes Summit, G20 leaders affirmed its support for “the development and deployment of clean energy and energy efficiency (C3E) technologies.”⁵

At the 2012 Los Cabos Summit, G20 leaders acknowledged “G20 countries’ efforts to foster investment” in clean energy technologies “through the sharing of national experiences regarding challenges for technology deployment.”⁶

At the 2013 St. Petersburg Summit, G20 leaders welcomed “efforts aimed at promoting sustainable development, energy efficiency, inclusive green growth and clean energy technologies and energy security.”⁷ The G20 stated it would continue to cooperate with “with international organisations sharing national experiences and case studies regarding sustainable development, clean energy and energy efficiency as well as development, deployment and broader application of related technologies and will take forward work, on a voluntary basis, on corresponding policy options and technologies.”

At the 2015 Antalya Summit, G20 leaders affirmed that “increasing investments in clean energy technologies and supporting related research and development activities will be important in tackling climate change and its effects.”⁸

At the 2016 Hangzhou Summit, G20 leaders launched the G20 Initiative on Supporting Industrialization in Africa and least developed countries, which encompassed policies including “promoting investment in sustainable and secure energy.”⁹

At the 2017 Hamburg Summit, G20 leaders stated its view of “energy security as one of the guiding principles for the transformation of [G20] energy systems.”¹⁰ The G20 welcomed “international cooperation on the development, deployment and commercialisation of sustainable and clean energy technologies and support financing by Multilateral Development Banks to promote universal access to affordable, reliable, sustainable and clean energy.”

At the 2018 Buenos Aires Summit, G20 leaders encouraged “energy transitions that combine growth with decreasing greenhouse gas emissions towards cleaner, more flexible and transparent systems and cooperation in energy efficiency.”¹¹ The G20 acknowledged “the role of all energy sources and technologies in the energy mix and different possible national paths to achieve cleaner energy systems under the term ‘transitions’.”

At the 2019 Osaka Summit, G20 leaders acknowledged “the importance of energy transitions that realize the “3E+S” (Energy Security, Economic Efficiency and Environment + Safety) in order to transform [G20] energy systems into affordable, reliable, sustainable and low GHG [greenhouse gas] emissions systems.”¹² The G20 further acknowledged “the importance of global energy security as one of the guiding principles for the

¹¹ G20 Buenos Aires Summit Leaders' Declaration, G20 Research Group (Toronto) 1 December 2018. Access Date: 7 March 2025. <https://www.g20.utoronto.ca/2018/2018-leaders-declaration.html>

¹² G20 Osaka Summit Leaders' Declaration, G20 Research Group (Toronto) 29 June 2019. Access Date: 7 March 2025. <https://www.g20.utoronto.ca/2019/2019-g20-osaka-leaders-declaration.html>

transformation of energy systems, including resilience, safety and development of infrastructure and uninterrupted flow of energy from various sources, suppliers and routes.”

At the 2020 Riyadh Summit, G20 leaders reaffirmed their commitment to ensuring a “stable and uninterrupted supply of energy to support economic growth.” Leaders recognized the importance of expediting universal access to affordable and reliable energy for all, emphasizing innovation across various fuel and technology options. The summit also underscored the need to “maintain uninterrupted energy flows and enhance energy security and market stability while promoting open, competitive and free international energy markets.”¹³

At the 2021 Rome Summit, G20 leaders made a commitment to “cooperate on deployment and dissemination of zero or low carbon emission and renewable technologies, including sustainable bioenergy, to enable a transition towards low-emission power systems.”¹⁴ In light of addressing energy security challenges, the G20 also recognized the importance of “reliable, responsible and sustainable supply chains of critical minerals and materials, as well as semiconductors and related technologies.”

At the 2022 Bali Summit, G20 leaders called for support to developing countries “in terms of providing access to affordable, reliable, sustainable and modern energy, capacity building, affordable latest technology within the public domain, mutually beneficial technology cooperation and financing mitigation actions in the energy sector.”¹⁵ G20 leaders also committed to accelerating energy transitions “by strengthening energy supply chain and energy security and diversifying energy mixes and systems.”

At the 2023 New Delhi Summit, G20 leaders affirmed support for “reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficated at source, semi-conductors and technologies.”¹⁶ G20 leaders underscored “the crucial role of technologically neutral, integrated and inclusive approaches to develop and deploy a variety of low-emitting energies, sustainable fuels and technologies.”

At the 2024 Rio de Janeiro Summit, G20 leaders reaffirmed their commitment “to accelerating clean, sustainable, just, affordable and inclusive energy transitions.”¹⁷ They emphasized the importance of reliable, diversified, sustainable and responsible supply chains for energy transitions, underscoring the need for increased international cooperation, investment and technological innovation to strengthen energy security and support the transition to low-carbon economies.

Commitment Features

At the 2024 Rio de Janeiro Summit, leaders committed to “support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficated at source, semiconductors and technologies.”¹⁸ This commitment builds on previous G20 discussions on energy security, climate action and economic resilience by emphasizing the strengthening and diversification of global supply chains to support clean energy transitions. Given the increasing demand for critical minerals, semiconductors and clean energy technologies, this commitment seeks to address vulnerabilities in global supply chains while ensuring their sustainability and ethical sourcing.

¹⁷ G20 Rio de Janeiro Summit Leaders' Declaration, G20 Research Group (Toronto) 18 November 2024. Access Date: 7 March 2025. <https://www.g20.utoronto.ca/2024/241118-declaration.html>

¹⁸ G20 Rio de Janeiro Summit Leaders' Declaration, G20 Research Group (Toronto) 18 November 2024. Access Date: 7 March 2025. <https://www.g20.utoronto.ca/2024/241118-declaration.html>

The commitment does not mandate specific policy instruments or implementation mechanisms, granting G20 members the flexibility to determine their own approaches to compliance. However, it requires demonstrable action in at least one of three key areas: supply chains for critical minerals and materials beneficiated at source, semiconductors and energy transition technologies. Full compliance requires meaningful action in all three areas, reflecting a comprehensive approach to securing supply chains essential for energy transitions.

Definitions and Concepts

The term “support” is understood as the action or act of providing aid, assistance, or backing up an initiative or entity through policies, financial investment, or institutional measures that actively contribute to achieving the commitment’s objectives.¹⁹

“Reliable” is understood to mean consistent in performance and able to function without failure.²⁰ In the context of supply chains, it implies ensuring consistent availability of critical materials, minimizing disruptions caused by geopolitical tensions, trade restrictions or resource scarcity.²¹

“Diversified” refers to a supply chain that sources critical minerals, semiconductors and technologies from multiple regions or suppliers to mitigate risks associated with reliance on a single source.²²

“Sustainable” refers to a supply chain that is environmentally and socially responsible, minimizing negative ecological impacts, carbon emissions and waste.²³

“Responsible” supply chains adhere to ethical, transparent and accountable business practices, including fair labour practices, human rights standards and transparency, preventing exploitation and environmental degradation.²⁴

“Critical minerals and materials” refer to naturally occurring elements and compounds essential for energy technologies, including copper, chromium, zinc, aluminium, major battery metals (lithium, nickel, cobalt, manganese, graphite), cadmium, molybdenum, rare earth elements and others.²⁵

“Beneficiated at source” means processing and refining raw materials within the country of extraction before exporting them.²⁶

“Semiconductors and technologies” refer to microelectronic components [e.g. GaAs, indium arsenide (InAs), gallium nitride (GaN) and indium phosphide] and advanced energy-related tools, systems and innovations

essential for modern energy infrastructure, including smart grids, battery storage and renewable energy deployment.²⁷

General Interpretive Guidelines

Full compliance, or a score of +1, will be given to a G20 member that takes strong action in both areas of supply chains specified by 1) supporting reliable, diversified, sustainable and responsible supply chains for energy transitions, taken together as a combined welfare objective; and 2) strengthening supply chains for a) critical minerals and materials beneficiated at source, b) semiconductors and c) energy transition technologies. To fulfill the requirements of full compliance, the G20 member must take strong action across Part 1 of the commitment and at least two of the three components of Part 2.

Strong actions include significant policy action, financial investment or institutional support that advances the commitment, including the establishment of new government agencies or institutions dedicated to supply chain security, enforcing trade agreements that enhance resilience or participating in international frameworks that regulate ethical and sustainable resource extraction. Examples of strong actions that contribute to beneficiation at source include building local processing and refining facilities for lithium, cobalt and rare earth elements, establishing technology-sharing partnerships between resource-rich and industrialized countries, implementing domestic policies that require a percentage of minerals to be processed before export or investing in domestic refining and processing facilities. Strong action to strengthen semiconductor supply chains includes providing subsidies or financial incentives for domestic semiconductor manufacturing, establishing trade partnerships with leading semiconductor-producing nations to secure supply chains or investing in research and development of next-generation semiconductors. To align with technological advancements that facilitate energy transitions, G20 members can implement policies that encourage private sector investment in clean energy technology or facilitate international cooperation on technology transfers and joint research initiatives.

Partial compliance, or a score of 0, will be assigned to a G20 member that takes strong action in at least 50 per cent of the commitment: 1) supporting reliable, diversified, sustainable and responsible supply chains for energy transitions, taken together as a combined welfare objective; and 2) strengthening supply chains for a) critical minerals and materials beneficiated at source, b) semiconductors and c) energy transition technologies. To achieve partial compliance, the G20 member must take strong action in two of the four aforementioned areas (i.e. all of Part 1 and one of the sub-areas of Part 2 or two of the sub-areas of Part 2) or take weak action all four areas. Examples of weak action includes announcing plans or intentions to improve supply chain security but without concrete policy implementation, verbal reiterations of support, diplomatic action without tangible support behind it, such as funds, conference attendance or participation and the like.

Non-compliance, or a score of -1, will be assigned if the G20 member takes insufficient action that does not meet the criteria for a 0, such as taking action in only one area, or taking actions that are directly and explicitly antithetical to the commitment, such as blocking or withdrawing from trade agreements or partnerships that facilitate supply chain resilience or delaying or rolling back policies that support clean technology or critical mineral development.

²⁷ The Role of Critical World Energy Outlook Special Report Minerals in Clean Energy Transitions, International Energy Agency (Paris) 2022. Access Date: 7 March 2025. <https://iea.blob.core.windows.net/assets/ffd2a83b-8c30-4e9d-980a-52b6d9a86fdc/TheRoleofCriticalMineralsinCleanEnergyTransitions.pdf>

Scoring Guidelines

-1	The G20 member has taken insufficient action to 1) support the combined welfare target of reliable, diversified, sustainable and responsible supply chains for energy transitions and 2) to strengthen supply chains for a) critical minerals and materials beneficiated at source, b) semiconductors and c) energy transition technologies. This includes action that does not meet the criteria for partial compliance, such as taking action in only one of the four areas or taking actions that are directly and explicitly antithetical to the commitment.
0	The G20 member has taken strong action across 50 per cent of the commitment, or two of the four components or has taken weak action across all four areas: 1) supporting reliable, diversified, sustainable and responsible supply chains for energy transitions, taken together as a combined welfare objective and 2) strengthening supply chains for a) critical minerals and materials beneficiated at source, b) semiconductors and c) energy transition technologies.
+1	The G20 member has taken strong action towards 1) the combined welfare target of reliable, diversified, sustainable and responsible supply chains for energy transitions and 2) to strengthen supply chains in at least two of the three areas: a) critical minerals and materials beneficiated at source, b) semiconductors and c) energy transition technologies.

Compliance Director: Erfan Ehsan
Lead Analyst: Ana Grace Rans Kolakovic

Argentina: 0

Argentina has partially complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 2 December 2024, Undersecretary of the Environment Ana Lamas met with Finnish Ambassador Nicola Lindertz to promote the establishment of a circular economy.²⁸ Undersecretary Lamas called for continued innovation regarding bioenergy and waste recovery technologies.

On 10 December 2024, Secretary of Mining Luis Lucero presented mining investment opportunities in Argentina as part of Raw Materials Week 2024 in Brussels.²⁹ The presentation included discussion on the extraction, processing and refining of critical raw materials in Argentina.

On 27 December 2024, President Milei approved the extension of Argentina's 2023 Budget (Law 27701) into 2025.³⁰ The budget includes tax exemptions for Energía Argentina Sociedad Anónima, support for green hydrogen projects and fiscal support for the integration of renewable energy into the electricity grid.³¹

On 8 January 2025, Argentina approved a solar park development project's application for membership in the Incentive Regime for Large Investments (RIGI).³² With its membership in RIGI, the project will receive special

tax, customs and exchange rate incentives. The project will receive an investment of USD211 million and will have a 305 megawatts (MW) capacity once complete.

On 29 January 2025, the Secretariat of Energy eliminated the National Registry of Charging Infrastructure for Electric and Hybrid Electric Vehicles, aiming to promote the expansion of charging stations by reducing costs and regulatory obstacles.³³

On 30 January 2025, Argentina and India held the First Meeting of the Joint Working Group on Mineral Resources in Buenos Aires.³⁴ The delegations agreed to establish sub-working groups on exploration cooperation and on investment and to hold a second meeting in 2026.

On 17 February 2025, Argentina launched a large-scale initiative to modernize the electrical grid in the Buenos Aires Metropolitan Area.³⁵ This initiative includes the installation of 500 MW of energy storage capacity at strategic grid nodes, with an estimated investment of USD500 million over a period of 12 to 18 months.

On 5 March 2025, Secretary Lucero and Minister of Natural Resources of Canada Jonathan Wilkinson signed an agreement to collaborate on critical minerals and mining sustainability.³⁶ This partnership aims to facilitate sustainable investment in the mining sector and support global supply chain integration.

On 14 March 2025, Argentina implemented reforms simplifying the process of registering mining activities.³⁷ The measures are designed to benefit mining companies in the production and exploration stages.

On 16 May 2025, Argentina's National Atomic Energy Commission (CNEA), Candu Energy Inc. and CONUAR S.A. signed a Memorandum of Understanding to collaborate in supplying heavy water and exchanging nuclear technology.³⁸ The memorandum lays the foundation for the supply of heavy water from Argentina to Canada through the Heavy Water Industrial Plant in the province of Neuquén.

On 19 May 2025, the Secretariat for Energy and Mining Coordination, the National Electricity Administration of Paraguay and the Yacyretá Binational Entity signed an agreement whereby Argentina will be able to access up to 85 per cent of the energy produced in a binational hydroelectric plant.³⁹ This capacity will support reduced costs and support an equitable supply of energy.

On 29 May 2025, the Ministry of Economy announced a national plan to expand Argentina's electricity transportation.⁴⁰ The plan includes an additional 5,610 kilometres of electricity transmission lines to ensure a reliable power supply, mitigate outages and address underinvestment. This plan will be carried out by private companies funded through consumer fees.

On 26 June 2025, CNEA President Germán Guido Lavalle and Rolando Instituto Peruano de Energía Nuclear President Páucar Jáuregui signed an agreement to exchange technical expertise and collaborate on nuclear energy projects.⁴¹

On 27 June 2025, Minister of Foreign Affairs Gerardo Werthein met with United States Secretary of Energy Chris Wright and senior officials to discuss bilateral cooperation in energy and mining.⁴² The meeting highlighted Argentina's regulatory measures to attract investment, including the development of Vaca Muerta for unconventional hydrocarbons, lithium and other critical minerals for energy transition.

On 28 June 2025, Secretary Lucero and French Minister Delegate for Foreign Trade and French Nationals Abroad Laurent Saint-Martin signed a Memorandum of Understanding aimed at developing critical minerals including lithium.⁴³ The bilateral agreement aims to promote financing and investment for mining projects in Argentina.

On 30 June 2025, Secretary Lucero and French Minister of Foreign Trade Laurent Saint Martin signed a declaration of intent on critical minerals to advance joint mining and industrial projects.⁴⁴ The declaration aims to promote sustainable mining activities and build resilient, diversified supply chains to support the energy transition.

On 3 July 2025, President Milei signed the Mercado Común del Sur (MERCOSUR) Presidential Declaration on Energy Integration and Security in MERCOSUR during the 66th MERCOSUR Summit in Buenos Aires.⁴⁵ The declaration reaffirmed Argentina's commitment to advancing regional energy integration and emphasized the importance of a fair and inclusive energy transition, regional interconnections and regulatory harmonization to strengthen energy security and support industrial development.

On 7 August 2025, Argentina issued Decree 563/2025 eliminating export duties on 231 mining-related products.⁴⁶ The reduction in duties aims to incentivize investment and increase production in the mining sector.

On 1 September 2025, MERCOSUL approved the 2025-2026 Work Plan for mining and geology.⁴⁷ The plan includes research of mineral capabilities of Brazil and MERCOSUL members, cooperation in research and extraction of mineral resources, shaping integrated regulatory frameworks and public policy proposals for mining and critical minerals supply chain.

On 23 September 2025, Argentine Geological and Mining Service SEGEMAR participated in the conference “Argentine Mining: Challenges and Opportunities,” which convened government and industry representatives to discuss the sector’s outlook.⁴⁸ SEGEMAR President Julio Bruna Novillo presented the country’s geological potential, emphasizing critical minerals such as lithium, copper, rare earth minerals and silver.

Argentina has partially complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated, at source, semiconductors and technologies. Argentina has taken strong action towards the combined welfare target of reliable, diversified, sustainable and responsibly supply chains through initiatives to modernize the electrical grid in the Buenos Aires Metropolitan Area, expand electricity transmission lines across the country and access more affordable hydroelectric energy. It has also taken strong action to strengthen supply chains for energy transition technologies through its investment in a solar park development project, enhanced nuclear technology cooperation, revival of heavy water production, streamlined mining investment regulations and the removal of export duties on many mining products. However, it has not taken strong action across all four commitment components.

Thus, Argentina has received a score of 0.

Analyst: Maham Khokhar

Australia: +1

Australia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 28 November 2024, Parliament passed the Future Made in Australia legislation which aims to support the net zero transition.⁴⁹ The legislation will focus on renewable energy investments and economic resilience.

On 6 December 2024, Minister for Resources and Northern Australia Madeleine King announced a total of AUD21 million in funding for five projects aimed at “diversify[ing] global supply chains for critical minerals and rare earth elements.”⁵⁰ This contributes to the commitment’s combined welfare target and supports strengthening supply chains for critical minerals and materials beneficiated at source.

On 6 December 2024, Prime Minister Anthony Albanese and Minister for Trade and Tourism Senator Don Farrell announced an additional AUD475 million in financing for Western Australia’s Eneabba Rare Earths

⁴⁹ Future Made in Australia legislation passes the Senate, Department of Industry, Science and Resources (Canberra) 28 November 2024. Access Date: 23 June 2025. <https://www.minister.industry.gov.au/ministers/king/media-releases/future-made-australia-legislation-passes-senate>

⁵⁰ New grants to build Australia’s critical minerals sector, Department of Industry, Science and Resources (Canberra) 6 December 2024. Access Date: 23 June 2025. <https://www.minister.industry.gov.au/ministers/king/media-releases/new-grants-build-australias-critical-minerals-sector>

Refinery project.⁵¹ The project will support global supply chain resilience for rare earth elements and support sustainable critical minerals that contribute towards the net zero transition.

On 6 December 2024, the Clean Energy Finance Corporation (CEFC) allocated AUD50 million to Bank Australia as part of the Household Energy Upgrades Fund program.⁵² This funding will enable up to AUD100 million in green loans, including a lean Energy Home Loan, to strengthen supply chains for the renewable energy transition. This will also contribute to more reliable and sustainable supply chains.

On 6 December 2024, the Department of Climate Change, Energy, the Environment and Water announced a First Nations Clean Energy Strategy that focuses on sustainable and reliable clean energy for First Nations communities.⁵³ Over the next five years, this strategy will include investments in clean energy supply chains, focus on improving energy performance, establish partnerships with First Nations communities for energy and support First Nations individuals in having a greater role in the clean energy sector.

On 9 December 2024, the CEFC invested USD75 million in “global alternative investment manager Resource Capital Funds” to support Australia’s emerging critical mineral supply chain.⁵⁴ This investment will bring capital to Australian mining projects and help decarbonize Australia’s critical mineral supply chain.

On 20 December 2024, Australia and Korea signed a new Green Economy Partnership Arrangement on Climate and Energy.⁵⁵ The partnership agreement includes cooperation on renewable hydrogen, critical minerals and green metals projects. This supports both members’ commitments to diversified energy transition technologies and supply chains.

On 15 January 2025, the National Reconstruction Fund Corporation announced AUD200 million in funding for Arafura Rare Earths.⁵⁶ This investment will help advance the critical minerals supply chain by enabling the development of a new mine and processing facility that is expected to produce 4,440 tonnes of neodymium and praseodymium.

On 16 January 2025, the CEFC announced an AUD100 million investment for an innovating financing mechanism called the built-to-rent strategy.⁵⁷ This strategy focuses on building energy efficient and electric homes which can be powered with renewable energy. This action contributes to an equitable energy transition.

On 20 January 2025, Australia unveiled plans for a new Green Aluminium Production Credit facility, investing AUD2 billion “to support aluminum smelters in transitioning to renewable electricity sources before 2036.”⁵⁸ This plan aims to support decarbonization in Australia’s aluminum industry.

On 23 January 2025, Australia allocated an additional AUD2 billion to the CEFC.⁵⁹ These funds will support initiatives for Australia’s green transition and renewable energy projects.

On 31 January 2025, the CEFC announced AUD300 million in co-financing with the National Australia Bank to reduce costs associated with the net zero transition.⁶⁰ Of note, the Bank’s Green Finance for Vehicles and Equipment program will receive AUD200 million from the CEFC to support investment discounts for the manufacturing of “key components used in renewable energy generation” and net zero vehicles and for recycling facilities.

On 4 February 2025, Minister King and Western Australia Mines and Petroleum Minister David Michael announced a AUD3 million investment for a feasibility study of a Critical Minerals Advanced Processing CMAP facility in Western Australia.⁶¹ This facility would process critical minerals and help Australia meet its commitment towards reliable, sustainable and responsible critical minerals supply chains.

On 7 February 2025, the Department of Climate Change, Energy, the Environment and Water announced AUD2.4 million in funding to enhance the electric vehicle charging infrastructure in Australia.⁶² This funding will be provided through the Australian Renewable Energy Agency and support the Driving the Nation program which aims to encourage electric vehicle adoption.

On 10 February 2025, Parliament passed legislation for two tax incentives aimed at bolstering Australia’s critical minerals and hydrogen production sectors.⁶³ The Critical Minerals Production Tax Incentive will target critical minerals including lithium, cobalt and rare earth minerals.

On 14 February 2025, the Department of Climate Change, Energy, the Environment and Water announced AUD1.85 million for Allegro Energy.⁶⁴ This will support the creation of reliable battery storage technology.

On 14 February 2025, Parliament allocated an additional AUD2 billion to the CEFC.⁶⁵ This initiative will support investment in renewable energy generation and energy storage projects.

On 5 March 2025, the Department of Climate Change, Energy, the Environment and Water announced an AUD20 million investment by the CEFC for green loans for healthcare providers.⁶⁶ This initiative aims to encourage healthcare providers to use rooftop solar, electric vehicles, energy-efficient fixtures and other ecologically friendly technologies.

On 14 March 2025, Prime Minister Albanese, Minister for Industry and Science Ed Husic and Minister for Climate and Energy Chris Bowen announced AUD750 million of new funding through the Future Made in Australia Innovation Fund to develop low-emissions technologies in the metals sector.⁶⁷ Administered by ARENA, the funding will support projects to enable commercial-scale production of green metals from Australian ores using renewable energy.

On 17 March 2025, the CEFC announced a partnership with Lannock Strata Finance “to develop a green strata loan product for residential strata properties via the Household Energy Upgrades Fund.”⁶⁸ The partnership will improve the affordability of installing solar panels on residential buildings, enabling the energy transition by encouraging clean energy adoption.

On 28 March 2025, Minister Bowen and Assistant Treasurer and Minister for Financial Services Stephen Jones announced AUD24.5 million in funding for Boral, the largest cement supplier in New South Wales.⁶⁹ This action will support the development of low-emissions raw materials, reducing annual emissions by 100,000 tonnes.

On 24 April 2025, Prime Minister Albanese committed to creating a Critical Minerals Strategic Reserve, with AUD1.2 billion allocated in the 2025-26 federal budget.⁷⁰ A taskforce in the Department of the Prime Minister and Cabinet will advise on the reserve’s design. This fiscal commitment will help secure and strategically manage the country’s critical mineral resources, which are essential for energy transition technologies like batteries and clean energy manufacturing.

On 13 May 2025, the CEFC announced an AUD3 million investment for EcoJoule Energy, a clean energy technology company.⁷¹ This investment will support actions to strengthen the power grid and ensure energy networks are equipped to function with distributed energy resources. This will enhance reliability and capacity within the renewable energy supply chain.

On 21 May 2025, ARENA awarded AUD46 million to solar manufacturer 5B through the Solar Sunshot Program to expand domestic manufacturing of its automated solar deployment system.⁷² The investment will increase manufacturing capacity to deliver at least 200 megawatts of Maverick units over the next three years, bolstering Australia’s solar photovoltaic supply chain.

On 17 June 2025, the Northern Australia Infrastructure Facility approved an AUD50 million concessional loan to support the Butcherbird manganese project in the Pilbara region.⁷³ This financing will increase the production of manganese concentrate by more than one million tonnes annually, strengthening the country's domestic critical minerals supply chain.

On 17 June 2025, Minister Bowen, Minister King and Assistant Minister for Climate Change and Energy Josh Wilson announced an AUD19.8 million grant to develop low emissions iron production in Australia.⁷⁴ The funding will support the NeoSmelt project, which seeks to technology for a low emissions electric smelting furnace.

On 17 June 2025, the CEFC announced an AUD15 million investment into the new Climate Tech Partners Fund I.⁷⁵ The fund will focus on early-stage companies possessing technologies with the potential to reduce emissions on a large scale.

On 17 June 2025, the G7 launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit, welcoming Australia's endorsement of the plan.⁷⁶ The Action Plan supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by India and Korea.

On 18 June 2025, Minister for the Environment and Water Murray Watt announced federal approval of the 250 MW Weasel Solar Farm near Bothwell, Tasmania.⁷⁷ The project will include solar panels, battery storage and generate enough electricity to power 30,000 homes.

On 1 July 2025, Minister for Foreign Affairs Penny Wong attended the Japan-Australia-India-US (Quad) Foreign Ministers' Meeting in Washington D.C. along with United States Secretary of State Marco Rubio, Indian Minister of External Affairs Subrahmanyam Jaishankar and Japanese Minister for Foreign Affairs Iwama Takeshi.⁷⁸ The Quad Foreign Ministers issued a Joint Statement and Fact Sheet announcing the launch of the Quad Critical Minerals Initiative which aims to secure and diversify reliable supply chains for critical minerals, including through electronic waste recovery and re-processing, while coordinating with private sector partners to facilitate investment.⁷⁹

On 3 July 2025, Australia granted Major Project Status to two new large-scale developments: the Northern Silica Project and the Bonaparte Carbon Capture and Storage Initiative.⁸⁰ Additionally, it renewed the status for

⁸⁰ New clean energy and resource projects awarded major project status, Department of Industry, Science and Resources (Canberra) 3 July 2025. Access Date: 6 July 2025. <https://www.industry.gov.au/news/new-clean-energy-and-resource-projects-awarded-major-project-status>

a solar energy project and a cobalt mine and refinery project. These initiatives are part of Australia's goal to support green technology innovation, sustainable industrial development and electric vehicle supply chains.

On 4 July 2025, the CEFC announced an AUD6 million investment to accelerate the adoption of battery electric trucks in Australia.⁸¹ The investment will help Australia's largest supermarket deploy a fleet of up to 60 battery electric trucks for last-mile deliveries.

On 11 July 2025, Minister Wong, Minister Bowen and Minister for Pacific Island Affairs Pat Conroy announced a letter of intent with Palau to invest an additional AUD16.4 million to upgrade Palau's electricity network infrastructure.⁸² The funding, provided through the Australian Infrastructure Financing Facility for the Pacific, will enhance grid reliability and expand renewable energy integration, building on support for Palau's first large-scale solar power plant and battery storage system.

On 5 August 2025, Minister for Climate Change and Energy Chris Bowen and South Australian Minister for Energy and Mining Tom Koutsantonis shared that over fifty community batteries will be provided for solar energy battery storage, with 16 batteries prioritized for social housing.⁸³

On 6 August 2025, ARENA announced AUD45.5 million in funding for Tindo, Australia's only solar module manufacturer.⁸⁴ The funding is intended to support the Australian solar manufacturing industry by increasing Tindo's production of solar modules and expanding its product range.

On 7 August 2025, the National Reconstruction Fund Corporation announced an AUD50 million investment in Lione Resources.⁸⁵ The investment will support the Kathleen Valley Lithium Operation, one of Australia's largest lithium projects.

On 11 August 2025, Minister Bowen, Assistant Minister Wilson, New South Wales (NSW) Minister for Climate Change and Energy Penny Sharpe and NSW Minister for Housing Rose Jackson announced AUD18 million in joint federal and state funding for housing upgrades to promote energy efficiency.⁸⁶ In partnership with 22 community partners, the funds will be used for measures such as rooftop solar panels, shared solar systems and energy-efficient hot water systems.

On 14 August 2025, ARENA announced AUD3.6 million in funding for a "renewable energy microgrid" for a rural First Nations community in Western Australia, to support the energy transition.⁸⁷

⁸¹ CEFC commits \$6 million to accelerate Battery Electric Truck adoption in Australia, Clean Energy Finance Corporation (Sydney) 4 July 2025. Access Date: 23 July 2025. <https://www.cefc.com.au/media/media-release/cefc-commits-6-million-to-accelerate-battery-electric-truck-adoption-in-australia/>

⁸⁷ ARENA funding sparks clean energy future for Blackstone, Australian Renewable Energy Agency (Canberra) 14 August 2025. Access Date: 26 August 2025. <https://arena.gov.au/news/arena-funding-sparks-clean-energy-future-for-blackstone/>

On 15 August 2025, ARENA announced AUD14.4 million for two microgrid renewable energy projects, including battery storage.⁸⁸ The projects emphasize reliable and sustainable energy for First Nation groups in Northern and Southern Australia.

On 19 August 2025, ARENA announced a new AUD500 million “Battery Breakthrough Initiative” to build a local battery manufacturing supply chain.⁸⁹ This includes funding for battery pack assembly, battery cell manufacturing and production of battery components such as cathode materials and anode materials.

On 4 September 2025, Minister Bowen announced AUD150 million will be invested in Australia’s solar manufacturing supply chain.⁹⁰ This funding is part of Australia’s AUD1 billion Solar Sunshot program.

On 23 September 2025, the National Reconstruction Fund Corporation announced an AUD35 million investment in Morse Micro’s semiconductor manufacturing.⁹¹

On 9 October 2025, Minister Bowen announced AUD600 million for renewable energy projects.⁹² The projects include 12 battery storage initiatives with a “combined storage capacity of 3.5 GW / 11.4 GWh.”

Australia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Australia has taken strong action to support reliable, diversified, sustainable and responsible supply chains for energy transitions through investments by the CEFC, funding for electric vehicle charging infrastructure, tax credits, the Future Made in Australia legislation, the First Nations Clean Energy Strategy and a new renewable energy microgrid for a First Nations community. It has also strengthened supply chains for critical minerals and materials beneficiated at source and energy transition technologies through investments to decarbonize Australia’s critical mineral supply chain, support Western Australia’s Eneabba Rare Earths Refinery project, enhance global critical minerals and rare elements supply chains, support the Kathleen Valley Lithium Operation and encourage renewable energy adoption for consumers.

Thus, Australia receives a score of +1.

Analysts: Eszter Réti, Ana Grace Rans Kolakovic and Erfan Ehsan

Brazil: +1

Brazil has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 29 November 2024, the Ministry of Mines and Energy announced two new resolutions effective 2 December 2024 to maintain water levels in hydroelectric plant reservoirs.⁹³ This action aims to ensure sustainable water use while supporting energy security.

On 2 December 2024, Minister of Mines and Energy Alexandre Silveira met with the board of Rosatom, Russia's largest nuclear company, to discuss a partnership between Brazil and Rosatom for nuclear energy.⁹⁴ The pair are expected to finalize an agreement by the end of 2025 that adheres to responsible, safe and sustainable critical mineral use while expanding Brazil's economic and technological growth.

On 3 December 2024, the National Energy Policy Council (CNPE) and Infra SA signed a Technical Cooperation Agreement to "expand the traceability of raw materials" through the Brazilian National Biofuel Policy and to strengthen Decarbonization Credits.⁹⁵ This aims to advance Brazil's goal of decarbonizing the energy sector.

On 5 December 2024, the Ministry of Science, Technology and Innovation announced BRL220 million for Ceitec.⁹⁶ This funding will go towards the large-scale production of silicon carbide semiconductors which are essential for the energy transition.

On 10 December 2024, the CNPE approved the establishment of a permanent technical committee to regulate the Fuel for the Future legislation announced in October 2024.⁹⁷ The law aims to advance green diesel, sustainable aviation fuel and biomethane, carbon storage and capture and other mechanisms to advance sustainable low-carbon energy.

On 10 December 2024, the CNPE approved a resolution that establishes minimum targets regarding the use of residual oils and fats during the production of biomethane, sustainable aviation fuel and green diesel.⁹⁸ The resolution aims to increase the availability of raw materials used to produce biomethane, while supporting sustainable energy.

On 10 December 2024, the CNPE approved a resolution that sets mandatory targets for the reduction of greenhouse gases in Brazil between 2025 and 2034.⁹⁹ This resolution is set through the Brazilian National

Biofuel Policy and focuses on decarbonizing the transport sector to ensure sustainable energy security, expand Brazil's renewable energy supply chains and ensure sustainable development. The resolution aims to reduce greenhouse gas emissions by 11.37 per cent by 2034 based on 2018 levels.

On 20 December 2024, the Brazilian Development Bank (BNDES) approved BRL94.8 million in funding to MobiBrasil to support the acquisition of 87 electric buses for São Paulo.¹⁰⁰ Of this BRL49.8 million will be provided through the Severance Indemnity Fund and BRL45 million through the Climate Fund, advancing energy transition technologies and supply chains.

On 7 January 2025, Minister Silveira announced a partnership between BNDES and the Brazilian Studies and Projects Financing Agency (Finep) to promote safe and sustainable mining, especially for critical minerals like lithium, rare earths, nickel, graphite and silicon which are essential to the energy transition.¹⁰¹ Brazil will invest BRL5 million for this initiative.

On 8 January 2025, the BNDES and government funding agency Finep allocated BRL5 billion in financing for strategic minerals projects.¹⁰² The initiative aims to support strategic mineral production as well as investments in batteries, photovoltaic cells and magnets.

On 10 January 2025, Minister Silveira and the United Arab Emirates' Ministry of Investment signed a Memorandum of Understanding to promote critical minerals which are needed for the clean energy transition.¹⁰³ This partnership will include an investment of up to BRL15 million for "mineral research, processing, commercialization, technology transfer and workforce training" to advance sustainable development.

On 10 January 2025, President Luis Inácio Lula da Silva signed a law authorizing offshore wind farm development.¹⁰⁴ This law supports Brazil's energy transition and includes provisions to consult with local communities.

On 31 January 2025, the Ministry of Mines and Energy and the Brazilian Nuclear and Binational Energy Holding Company allocated BRL100 million for government buildings to transition to using renewable energy via renovations and installations of "local renewable energy generation technologies."¹⁰⁵ This supports reliable

and responsible energy transition technologies with financial transparency measures and partnerships with local energy producers.

On 2 February 2025, the Ministry of Mines and Energy and the Uruguayan Ministry of Industry, Energy and Mining signed a Memorandum of Understanding to promote electrical energy transfer from the Presidente Médici Power Substation in Uruguay to Brazil's Candiota II SE in Rio Grande do Sul.¹⁰⁶ This partnership aims to promote energy integration while supporting renewable energy.

On 18 February 2025, the CNPE approved Brazil's participation as a member in the International Energy Agency and International Renewable Energy Agency and as a participant country in the Charter of Cooperation between Oil Producing Countries.¹⁰⁷ This will help Brazil advance its leadership and involvement in the energy transition.

On 18 February 2025, the CNPE approved the creation of a Working Group focused on diversifying raw materials and supporting small biofuel producers including family farms.¹⁰⁸ This action aims to advance clean energy across the supply chain including in the transportation sector.

On 19 February 2025, Minister of Science, Technology and Innovation Luciana Santos, Minister of Management and Innovation in Public Services Esther Dweck, and Portugal's Minister of Youth and Modernization Margarida Lopes signed a memorandum of understanding to cooperate on and exchange best practice for activities related to semiconductors, artificial intelligence and the digital platform economy among others.¹⁰⁹

On 13 March 2025, the BNDES approved a BRL241.8 million loan to support Stellantis Automóveis Brasil Ltd. in developing technologies for the production of hybrid and electric vehicles at its Betim plant.¹¹⁰ This initiative will help the company develop engine technologies for the Brazilian market.

On 26 March 2025, BNDES approved BRL690 million for the construction of two wind farms.¹¹¹ The facilities will be part of the Serra do Tigre Wind Complex which has a total capacity of 756 megawatts.

On 28 March 2025, President Lula met with the President of Vietnam to announce and sign the "Action Plan for 2025-2030" which includes increased cooperation for renewable energy development and

implementation.¹¹² This supports the diversification of renewable energy technologies as well as research partnerships in semiconductors, artificial intelligence and energy.

On 9 April, Minister Santos announced public investments for the state-owned company CEITEC.¹¹³ CEITEC, in collaboration with the Ministry of Science, Technology and Innovation, will produce silicon carbide semiconductors. Furthermore, the investments will create a program that will incentivize Brazilian scientists abroad to return and work on silicon carbide semiconductors in Brazil.

On 10 April 2025, Brazil's Annual Budget Law was published in the Official Gazette.¹¹⁴ The Investment Budget, attached as Annex XII, includes an investment of BRL4 trillion in electricity and BRL681 million in mining.¹¹⁵

On 15 April 2025, Minister Silveira inaugurated an innovative biofuel production unit which will produce green fuel to replace diesel. This facility will receive a BRL80 million investment for research, development and construction. In addition, Minister Silveira also announced construction for a new industrial unit which will produce up to 210 million liters of wheat ethanol per year as well as 153,200 tonnes of animal feed.¹¹⁶ This facility will receive BRL1.1 billion in funding.

On 8 May 2025, Minister of the Environment and Climate Change Marina Silva announced Brazil's intention to triple its renewable energy infrastructure and double energy efficiency.¹¹⁷ This decision was in the context of the "United Arab Emirates Consensus" established at the 28th Conference of the Parties to the United Nations Framework Convention on Climate Change.

On 9 May 2025, President Lula da Silva met with Russian President Vladimir Putin in Moscow.¹¹⁸ The pair discussed expanding cooperation in nuclear energy and in the critical minerals sector.¹¹⁹

On 11 May 2025, Minister Silveira, China's Windey Energy Technology Group and SENAI CIMATEC signed a Memorandum of Understanding to develop energy storage, advance wind energy and green hydrogen in

Brazil, promote renewable energy in rural agricultural areas and promote renewable energy within the electrical grid.¹²⁰ The two-year partnership ultimately aims to advance renewable energy and low-carbon technologies.

On 12 May 2025, BNDES approved BRL156 million in financing to GreenYellow for the construction of 16 photovoltaic power plants across 13 cities in nine states.¹²¹ The plants will have an installed capacity of megawatts.

On 13 May 2025, Finep President Celso Pansera signed a Technical Cooperation Agreement with the Brazilian Mining Institute to provide technical and financial support for research and development in the mining sector.¹²² The initiative seeks to encourage private sector investment in innovative mining projects.

On 13 May 2025, Minister Silveira and China's National Energy Administration signed an agreement to enable Brazil to access China's ethanol market.¹²³ This partnership is focused on bioethanol and low-carbon ethanol and involves the creation of a Bilateral Working Group on Ethanol and Sustainable Fuels to develop innovative uses for ethanol. This includes its potential to replace gasoline for transportation vehicles.

On 13 May 2025, Minister Silveira and China's National Development and Reform Commission signed an agreement to advance sustainable development in mining.¹²⁴ Aiming to support the energy transition, this partnership includes periodic meetings, workforce training and the future creation of the China-Brazil Mining Investment Alliance.

On 16 May 2025, the Ministry of Mines and Energy announced that a new transmission line with a 500-kilovolt potential has been integrated into the National Interconnected System.¹²⁵ This action aims to advance energy security, connectivity between Northeast and Southeast Brazil and enable thermoelectric and wind energy to flow from Rio de Janeiro and Espírito Santo to the rest of the country.

On 5 June 2025, Minister Silveria met with French President Emmanuel Macron to expand on cooperation in clean energy, critical minerals and the energy transition.¹²⁶ The meeting aimed to reinforce the countries' joint commitment to sustainable development and investment in low-carbon technologies.

On 6 June 2025, Minister Silveira signed a declaration of intent with the French Ministry of Economy, Finance and Industrial and Digital Sovereignty to deepen bilateral cooperation on low-carbon hydrogen.¹²⁷ The partnership supports green reindustrialization and technological innovation through the exchange of information.

On 17 June 2025, the Ministry of Science, Technology and Innovation and Finep signed a project contract to develop and test critical technologies for nuclear microreactors.¹²⁸ The BRL30 million financial subsidy will advance capabilities in nuclear technology through the construction of a 100 watts Critical Unit, safety and performance testing and the development of new reactor materials.

On 3 July 2025, President Lula da Silva signed the Mercado Común del Sur (MERCOSUR) Presidential Declaration on Energy Integration and Security in MERCOSUR during the 66th MERCOSUR Summit in Buenos Aires.¹²⁹ The declaration reaffirmed Argentina's commitment to advancing regional energy integration and emphasized the importance of a fair and inclusive energy transition, regional interconnections and regulatory harmonization to strengthen energy security and support industrial development.

On 5 July 2025, Minister Silveira and China's CGN Energy International signed a letter of intent to cooperate on clean energy, mineral sector modernization and the sustainable use of nuclear resources.¹³⁰ The agreement includes joint research, development and innovation in energy generation, storage, digitalization and sustainable resource management.

On 7 July 2025, Minister Santos announced the establishment of a "China-Brazil Center for Cooperation in Artificial Intelligence."¹³¹

On 8 July 2025, the Ministry of Mines and Energy and India's Ministry of New and Renewable Energies signed a memorandum of understanding to expand bilateral cooperation in renewable energy.¹³² The agreement outlines joint efforts in solar, wind, bioenergy, energy storage and low-emission hydrogen.

On 10 July 2025, Ministry of Science, Technology and Innovation and Softex announced a training program for microelectronics.¹³³ Participants will learn about integrated circuits and chip implementation for microelectronics and semiconductors.

On 28 July 2025, BNDES approved BRL1 billion in financing for the construction of the Draco Solar Complex in Minas Gerais.¹³⁴ The project will produce enough energy to power 569,000 homes.

On 11 August 2025, BNDES approved BRL625 million in financing for the construction of a new corn ethanol plant.¹³⁵ The project aims to reduce the equivalent of 380,000 tons of carbon dioxide per year.

On 25 August 2025, Minister Silveira and Canadian Minister of International Trade Maninder Sidhu discussed a Memorandum of Understanding between Ministry of Mines and Energy and Natural Resources Canada.¹³⁶ The memorandum will outline cooperation on critical minerals and renewable energy with the creation of a working group.

On 26 August 2025, Secretary for Oil, Natural Gas and Biofuels Pietro Mendes met with Saudi Arabian officials to discuss the implementation of the Action Plan for Energy Cooperation.¹³⁷ Brazil and Saudi Arabia agreed to create technical working groups to further explore initiatives and collaboration hydrogen and energy supply chains.

On 1 September 2025, Brazil and MERCOSUL approved the 2025-2026 Work Plan for mining and geology.¹³⁸ The plan includes research of mineral capabilities of Brazil and MERCOSUL members, cooperation in research and extraction of mineral resources, shaping integrated regulatory frameworks and public policy proposals for mining and critical minerals supply chain.

On 3 September 2025, Minister Silveira published a resolution which promises an investment of over BRL500 million for energy development in the Amazon.¹³⁹ A majority of projects are solar energy and storage projects, including “hybridization of thermal power plants with solar photovoltaic energy and battery storage systems.”

On 4 September 2025, BNDES announced an allocation of USD950 million for the promotion of decarbonization and transition projects.¹⁴⁰ The funding package will advance innovations relating to green energy and incentivize green technological development.

On 23 September 2025, Minister Silveira announced BRL4.4 billion for energy infrastructure and the Agreste Solar Complex.¹⁴¹

On 2 October 2025, BNDES and the Export-Import Bank of China established an investment fund of approximately BRL5.7 billion.¹⁴² The fund aims to promote bilateral sustainable development and its target sectors include green development and mining.

Brazil has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Brazil has taken strong action towards the combined welfare target by diversifying its supply chains for energy transitions and focusing on reliable, sustainable and responsible supply chains through domestic and international actions. Recent initiatives include advancing bilateral cooperation with France in the low-carbon hydrogen sector, supporting the domestic development of nuclear microreactors, signing agreements with India to expand renewable energy generation and low-emission hydrogen and approving financing for green energy projects. It has also advanced supply chains for critical minerals and materials beneficiated at source, semiconductors and energy transition technologies.

Thus, Brazil receives a score of +1.

Analyst: Arash Aslan-Beigi

Canada: +1

Canada has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 21 November 2024, Minister of Energy and Natural Resources Jonathan Wilkinson announced CAD2.1 million in funding for the Qikiqtani Inuit Association to “purchase heavy equipment simulators dedicated to the Pond Inlet Research and Training Centre,” support training Inuit Nunavummiut individuals in the natural resources industry and build meaningful partnerships with Nunavut residents.¹⁴³ As mining is one of Nunavut’s biggest private sector industries, this action will help strengthen crucial critical minerals supply chains and help build a more resilient and sustainable sector.

On 26 November 2024, Member of Parliament for Northwest Territories Michael McLeod announced a CAD2 million investment for geothermal energy development in the Northwest Territories.¹⁴⁴ The funding aims to facilitate a just clean energy transition for communities, particularly through promoting geothermal energy as a low-carbon alternative.

On 28 November 2024, Minister Wilkinson announced CAD7.5 million in funding for five clean energy technology projects that aim to support the energy transition in British Columbia.¹⁴⁵ This includes CAD2.5 million for British Columbia Biocarbon Ltd., CAD1.8 million for Arca Climate Technologies Inc. and CAD1.5 million for the University of British Columbia.

On 2 December 2024, Canada's Minister of Export Promotion, International Trade and Economic Development of Canada Mary Ng and Indonesia's Minister of Trade Budi Santoso jointly announced the conclusion of negotiations on a comprehensive economic partnership agreement and committed to signing it in 2025.¹⁴⁶ The agreement includes commitments to cooperate on critical minerals, with an emphasis on developing secure and resilient critical mineral supply and value chains.

On 5 December 2025, Minister Wilkinson announced the transfer of CAD265 million to clean electricity projects in Saskatchewan.¹⁴⁷ The funds will primarily go towards SaskPower to build and improve power lines, battery storage systems and solar power generation.

On 8 December 2024, Minister of Environment and Climate Change Steven Guilbeault and Minister of Public Safety, Democratic Institutions and Intergovernmental Affairs Dominic LeBlanc announced over CAD1 billion in investments to support New Brunswick's supply chain and ensure energy transitions are reliable and affordable.¹⁴⁸ These investments include up to CAD1 billion for Indigenous-led wind projects, CAD25 million for the New Brunswick and Mi'kmaq First Nations' "25-megawatt Neweg Energy wind project" and CAD25 million to support pre-development for NB Power's plan to increase small modular reactor capacity by 600 megawatts. This action will support the reliability and sustainability of the supply chain and clean energy technologies.

On 13 December 2024, Member of Parliament George Chahal announced CAD215 million in funding for nine Albertan clean energy projects including a focus on solar, wind and grid infrastructure upgrades.¹⁴⁹ These projects will support reliable, affordable and responsible supply chains for energy transitions, increasing the clean energy capacity with for an additional 170,000 homes.

On 13 December 2024, Minister Wilkinson and the United States announced a co-investment for the Canadian mining company Fireweed Metals Corp. to support the pre-development of a "transmission line between Faro and Ross River."¹⁵⁰ The pre-development phase will include responsible management through consultations

¹⁵⁰ Canada and United States Co-Invest to Unlock Critical Minerals Development in Yukon, Natural Resources Canada (Ottawa) 13 December 2024. Access Date: 4 May 2025. Canada and United States Co-Invest to Unlock Critical Minerals Development in Yukon

with First Nations groups. Natural Resources Canada will provide CAD12.9 million for this initiative through the Critical Minerals Infrastructure Fund alongside USD15.8 million from the United States.

On 19 December 2024, Member of Parliament Brendan Hanley announced CAD1.4 million in funding from the Oil to Heat Pump Affordability program and CAD287,000 from the Low Carbon Economy Fund to help reduce home energy costs for low and middle-income residents in Yukon.¹⁵¹ This funding will enable maximum rebates of CAD24,000 and a CAD250 one-time payment to individuals to homeowners that “add high-efficiency heat pumps in homes currently heated with oil.” This action will support supply chains for energy transitions by increasing the demand for clean energy technologies.

On 20 December 2024, Minister Wilkinson announced an investment of up to CAD20 million for Foran Mining Corporation to build a hydro transmission line.¹⁵² This will support the electrification of the McIlvanna Bay mine as part of Canada’s efforts to support a responsible supply chain for energy transitions.

On 20 December 2024, Minister Wilkinson allocated up to CAD10 million for Torngat Metals’ pre-development activities regarding the construction of a 170-kilometre access road to transport rare earth elements from Nunavik, Quebec to Labrador.¹⁵³ This will help strengthen critical minerals supply chains and support energy transitions as rare earth elements are vital for clean energy.

On 7 January 2025, Member of Parliament Marcus Powlowski announced over CAD11 million to strengthen Canada’s clean and alternative energy sectors.¹⁵⁴ This funding will be divided between eight projects to support reliable and sustainable supply chains for the energy transition.

On 6 February 2025, Minister Wilkinson announced CAD43.5 million for critical minerals projects in Quebec.¹⁵⁵ The funding will support six projects focused on the development and transportation of critical minerals. Up to CAD39.8 million will be invested for these initiatives alongside CAD3.7 million for the recovery of lithium from “spodumene ore.”

On 12 February 2025, Parliamentary Secretary Marc Serré announced CAD14.2 million for carbon capture and storage.¹⁵⁶ This supports investment in energy transition technologies.

On 13 February 2025, Minister Wilkinson announced that Canada has joined the Global Offshore Wind Alliance in addition to the Governments of Nova Scotia and Newfoundland and Labrador.¹⁵⁷ This action demonstrates Canada's commitment towards offshore wind energy generation as part of the energy transition.

On 24 February 2025, Canada announced CAD500,000 in funding for Phase Two of the Global Initiative for Transitioning Remote Communities to Renewable Energy.¹⁵⁸ In partnership with the International Renewable Energy Agency, phase two will focus on helping remote communities develop ways to transition towards reliable, sustainable and affordable clean energy.

On 3 March 2025, Minister Wilkinson announced the extension of the 15 per cent Mineral Exploration Tax Credit and CAD500 million funding for the Critical Minerals Infrastructure Fund.¹⁵⁹ This funding will be given to projects that develop "energy and transportation infrastructure" to increase access to Canadian critical minerals.

On 5 March 2025, Minister Wilkinson and Argentina's Secretary of Mining Luis Lucero signed an agreement to collaborate on critical minerals and mining sustainability.¹⁶⁰ This partnership aims to facilitate sustainable investment in the mining sector and support global supply chain integration.

On 5 March 2025, Minister Wilkinson announced several investments for nuclear energy as part of Canada's commitment towards the clean energy transition and facilitating a low-carbon economy.¹⁶¹ This includes a CAD304 million agreement with AtkinsRéalis to develop a "natural uranium-fuelled Canadian deuterium uranium" (CANDU) nuclear reactor, CAD55 million for Ontario Power Generation's Darlington New Nuclear Project which aims to develop three new small modular reactors (SMRs) that produce no greenhouse gases during use and CAD52.4 million for other SMR and CANDU reactor projects that advance decarbonization in Saskatchewan, Alberta and Ontario.

On 18 March 2025, Natural Resources Canada announced CAD11 million to support clean energy projects in Indigenous communities.¹⁶² This supports Canada's commitment to use responsible energy transition technologies.

Access Date: 15 May 2025. <https://www.canada.ca/en/natural-resources-canada/news/2025/03/government-of-canada-announces-funding-for-clean-and-reliable-energy-in-first-nations-and-inuit-communities0.html>

On 21 March 2025, Canada's Minister of Innovation, Science and Industry Anita Anand announced a CAD8 million investment for Teledyne, a specialized semiconductor manufacturer, on behalf of Canada's Strategic Innovation Fund.¹⁶³ The money will go towards a project to upgrade Teledyne's equipment.

On 23 May 2025, Minister of Energy and Natural Resources Tim Hodgson pledged to accelerate permitting processes for major energy projects, including renewable energy projects, to a two-year maximum decision timeline.¹⁶⁴

On 11 June 2025, Canada announced CAD4.9 million in additional funding towards the Anahim Lake Solar Project, for a total contribution to CAD17 million.¹⁶⁵ This project will provide the Ukatchko First Nation with access to renewable energy.

On 17 June 2025, Prime Minister Mark Carney announced CAD80.3 million in federal funding to expand critical mineral supply chains.¹⁶⁶ CAD50.3 million of this funding will support Canadian research and development initiatives.

On 17 June 2025, the G7 launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit, under Canada's G7 Presidency.¹⁶⁷ It supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 22 June 2025, Canada and the European Union signed a Security and Defence Partnership to boost defence cooperation and launched talks on Canada's access to the EUR150 billion SAFE procurement instrument.¹⁶⁸ They also agreed to enhance critical raw materials trade with Canada and announced the EU-Canada Industrial Policy Dialogue to further strengthen supply chains in critical sectors.

On 23 June 2025, the Canadian Infrastructure Bank announced a CAD55 million loan to Torngat Metals, a Canadian mining company, to support the development of the Strange Lake rare earth minerals project in Nunavik, Quebec.¹⁶⁹ The funds will go towards improvements to existing infrastructure, preparations for an open pit mine and establishing utility connections. The mine is anticipated to contain high amounts of dysprosium and terbium, which are critical minerals for electric vehicle motors and wind turbine generators.

On 3 July 2025, the National Research Council of Canada, Quebec's MiQro Innovation Collaborative Centre and the United Kingdom's Compound Semiconductor Applications Catapult signed a memorandum of

¹⁶⁹ CIB's \$55 million loan to Torngat Metals strengthens Canada's critical minerals sector, Canadian Infrastructure Bank (Toronto) 23 June 2025. Access Date: 14 August 2025. <https://cib-bic.ca/en/medias/articles/cibs-55-million-loan-to-torngat-metals-strengthens-canadas-critical-minerals-sector>

understanding to bolster semiconductor supply chains in G7 countries and improve their resiliency.¹⁷⁰ This memorandum will synthesize Canada and the United Kingdom's respective abilities to design, fabricate and package semiconductors.

On 4 July 2025, Minister Hodgson announced investments of CAD21.5 million in carbon capture, utilization and storage technologies.¹⁷¹ These investments support the decarbonization of the Canadian energy industry.

On 8 July 2025, Minister of Housing and Infrastructure and Minister responsible for Pacific Economic Development Canada Gregor Robertson, Warden of the County of Simcoe and Mayor of the Township of Ramara Basil Clarke and President and Chief Executive Officer of the Canadian Urban Transit Research and Innovation Consortium Josipa Petrunic announced a joint investment of CAD221,116 to support Simcoe County in transitioning to zero emissions technologies.¹⁷² The federal government's contribution will be provided through the Zero Emission Transit Fund.

On 11 July 2025, Minister Wilkinson announced nearly CAD16 million in federal funding under the Energy Innovation Program to support renewable energy, carbon capture and grid modernization projects in Nova Scotia, Prince Edward Island, and New Brunswick.¹⁷³ The funding will modernize electricity grids, expand wind and solar capacity and support clean energy initiatives in Indigenous, rural, and remote communities.

On 14 July 2025, Minister Hodgson announced a new initiative in partnership with the Northwest Territories to apply artificial intelligence and digital scanning to historic drill cores from the Slave Geological Province in the Northwest Territories.¹⁷⁴ The initiative will help identify new areas with high critical-minerals potential.

On 7 August 2025, Minister Hodgson announced a CAD8.2 million investment in collaboration with Northcliff Resources, a Canadian mining company, to develop a tungsten-molybdenum deposit in New Brunswick.¹⁷⁵ This contribution will go toward the project's feasibility study update and engineering design. Tungsten and molybdenum are key minerals in battery production and renewable energy systems, helping this action affirm Canada's commitment to critical mineral supply chains.

On 8 August 2025, Canada's Parliamentary Secretary to the Minister of International Trade and to the Secretary of State for International Development Yasir Naqvi announced a CAD2.5 million investment from the Energy

Innovation Program in TerraFixing to develop carbon capture technology.¹⁷⁶ TerraFixing will use these funds to advance direct air capture technology for cold climates.

On 13 August 2025, Parliamentary Secretary to the Minister of Energy and Natural Resources Claude Guay announced over CAD33 million for projects related to the zero-emissions vehicles transition.¹⁷⁷ This includes funding for projects developing new technologies for medium and heavy-duty trucks.

On 15 August 2025, Minister Hodgson announced CAD13 million of funding for five projects to support the modernization of the Province of Ontario's electricity grid.¹⁷⁸ In addition to supporting the distribution of clean energy, these projects improve Ontario's clean energy storage capabilities.

On 25 August 2025, Minister of International Trade Maninder Sidhu and Brazilian Minister of Mines and Energy Alexandre Silveira discussed a Memorandum of Understanding between Ministry of Mines and Natural Resources Canada.¹⁷⁹ The memorandum will outline cooperation on critical minerals and renewable energy with the creation of a working group.

On 26 August 2025, Minister Hodgson and Germany's Minister for Economic Affairs and Energy Katherine Reiche signed a joint declaration to deepen cooperation on critical mineral supply chains.¹⁸⁰ The agreement includes collaboration on processing technologies and the signing of three memorandums of understanding between relevant German and Canadian companies.

On 8 September 2025, Minister Hodgson announced CAD5.8 million in investments for carbon capture and storage (CCS) projects in British Columbia.¹⁸¹ The investment consists of CAD1.3 million to Svante to establish new testing facilities, CAD2 million to Anodyne Chemistries Inc to improve industrial processes that produce key chemical commodities and CAD2.4 million to Agora Energy Technologies Ltd to develop CCS processes using impure flue gas.

On 12 September 2025, Parliamentary Secretary to the Minister of Northern and Arctic Affairs Brendan Hanley announced CAD13.5 million in government funding for the Kluane N'tsi Wind Energy Project.¹⁸² The funding will help support the 900 kilowatts turbine's integration into the grid and its associated battery storage.

On 24 September 2025, Prime Minister Carney and President of Indonesia Prabowo Subianto announced the signing of the Indonesia-Canada Comprehensive Economic Partnership Agreement, strengthening trade ties in the critical minerals and renewable energy sectors.¹⁸³ The agreement also included the signing of an Memorandum of Understanding between Export Development Canada and the Indonesia Investment Authority, Indonesia's sovereign wealth fund to explore strategic investments in clean energy technologies.

On 29 September 2025, Minister Hodgson announced a CAD40 million investment in Hitachi Energy Canada, a clean energy equipment company.¹⁸⁴ The investment will support the expansion of the company's Quebec transformer manufacturing facility and the establishment of a high-voltage direct current simulation centre.

On 3 October 2025, Minister Hodgson announced a CAD22 million investment to support eight Canadian battery innovation projects.¹⁸⁵ These funds aim to improve energy storage performance while bolstering the security and heightening the competitiveness of Canada's energy supply chains.

On 4 October 2025, Minister Hodgson announced CAD730,000 thousand for Arianne Phosphate Inc to research and develop a local phosphorus supply for lithium-iron-phosphate batteries.¹⁸⁶

On 6 October 2025, Minister Hodgson announced a CAD3 million critical minerals development and Indigenous participation grants program for Indigenous organizations or non-Indigenous organizations partnered with Indigenous communities.¹⁸⁷ The aim of the program is to ensure Indigenous voice are participating in critical mineral development projects and to support responsible critical mineral supply chains.

Canada has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Canada has taken strong action towards the combined welfare target of supporting reliable, diversified, sustainable and responsibly supply chains for energy transitions through investments in clean energy projects and mining transportation projects. It has also taken strong action to strengthen supply chains for critical minerals and clean energy technologies through recent investments in clean energy projects in the Maritime provinces, including grid modernization, renewable energy expansion and carbon capture. Additionally, Canada has invested in carbon capture technology through the Energy Innovation Program, supported the development of a project for key minerals in battery production and financed the Strange Lake rare earth minerals project.

Thus, Canada receives a score of +1.

China: +1

China has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 29 November 2024, China's Sinoma EC International Investment and Uzbekistan's Ministry of Investment, Industry and Trade signed an investment agreement for a solar power plant in Uzbekistan.¹⁸⁸ The agreement also includes the construction of an energy storage plant.

On 30 November 2024, the Electricity Council released a new bluebook that promises to establish a framework for a national unified power market by 2029.¹⁸⁹ The plan includes the inclusion of hydropower and nuclear power in the market. In addition, it claims that 50 per cent of renewable energy will be integrated by 2025.

On 6 February 2025, China and Pakistan released a joint statement on cooperation on geological surveys for mining.¹⁹⁰ The governments shared their support of Chinese investment in Pakistan's mining industry and offshore oil and gas projects.

On 17 February 2025, the Ministry of Industry and Information Technology shared a new action plan dedicated to the energy storage manufacturing sector.¹⁹¹ This includes upgrading lithium batteries, new technological innovations and energy storage methods.

On 27 February 2025, China and Laos celebrated the launch ceremony of the China-Laos power interconnection project.¹⁹² This project will advance the transmission of clean electricity between China and Laos. The project is part of the larger China-Laos Economic Corridor and will strengthen energy cooperation.

On 11 March 2025, the National People's Congress (NPC) adopted the "2025 National Economic and Social Development Plan."¹⁹³ The plan highlights expansion of artificial intelligence sector, energy storage, electronic manufacturing, electric vehicle batteries, photovoltaic industries and green development.¹⁹⁴

On 11 March 2025, the NPC approved the "Report on the Work of the Standing Committee of the National People's Congress," which presents the Standing Committee's work in 2024 and plans for 2025.¹⁹⁵ The Standing Committee in 2025 will formulate an atomic energy law and conduct research in "artificial intelligence, the

digital economy, big data, autonomous driving, the low-altitude economy and aerospace to create new legislation.¹⁹⁶

On 27 March 2025, the Ministry of Ecology and Environment announced that steel, cement and electrolytic aluminum industries will be included in the carbon trading market.¹⁹⁷ This will allow for the promotion of the green transition within major industries, which covers 60 per cent of China's total carbon emissions.

On 12 April 2025, Vice Minister of Industry and Information Technology Xin Guobin and the United Kingdom Minister of State for Trade Policy and Economic Security Douglas Alexander discussed deepening China-UK industrial cooperation for artificial intelligence, digital economy and green energy.¹⁹⁸ The talks demonstrate a step in strengthening cooperation for energy transition technologies.

On 18 April 2025, Minister of Industry and Information Technology Li Leheng and the United Arab Emirates Minister of Industry and Advanced Technology Sultan Al Jaber furthered cooperation in renewable energy, artificial intelligence, technical equipment and photovoltaic projects.¹⁹⁹ This cooperation enhances China's commitment to diversified and reliable supply chains for the energy transition.

On 29 April 2025, President Xi Jinping visited the Shanghai "Model Space" where he highlighted the importance of funding technological innovation, artificial intelligence and enhancing China's position as a global leader.²⁰⁰

On 11 May 2025, China's Windey Energy Technology Group, SENAI CIMATEC and Brazil's Minister of Mines and Energy Alexandre Silveira signed a Memorandum of Understanding to develop energy storage, advance wind energy and green hydrogen in Brazil, promote renewable energy in rural agricultural areas and promote renewable energy within the electrical grid.²⁰¹ The two-year partnership ultimately aims to advance renewable energy and low-carbon technologies.

On 13 May 2025, the National Energy Administration and Minister Silveira signed an agreement to enable Brazil to access China's ethanol market.²⁰² This partnership is focused on bioethanol and low-carbon ethanol and involves the creation of a Bilateral Working Group on Ethanol and Sustainable Fuels to develop innovative uses for ethanol. This includes its potential to replace gasoline for transportation vehicles.

On 13 May 2025, the National Development and Reform Commission and Minister Silveira signed an agreement to advance sustainable development in mining.²⁰³ Aiming to support the energy transition, this partnership includes periodic meetings, workforce training and the future creation of the China-Brazil Mining Investment Alliance.

On 23 May 2025, Foreign Minister Wang Yi and Dutch Foreign Minister Caspar Veldkamp agreed to deepen cooperation in multiple sectors, including maintaining close communication on semiconductor technology.²⁰⁴

On 28 May 2025, China, the Association of Southeast Asian Nations (ASEAN), China and the Gulf Cooperation Council issued a joint statement committing to diversify and secure global supply chains for critical energy transition minerals and to enhance cooperation in renewable energy, hydrogen, ammonia and next-generation solar and wind technologies.²⁰⁵

On 28 May 2025, the Ministry of Commerce, the China Semiconductor Industry Association and the European Union Chamber of Commerce in China met alongside over 40 semiconductor enterprises from Europe and China to strengthen cooperation in the sector and promote stable, secure supply chains.²⁰⁶

On 20 June 2025, China began constructing the Ganqmod–Gashuun Sukhait cross-border railway with Mongolia, which will transport 30 million tonnes of cargo annually.²⁰⁷ The project enhances the transport of mineral and energy resources between the countries.

On 27 June 2025, Premier Li Qiang met with Prime Minister of Senegal Ousmane Sonko in Beijing to enhance bilateral cooperation, including in agricultural product processing, industrial parks, new energy, digital economy and information security.²⁰⁸ This reflects China's action to strengthen supply chains for energy transition technologies by expanding collaboration on new energy projects, as well as potential action toward critical minerals through planned cooperation in energy and mineral resources.

On 4 July 2025, the Ministry of Industry and Information Technology held a symposium focused on the development of the photovoltaics industry.²⁰⁹ Issues discussed included price competition and technological innovation.

On 5 July 2025, CGN Energy International and Brazil's Minister of Mines and Energy Alexandre Silveira signed a letter of intent to cooperate on clean energy, mineral sector modernization and the sustainable use of nuclear

resources.²¹⁰ The agreement includes joint research, development and innovation in energy generation, storage, digitalization and sustainable resource management.

On 12 September 2025, the National Development and Reform Commission and National Energy Administration announced a CNY250 billion plan to support the development of China's energy storage capabilities.²¹¹

On 26 September 2025, Vice Premier Ding Xuexiang and Russian Deputy Prime Minister Alexander Novak led the 22nd China-Russia Energy Cooperation Committee Meeting.²¹² Both members agreed to deepen energy cooperation and partner on energy projects. The Vice Premier highlighted “renewable energy, hydrogen energy and energy storage” as key areas for further cooperation.

On 28 September 2025, Ministry of Industry and Information Technology announced a new plan develop China's non-ferrous metals industry.²¹³ It includes measures to support scrap metal and recycling initiatives for critical minerals.

On 2 October 2025, the Export-Import Bank of China and Brazilian National Bank for Economic and Social Development established an investment fund of approximately BRL5.7 billion.²¹⁴ The fund aims to promote bilateral sustainable development and its target sectors include green development and mining.

On 14 October 2025, China and Iceland released a Joint Statement on Further Strengthening Cooperation on Geothermal Energy and Green Transition.²¹⁵ The statement proposes Chinese and Icelandic governments and industries cooperation to further grow geothermal energy, green industries and energy transition supply chains.

On 15 October 2025, the National Development and Reform Commission unveiled a three-year plan to increase the number electric vehicles (EV) charging stations by over 20 million.²¹⁶ The government aims to upgrade current facilities and create EV infrastructure in rural areas.

China has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. China has taken strong action towards the combined welfare target and to support supply chains for energy transition technologies through projects for energy storage and renewable

energy including investing in a solar power plant and energy storage plant in Uzbekistan, cooperating for clean electricity between China and Laos and partnering with Brazil, cooperation with Dutch officials and European semiconductor leaders. In addition, China has invested in critical mineral transport infrastructure with Mongolia and developed critical mineral supply chain agreements with ASEAN and Brazil.

Thus, China receives a score of +1.

Analyst: Michelle Kim

France: +1

France has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials benefited at source, semiconductors and technologies.

On 20 November 2024, Proparco and the German Investment and Development Company announced a EUR115 million green loan to support Turkish power producer Enerjisa Enerji Üretim A.Ş. in its clean energy transition.²¹⁷ This financing will enable Enerjisa “to develop nine onshore wind power plants with a combined capacity of 750” megawatts (MW), helping to advance renewable energy capacity in the country. Proparco will provide EUR75 million for this project with EUR40 million provided by the German Investment and Development Company.

On 1 December 2024, France’s Inter-Ministerial delegate for Critical Ores and Metals Benjamin Gallezot and Nigeria’s Minister of Solid Minerals Dele Alake signed a Memorandum of Understanding on critical minerals.²¹⁸ The memorandum includes joint projects to diversify and secure the critical minerals supply chain, promote sustainable mining and decarbonize the energy sector in both countries.

On 27 December 2024, the Ministry of the Economy announced the results of a competitive tender for the construction and operation of two floating offshore wind farms in the Mediterranean.²¹⁹ Two winning bids were selected to develop 250 MW projects off the coast of Narbonais and Golfe de Fos.

On 14 January 2025, the Ministry of the Economy, Finance and Industrial and Digital Sovereignty and Saudi Arabia’s Minister of Mineral Resources Bandar Alkhorayef and Vice Minister of Industry and Mineral Resources for Mining Affairs Khalid Al-Mudaifer signed a declaration of intent to cooperate for mineral resources development.²²⁰ Formalized at the Future Minerals Forum, this collaboration will support the diversification of Saudi Arabia’s critical minerals supply chains.

On 16 January 2025, the Ministry of the Economy announced its selection of a winning tender to develop a biomethane production facility and reiterated its commitment to accelerating national biomethane production.²²¹ The facility will produce 36 gigawatt hours of energy per year.

On 23 January 2025, Proparco announced EUR500,000 in funding for Netis, a telecommunications company developing hydrogen-based electricity production equipment.²²² This funding will enable Netis to test this clean energy solution which aims to reduce the carbon footprint.

On 5 February 2025, the French Development Agency (AFD), European Union, Indonesian Ministry of Energy and Mineral Resources and the National Electricity Company launched the 2025-2030 Indonesia Energy Transition Facility, under the Just Energy Transition Partnership Framework.²²³ This project will focus on developing and implementing renewable energy and transmission projects and ensuring appropriate public policies for the energy transition. The AFD will provide EUR4.1 million for this initiative and the EU will provide EUR10.6 million.

On 10 February 2025, the AFD and Watt for Change Foundation signed a three-year partnership agreement whereby France will provide EUR860,000 in funding to support access to energy in Benin, Mauritania and Madagascar.²²⁴ The funding will be divided amongst French associations aiming to advance projects for solar pumping, clean cooking methods and other needs.

On 14 February 2025, France signed a new strategic sector contract for the “New Energy Systems” industry, covering the period 2024–2027.²²⁵ Under this initiative, France is partnering with industry actors to develop industries related to the energy transition, with plans to study heat recovery technologies, energy flexibility and alternative fuels will be supported by a EUR50 billion commitment.

On 2 March 2025, France initiated a public consultation on the third Multiannual Energy Program for the 2025–2035 period, which remained open until 5 April 2025.²²⁶ The draft plan sets ambitious targets for offshore wind and marine renewable energy development, aiming to reduce dependence on fossil fuels and transition to a decarbonized energy mix.

On 12 March 2025, France joined Austria, Belgium, Finland, Germany, Italy, Poland, Spain and the Netherlands to form the Semiconductor Coalition to strengthen Europe's semiconductor ecosystem.²²⁷ It commits to expanding production capacity, research and workforce to improve strategic autonomy.

On 17 March 2025, France and Japan announced joint support for a heavy rare earth refining project in Lacq, France, through the participation of Iwatani Corporation and the Japan Organization for Metals and Energy Security.²²⁸ The facility will produce dysprosium and terbium, meeting an estimated 20 per cent of Japan's future demand. Japan committed approximately EUR100 million and France EUR106 million in funding, with both governments also pledging to cooperate on securing raw material supply from producing countries.

On 15 April 2025, France published an updated version of its National Hydrogen Strategy.²²⁹ New measures include a EUR4 billion support mechanism for low-carbon hydrogen production, government support for the development of hydrogen technologies across the supply chain, support for the deployment of hydrogen-powered vehicles and support for studies on synthetic fuel. France also announced that it will support two energy and industry sector decarbonization projects and a value chain development project aimed at producing low-carbon hydrogen.

On 2 May 2025, Proparco, the German Investment and Development Company and Standard Chartered announced USD60 million in joint financing for Indonesia's Saguling floating solar photovoltaic power plant under the Just Energy Transition Partnership.²³⁰ Once complete, the plant will support the energy transition by decreased Indonesia's carbon emissions by 63,100 tonnes per year and increasing solar electricity generation in the country by 13 per cent.

On 12 May 2025, the AFD Group and Office Chérifien des Phosphates (OCP) Group announced a EUR350 million financing agreement to support the OCP Group in transitioning towards 100 per cent renewable energy by 2027.²³¹ Additionally, this funding will enable the group to produce and promote decarbonized fertilizers, develop green hydrogen and green ammonia and increase clean energy and non-conventional water production. This partnership aims to support Morocco's low-carbon transition and promote sustainable agriculture in Africa.

On 5 June 2025, President Emmanuel Macron met with Brazilian Minister of Mines and Energy Alexandre Silveira to expand on cooperation in clean energy, critical minerals and the energy transition.²³² The meeting aimed to reinforce the countries' joint commitment to sustainable development and investment in low-carbon technologies.

On 6 June 2025, the Ministry of Economy, Finance and Industrial and Digital Sovereignty signed a declaration of intent with the Brazilian Ministry of Mines and Energy to deepen bilateral cooperation on low-carbon

hydrogen.²³³ The partnership supports green reindustrialization and technological innovation through the exchange of information.

On 10 June 2025, Minister for Industry and Energy Marc Ferracci and Minister of Economy Eric Lombard signed the second strategic contract for the nuclear sector.²³⁴ Covering the period from 2025 to 2028, the contract outlines 17 projects to boost industrial performance, invest in fuel cycle plants and encourage supply chain localization.

On 17 June 2025, the G7, including France, launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit.²³⁵ It supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 27 June 2025, the AFD, Banque des Territoires and Ecological Transition Agency signed an agreement to strengthen cooperation on energy and ecological transitions in the Réunion region.²³⁶ The partnership prioritizes sustainable mobility, energy-efficient buildings, renewable electricity diversification, climate adaptation and circular economy initiatives.

On 28 June 2025, French Minister Delegate for Foreign Trade and French Nationals Abroad Laurent Saint-Martin signed a Memorandum of Understanding with Argentina's Mining Secretary Luis Lucero aimed at developing critical minerals including lithium.²³⁷ The bilateral agreement aims to promote financing and investment for mining projects.

On 30 June 2025, Minister of Foreign Trade Laurent Saint Martin and Argentinian Secretary of Mining Luis Lucero signed a joint declaration of intent on critical minerals to advance joint mining and industrial projects.²³⁸ The declaration aims to promote sustainable mining activities and build resilient, diversified supply chains to support the energy transition.

On 11 July 2025, Minister of Industry and Energy Marc Ferracci launched a call for projects to produce emission-free vehicles and their components in France.²³⁹ The objective of the call for projects is to encourage investment in the automotive sector.

On 29 August 2025, President Emmanuel Macron and German Chancellor Frederick Merz held a joint press conference, pledging to harmonize their energy policies and further coordinate their electricity grids.²⁴⁰ The conference also established the Franco-German Economic Agenda, which outlines further collaboration related to semiconductors and clean energy supply chains.

On 8 September 2025, the AFD, European Union and Ethiopia signed a EUR120 million loan and grant agreement to support Ethiopia's green and digital transition.²⁴¹ The funding will go towards renewable generation, electricity infrastructure and training schemes.

France has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. France has taken strong action towards the combined welfare target through the New Energy Systems contract, funding for access to energy projects in Benin, Mauritania and Madagascar and new measures announced via the updated National Hydrogen Strategy. It has also supported supply chains for energy transition technologies and critical minerals through its partnership with Nigeria to diversify critical minerals, funding for Indonesia's clean energy transition and solar plant, funding for Netis and green loan to Enerjisa.

Thus, France receives a score of +1.

Analyst: Eszter Réti

Germany: +1

Germany has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 20 November 2024, the German Investment and Development Company and France's Proparco announced a EUR115 million green loan to support Turkish power producer Enerjisa Enerji Üretim A.Ş. in its clean energy transition.²⁴² This financing will enable Enerjisa "to develop nine onshore wind power plants with a combined capacity of 750" megawatts (MW), helping to advance renewable energy capacity in the country. Proparco will provide EUR75 million for this project with EUR40 million provided by the German Investment and Development Company.

On 28 November 2025, Germany pledged EUR200 million in loans to South Africa to finance the energy transition.²⁴³ The funds will be used to support the expansion of solar and wind power in South Africa by increasing the demand for skilled workers.

On 4 December 2024, Federal Cabinet adopted the National Circular Economy Strategy which aims to secure raw materials, such as critical minerals, supply chains.²⁴⁴ One tactic is to increase recycling capacity, which would enable the creation of “secondary raw materials.”

On 11 December 2024, the Federal Cabinet approved amendments to the 2023 Renewable Energy Sources Act to increase flexibility for use and funding for biogas plants.²⁴⁵ This aims to ensure the full potential of bioenergy.

On 20 December 2024, the Ministry for Economic Affairs and Climate Protection announced the provision of EUR37.875 million to Berlin and Lower Saxony to support onshore and offshore wind energy infrastructure projects.²⁴⁶

On 2 January 2025, the government-owned KfW Development Bank, announced a EUR100 million loan to Chile’s economic development agency to bolster Chile’s green hydrogen economy, on behalf of the Ministry for Economic Affairs and Climate Action.²⁴⁷ This funding will be used for the production and use of green hydrogen across Chile’s entire value chain. This loan is part of the European Global Gateway Renewable Hydrogen Funding platform which finances public and private investments for renewable hydrogen.

On 21 January 2025, Germany, Italy, Austria, Algeria and Tunisia signed a Joint Declaration of Intent to develop the Southern Hydrogen Corridor.²⁴⁸ This initiative aims to establish a 3,500-4,000-kilometre pipeline transporting renewable hydrogen from North Africa to Europe and is expected to deliver up to 163 terawatt-hours of hydrogen annually to Europe.

On 3 February 2025, Minister of Finance Jörg Kukies met with Saudi Minister of Energy Abdulaziz bin Salman to discuss cooperation in the energy sector and particularly clean hydrogen.²⁴⁹ Following the meeting, the Ministers witnessed the signing of the “Saudi-German Green Hydrogen Bridge” Memorandum of Understanding between ACWA Power and SEFE, under which the companies will jointly develop projects for the development and export of green hydrogen from Saudi Arabia to Europe.

On 12 February 2025, Germany announced joint initiatives with the African Development Bank to accelerate energy access across Africa.²⁵⁰ The initiatives include increasing funding for renewable energy projects and supporting regional power integration programs.

On 13 February 2025, the Ministry for Economic Cooperation and Development announced funding to support green hydrogen production in Morocco, through its PtX Development Fund.²⁵¹ PtX will provide a EUR30 million grant to support the construction of a green hydrogen plant which is expected to reduce carbon emissions by 300,000 tonnes per year by producing 100,000 tonnes of green ammonia to be used for climate-friendly fertilizers.

On 19 February 2025, Parliamentary State Secretary at the Federal Ministry for Economic Affairs and Climate Action Stefan Wenzel met with Japanese State Minister of Economy, Trade and Industry Ogushi Masaki to exchange views on Japan-Germany energy cooperation. The discussion addressed the strengthening of the supply chain for clean energy technologies, renewable energy collaboration and decarbonization of the liquified natural gas value chain.

On 12 March 2025, Germany joined Austria, Belgium, Finland, France, Italy, Poland, Spain and the Netherlands to form the Semiconductor Coalition to strengthen Europe's semiconductor ecosystem.²⁵² It commits to expanding production capacity, research and workforce to improve strategic autonomy.

On 25 March 2025, the Ministry for Economic Affairs and Energy announced that the KfW Development Group is providing EUR172 million in financing as the first installment for the construction of a hydrogen core network.²⁵³ Once complete, the network will extend 9,040 kilometres and support a climate-neutral transition.

On 11 April 2025, the Ministry for Economic Affairs and Climate Protection announced the opening of a green hydrogen plant to produce carbon dioxide-free iron in Namibia.²⁵⁴ The plant will reduce 20,000 tonnes of carbon emissions per year and produce 15,000 tonnes of green iron per year. Germany provided EUR13 million for this project.

On 29 April 2025, DEG, the German Investment and Development Company, Proparco and Standard Charter announced USD60 million in funding for ACWA Power and Indonesia Power Renewables' floating solar photovoltaic project.²⁵⁵ As the first solar initiative under the Just Energy Transition Partnership, it will reduce Indonesia's annual carbon dioxide levels and boost solar power capacity, supporting diversified supply chains and sustainable development.

On 2 May 2025, the German Investment and Development Company, Proparco and Standard Chartered announced USD60 million in joint financing for Indonesia's Saguling floating solar photovoltaic power plant under the Just Energy Transition Partnership.²⁵⁶ Once complete, the plant will support the energy transition by

decreased Indonesia's carbon emissions by 63,100 tonnes per year and increasing solar electricity generation in the country by 13 per cent.

On 7 May 2025, KfW announced EUR27 million in financing to Siemens, a German electronics company and Pakistan's National Grid Company to build a transformer substation in Pakistan's Gharo Wind Corridor.²⁵⁷ The substation will enable the energy created from the wind corridor to be fed into power grids.

On 12 June 2025, Minister of Trade, Industry and Competition Parks Tau gave an address at the Green Hydrogen summit held in Cape Town.²⁵⁸ Minister Tau announced EUR23 million from the German government's KfW development bank to be used in funding catalytic green hydrogen projects.

On 17 June 2025, the G7, including Germany, launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit.²⁵⁹ It supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 24 June 2025, the Federal Cabinet approved a legislative draft to implement elements of the EU Renewable Energy Directive and streamline approval procedures for onshore wind energy projects.²⁶⁰ The draft introduces permit simplifications in designated wind energy areas, replacing temporary measures under the EU Emergency Regulation which are set to expire. It also amends the Federal Immission Control Act, Water Resources Act and Wind Energy Area Requirements Act to accelerate approvals.

On 30 June 2025, Indonesia's Ministry of Finance and Germany's KfW Development Bank announced the signing of EUR200 million loan agreement to bolster Indonesia's Affordable and Sustainable Energy Transition Program (ASET).²⁶¹ These funds will help Indonesia achieve ASET's two pillars: the improvement of policy and regulatory frameworks for a clean energy transition, and the strengthening of the financial sustainability and governance of the energy sector.

On 3 July 2025, Germany announced the allocation of EUR400 million over the next four years to support climate-friendly shipping and ports.²⁶² Through the Climate and Transformation Fund, this funding aims to modernize Germany's ports and help develop them into energy hubs, enhancing the sustainability and resiliency of maritime transport.

On 10 July 2025, the European Investment Bank, German Corporation for International Cooperation and United Nations Development Programme announced a multi-part initiative to support the energy, transport

and business sectors in Ukraine.²⁶³ This includes a EUR20 million grant through Germany's International Climate Initiative fund to integrate its Renewable Energy Solutions programme in Ukrainian cities. In partnership with the EIB, this programme will support the implementation of solar panels, batteries and heat pumps in public buildings. Additionally, Germany will allocate EUR19.6 million through the fund's Just Transition and Just Resilience for Ukraine Programme to address the socio-economic impacts of the transition away from coal.

On 11 July 2025, the Federal Council approved legislation to implement RED III (EU Directive 2023/2413), enacting faster approval procedures for renewable energy projects including wind, solar, geothermal and heat-pump technologies.²⁶⁴ The law seeks to facilitate the expansion of renewable energies.

On 17 July 2025, Germany and the United Kingdom signed the Treaty on Friendship and Bilateral Cooperation, agreeing to implement 17 joint projects under its Implementation Plan.²⁶⁵ Of these, two focus on advancing energy cooperation. The North Sea Energy Infrastructure Project commits both countries to develop offshore hybrid interconnection between the UK and Germany by the mid-2030s and the Strategic Science and Technology Partnership outlines collaboration on developing technologies such as quantum, AI, semiconductors, advanced connectivity and sustainable energy solutions.

On 22 July 2025, the Ministry for Economic Affairs and Energy announced EUR103.6 million in financing for two lithium projects in Rhineland-Palatinate and Hesse.²⁶⁶ The projects will extract lithium from the area and process it for commercial use.

On 26 August 2025, Minister for Economic Affairs and Energy Katherina Reiche and Canada's Minister of Energy and Natural Resources Timothy Hodgson signed a joint declaration to deepen cooperation on critical mineral supply chains.²⁶⁷ The agreement includes collaboration on processing technologies and the signing of three memorandums of understanding between relevant German and Canadian companies.

On 29 August 2025, Chancellor Frederick Merz and France's President Emmanuel Macron held a joint press conference, pledging to harmonize their energy policies and further coordinate their electricity grids.²⁶⁸ The conference also established the Franco-German Economic Agenda, which outlines further collaboration related to semiconductors and clean energy supply chains.

On 8 September 2025, the European Union and African Union launched two flagship programs aimed at accelerating the African Union's just transition, namely the Continental Energy Program in Africa funded by the European Union and Engaging for Africa's Green Energy Transition funded by Germany's Ministry for Economic Cooperation and Development.²⁶⁹

On 10 September 2025, the Federal Cabinet approved the Standortfördergesetz Act.²⁷⁰ The Act aims to incentivize private investment in renewable energy and its associated infrastructure through targeted tax incentives and cutting financial bureaucracy.

On 2 October 2025, a law to establish a EUR500 billion special fund for climate neutrality and infrastructure projects was published in the Federal Law Gazette.²⁷¹ EUR100 billion of the funds will be directly transferred to Germany's climate transformation fund, which financially supports clean energy projects and their related infrastructures.

Germany has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Germany has taken steps to support reliable, diversified, sustainable and responsible supply chains for energy transitions by strengthening supply chains for renewable hydrogen and advancing cross-border energy infrastructure through the North Sea Energy Infrastructure Project. Additionally, under the Strategic Science and Technology Partnership with the UK, Germany has agreed to collaborate on developing advanced technologies, including semiconductors, sustainable energy solutions and battery technologies, aimed at enhancing supply chain resilience. It has also taken strong action towards strengthening its supply chains in critical minerals through a project for lithium.

Thus, Germany receives a score of +1.

Analyst: Henri Hopkins

India: +1

India has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and energy transition technologies.

On 6 December 2024, India's International Solar Alliance and the United States Agency for International Development signed a Memorandum of Understanding (MoU) to advance grid interconnection.²⁷² This partnership seeks to expand the use of renewable energy and strengthen energy interconnections across regions, supporting the development of a unified grid. These initiatives will enhance the sustainability and reliability of energy transition technologies.

On 20 January 2025, the Ministry of Mines and the Government of Odisha hosted the third National Mines Ministers' Conference at Konark, Odisha.²⁷³ The conference focused on fostering collaboration to ensure efficient, safe and eco-friendly mining operations countrywide aligning with the 2030 Sustainable Development Goals.

On 29 January 2025, the Cabinet approved the launch of the National Critical Mineral Mission with an expenditure of INR163 billion and an expected investment of INR18 billion by Public Sector Undertakings, for a period of seven years from 2024-25 to 2030-31.²⁷⁴ The mission aims to build a resilient value chain for critical mineral resources vital to green technologies, encompassing all stages including exploration, processing and recycling. This will enhance the sustainability and responsibility of supply chains for critical minerals.

On 1 February 2025, Minister of Finance Nirmala Sitharaman proposed amendments to the Atomic Energy Act and the Civil Liability for Nuclear Damage Act to encourage private and foreign investment in India's nuclear sector.²⁷⁵ These legislative changes aim to facilitate the development of small modular nuclear reactors, contributing to the diversification and reliability of India's energy supply chains.

On 1 February 2025, the Ministry of Finance announced a National Manufacturing Mission to boost domestic manufacturing including Clean Tech sectors such as solar photovoltaic cells, electric vehicle batteries, electrolyzers, wind turbines and grid-scale batteries.²⁷⁶ The Mission aims to improve domestic value addition, support technology access and strengthen the ecosystem for key renewable energy components.

On 4 February 2025, Minister of Coal and Mines Kishan Reddy met with Saudi Arabia's Minister of Industry and Mineral Resources Bandar Ibrahim Alkhorayef to discuss cooperation for critical minerals.²⁷⁷ The ministers discussed the need for reliable critical minerals supply chains and discussed potential cooperation for critical minerals to support the energy transition.

On 13 February 2025, Minister of Petroleum and Natural Gas Hardeep Singh Puri announced several MoUs signed by India to advance energy security and sustainable and diversified supply chains for energy and the oil and gas sector.²⁷⁸ These include an MoU between India's International Oil and Natural Gas Corporation and Petrobras to advance oil and gas projects focused on low-carbon solutions and diversifying the sector in Brazil, India and other developing countries and an MoU for "hydrocarbon exploration in India's deep and ultra-deep offshore basins."

On 13 February 2025, United States President Donald Trump hosted Prime Minister Narendra Modi for an Official Working Visit in Washington D.C. where a Strategic Mineral Recovery initiative was launched. The initiative is a new US-India cooperative program to recover and process critical minerals including lithium, cobalt and rare earths from heavy industries like aluminum, coal mining and oil and gas.²⁷⁹ President Trump

and Prime Minister Modi also re-committed to the US-India Energy Security Partnership, including in oil, gas and civil nuclear energy.

On 15 February 2025, Minister of State for Coal and Mines Satish Chandra Dubey met with Sri Lanka's Minister of Industry and Entrepreneurship Development Sunil Handunnetti to discuss the finalization of a MoU on cooperation in the mineral resources.²⁸⁰ Their discussion included Sri Lanka's graphite and beach sand mineral resources, India's National Critical Mineral Mission and the energy transition.

On 19 February 2025, Minister Reddy met with the Governor of Caramarca, Argentina Raúl Alejandro Jalil in New Delhi to discuss lithium and mineral cooperation.²⁸¹ During the meeting, an MoU was signed between the Mineral Exploration and Consultancy Limited and the Catamarca provincial government to accelerate lithium exploration projects, enhance resource security and create new opportunities for Indian companies in the Latin American mining sector.

On 25 March 2025, the fifth India–Africa Strategic Dialogue convened to explore synergies between India's Critical Minerals Mission and the African Green Minerals Strategy.²⁸² Building on momentum from India's G20 presidency and the African Union's inclusion as a permanent member, the dialogue emphasized the importance of equitable partnerships. One session highlighted the need for India and African nations to integrate social responsibility into critical mineral extraction.

On 1 April 2025, Prime Minister Modi issued a joint statement with Chile's President Gabriel Boric to accelerate collaboration in exploration, mining and processing along with research and development to promote investment across the entire critical mineral value chain for mutual benefit.²⁸³ This is aimed at strengthening the critical mineral supply chain as Chile is the world's largest producer of copper and second-largest producer of lithium. This supports the combined welfare target of a reliable supply chain for energy transition.

On 8 April 2025, the Ministry of Coal signed two Coal Mine Development and Production Agreements with Marwatola-II and Namchik West, respectively.²⁸⁴ These agreements aim to advance domestic coal production and self-reliance by exploring coal mines.

On 25 April 2025, the Council of Scientific and Industrial Research's Institute of Minerals and Materials Technology signed two Joint Declarations of Intent with Russia's State Research and Design Institute of the Rare Metal Industry and the National University of Science and Technology MISIS.²⁸⁵ Both agreements are focused on collaboration for critical mineral technologies.

On 14 May 2025, the Cabinet approved the establishment of a sixth semiconductor manufacturing unit under the India Semiconductor Mission, a joint venture between HCL and Foxconn.²⁸⁶ The project contributes to strengthening domestic semiconductor production and supply chain resilience.

On 17 June 2025, the G7 launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit, welcoming India's endorsement of the plan.²⁸⁷ The Action Plan supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia and Korea.

On 20 June 2025, the Ministry of New and Renewable Energy launched a city accelerator program under the world's largest domestic rooftop solar scheme to provide technical support, streamline subnational policy frameworks and build institutional capacity.²⁸⁸ The first phase will target 30 cities and will inform energy transition decision making for future roll outs.

On 21 June 2025, the Ministry of New and Renewable Energy launched the Innovative Projects Start-Up Challenge with a total prize pool of INR23 million to accelerate rooftop solar and distributed renewable energy innovation nationwide.²⁸⁹

On 1 July 2025, the Minister of External Affairs Subrahmanyam Jaishankar attended the Japan-Australia-India-US (Quad) Foreign Ministers' Meeting in Washington D.C. along with United States Secretary of State Marco Rubio, Australian Minister for Foreign Affairs Penny Wong and Japanese Minister for Foreign Affairs Iwaya Takeshi.²⁹⁰ The Quad Foreign Ministers issued a Joint Statement and Fact Sheet announcing the launch of the Quad Critical Minerals Initiative which aims to secure and diversify reliable supply chains for critical minerals, including through electronic waste recovery and re-processing, while coordinating with private sector partners to facilitate investment.²⁹¹

On 4 July 2025, Minister Reddy launched India's Copper Vision Document at the International Conference on Sustainable and Responsible Mining in Hyderabad.²⁹² The document focuses on India's future plans for the production and refinement of copper and outlines plans to increase smelting and refining capacity by five tonnes by 2030 and secure overseas mineral assets through partnerships.

On 6 July 2025, India adopted the Rio de Janeiro Declaration at the BRICS meeting which emphasized the need for equitable energy transition and just supply chains for critical minerals.²⁹³ This will serve as a foundation for the BRICS Energy Cooperation 2025-2030 roadmap to help catalyze cooperation towards concessional finance programs to bridge funding gaps for energy transition projects.

On 8 July 2025, the Ministry of New and Renewable Energies and Brazil's Ministry of Mines and Energy signed a memorandum of understanding to expand bilateral cooperation in renewable energy.²⁹⁴ The agreement outlines joint efforts in solar, wind, bioenergy, energy storage and low-emission hydrogen.

On 24 July 2025, Prime Minister Modi and UK Prime Minister Keir Starmer met and endorsed the new India-UK Vision 2035.²⁹⁵ It builds on the finalized Trade Deal to develop a transformative climate partnership by enhancing the India-UK Nuclear Cooperation Agreement to include small modular reactors, exchanging best practices and advancing joint work on renewables, energy storage and carbon capture.

On 29 July 2025, the Department of Promotion of Industry and Internal Trade under the Ministry of Commerce and Industry signed an MoU with Ather Energy, an Indian Electric Vehicle (EV) manufacturer to promote clean transportation.²⁹⁶ The partnership will enable infrastructure support in EV value chain, joint innovation programs and mentorship for startups, aligning with India's overall energy decarbonization efforts.

On 1 August 2025, the Ministry of Mines recognized seven Centres of Excellence (CoE) under the National Critical Mineral Missions.²⁹⁷ This will improve research and development for critical minerals, with each CoE operating as a consortium mandated to include a minimum of two industry partners and two academic partners.

On 12 August 2025, the Union Cabinet approved four new semiconductor projects in the states of Odisha, Punjab and Andhra Pradesh under the India Semiconductor Mission, with an expected INR46 billion investment.²⁹⁸ This approval will strengthen semiconductor supply chains, especially by enabling India's first commercial compound fab manufacturing and glass-based substrate semiconductor packaging unit.

On 3 September 2025, the Union Cabinet approved an INR1.5 billion incentive scheme to extract critical mineral from e-waste and battery waste.²⁹⁹ This step to develop capacity for critical mineral recycling from secondary sources will diversify supply chains by opening a new source and building domestic capacity.

On 19 September 2025, Oil India Limited and Hindustan Copper Limited signed a Memorandum of Understanding to collaborate on critical minerals extraction, including copper.³⁰⁰

India has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. India has taken strong action to advance the welfare target of reliable, diversified, sustainable and responsibly supply chains for energy transitions and critical minerals through partnerships for grid integration, MoUs for diversified supply chains, the National Critical Mineral Mission and two Coal Mine Development and Production Agreements. Additional measures include the launch of the Quad Critical Minerals Initiative, establishment of a new semiconductor manufacturing unit under the India Semiconductor Mission, the National Manufacturing Mission to boost clean tech manufacturing and the release of the Copper Vision Document to expand domestic refining capacity.

Indonesia: +1

Indonesia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 21 November 2024, the Indonesian Semiconductor Ecosystem Preparation Task Force and Arizona State University signed a Memorandum of Understanding (MoU) to develop a joint semiconductor workforce acceleration program and supply chain policy initiatives.³⁰¹ Minister for Economic Affairs Airlangga Hartarto noted that the MoU will help encourage the growth and resilience of semiconductor supply chains.

On 2 December 2024, Minister of Trade Budi Santoso and Canada's Minister of Export Promotion, International Trade and Economic Development Mary Ng jointly announced the conclusion of negotiations on a comprehensive economic partnership agreement and committed to signing it in 2025.³⁰² The agreement includes commitments to cooperate on critical minerals, with an emphasis on developing secure and resilient critical mineral supply and value chains.

On 3 December 2024, Minister of Energy and Mineral Resources Bahlil Lahadalia announced that Indonesia is accelerating its use of nuclear energy as part of its commitment to diversify energy.³⁰³ This action contributes to Indonesia's target of 23 per cent renewable energy by 2025 and ultimate goal to achieve a net zero energy sector.

On 20 December 2024, the Ministry of Energy and Mineral Resources unveiled regulations to support the development of Carbon Capture and Storage (CCS) technology.³⁰⁴ These regulations unlock various opportunities and incentives to enhance Indonesia's position as a regional hub for carbon storage.

On 3 January 2025, Minister Lahadalia announced that Indonesia's has modified its biofuel regulations to require diesel fuel to include 40 per cent palm oil-based biofuel instead of 35 per cent, as of 1 January 2025.³⁰⁵ This regulation aims to reduce foreign imports of diesel while supporting the net zero transition by reducing carbon emissions by 41.46 million tonnes per year.

On 12 February 2025, the Ministry of Energy and Mineral Resources announced cooperation with the Ministry of Energy and Natural Resources of Türkiye to accelerate clean energy development in Indonesia, including

the signing of a Memorandum of Understanding (MoU).³⁰⁶ This collaboration will bolster Indonesia's commitment to clean power generation.

On 18 February 2025, the Ministry of Energy and Mineral Resources announced the ratification of a new mineral law that aims to enhance energy security and supporting the mining sector.³⁰⁷ The law contains provisions to prioritize domestic coal needs and ensure appropriate mining governance.

On 18 February 2025, National Economic Council Chairman Luhut Panjaitan announced that Indonesia's sovereign wealth fund Danantara is in talks with the United Arab Emirates to establish a joint venture to develop 10 gigawatts of renewable energy.³⁰⁸ This venture will bolster Indonesia's commitment to the energy transition and sustainability.

On 17 April 2025, Indonesia and Saudi Arabia signed several MoUs aimed at increasing cooperation in the mining sector.³⁰⁹ The agreements will foster collaboration in areas including "mineral exploration, geological surveying, sustainable mining practices, mineral production and processing and the development of modern technologies for the mining and metallurgical industries."

On 6 April 2025, Minister Lahadalia announced that he has asked Indonesian company PT Perusahaan Listrik Negara to build a Geothermal Power Plant in Maluku.³¹⁰ The plant is expected to have a 40 megawatts capacity, supporting clean energy and access to energy for the country.

On 26 May 2025, Minister Lahadalia announced the 2025-2034 Electricity Supply Business Plan for PT Perusahaan Listrik Negara.³¹¹ The plan, aligned with the National Energy Policy and National Electricity General Plan, aims to build 42.6 gigawatts (GW) of new renewable energy generation capacity and 10.3GW of further energy storage capacity by 2034. Planned projects include large-scale solar, wind, geothermal, hydro, bioenergy and two small nuclear reactors, prioritizing electrification in underdeveloped villages in particularly remote areas.

On 28 May 2025, Hydrogène de France Energy signed a MoU with Perusahaan Listrik Negara and PT Sarana Multi Infrastruktur, Indonesia's state-owned electricity operator and infrastructure financing company, respectively.³¹² The agreement aims to help identify needed financing mechanisms to support 23 green

hydrogen power plant projects being developed by Hydrogène de France in Indonesia, representing a total investment of EUR2.3 billion.

On 28 May 2025, Danantara Indonesia and the Indonesia Investment Authority, two Indonesian sovereign wealth funds, signed a MoU with Eramet, a French mining company, regarding the management and processing of nickel for electric vehicle batteries.³¹³ This action strengthens Indonesia's commitment to critical mineral supply chains.

On 13 June 2025, Minister Lahadalia and Singapore's Minister of Manpower Tan See Leng signed three MoUs on Cross-Border Electricity Trade, Carbon Capture and Storage and the development of a Sustainable Industrial Zone.³¹⁴ The agreements commit both countries to enabling clean electricity flows, advancing cross-border carbon capture and storage projects and fostering renewable energy-linked industrial development.

On 30 June 2025, Indonesian government-owned PT Aneka Tambang and the Indonesia Battery Corporation announced the beginning of construction on a USD6 billion battery complex in West Java with CATL, a Chinese battery manufacturer.³¹⁵ The complex full support the full battery value chain, including mineral mining, processing battery production and recycling, yielding an initial annual production capacity of 6.9GW hours.

On 30 June 2025, Indonesia's Ministry of Finance and Germany's KfW Development Bank announced the signing of EUR200 million loan agreement to bolster Indonesia's Affordable and Sustainable Energy Transition Program (ASET).³¹⁶ These funds aim to ensure energy security and will help Indonesia achieve ASET's two pillars: the improvement of policy and regulatory frameworks for a clean energy transition and the strengthening of the financial sustainability and governance of the energy sector.

On 2 July 2025, Indonesia and Saudi Arabia agreed to enhance cooperation in developing and sustaining energy supply chains, developing renewable energy and energy storage and developing carbon capture and storage technologies.³¹⁷ The agreement entails encouraging collaborative research, technology transfer, encouraging private sector joint ventures and expertise exchange in the aforementioned areas.

On 15 August 2025, Indonesia's President Prabowo Subianto announced IDR402.4 million in financial support for energy security, as part of Indonesia's 2026 state budget.³¹⁸ The financial support includes new electricity provision for villages, new renewable energy development, as well as subsidies and tax incentives for energy.

On 4 September 2025, PT Pertamina, an Indonesian state-owned energy company, and the HyET Group, a Dutch renewable energy technology company, signed a Memorandum of Understanding to explore technologies in green hydrogen.³¹⁹ The companies will develop technologies that convert geothermal energy into green hydrogen, bolster Indonesia's photovoltaic manufacturing capacities and increase reliable energy access for Indonesia's outer islands.

On 9 September 2025, PT Pertamina announced the beginning of the construction of the Ulubelu Green Hydrogen Pilot Plant.³²⁰ The plant is the first in the world to combine anion exchange membrane electrolyzer technology with geothermal energy.

On 23 September 2025, Indonesia and the European Union agreed to a Comprehensive Economic Partnership Agreement (CEPA), including provisions related to clean energy.³²¹ The CEPA eliminates tariff and non-tariff barriers for clean energy technologies and infrastructures between the two members.

On 24 September 2025, President Subianto and Canadian Prime Minister Mark Carney announced the signing of the Indonesia-Canada Comprehensive Economic Partnership Agreement, strengthening trade ties in the critical minerals and renewable energy sectors.³²² The agreement also included the signing of an MoU between Export Development Canada and the Indonesia Investment Authority, Indonesia's sovereign wealth fund to explore strategic investments in clean energy technologies.

Indonesia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Through investments in renewable energy sources, Indonesia has taken steps to support reliable, diversified, sustainable and responsible supply chains for energy transitions. It has taken action to strengthen supply chains for energy transition technologies through regulatory reform, critical minerals and materials beneficiated at source via its agreement with Canada and semiconductors through its partnership with Arizona State University. Additional actions, including the Electricity Supply Business Plan and three agreements with Singapore on clean energy and industrial decarbonisation, further demonstrate its commitment to building a resilient, low-carbon energy future.

Thus, Indonesia receives a score of +1.

On 26 November 2024, the Ministry of the Environment and Energy Security presented the National Hydrogen Strategy which focuses on low-carbon hydrogen and decarbonization.³²³ The strategy focuses on achieving net zero by 2050 through a transition towards renewable energy, development of Carbon Capture Storage, biofuel, biomethane, hydrogen and potentially nuclear.

On 13 December 2024, Prime Minister Giorgia Meloni chaired the closing meeting of the Italian G7 Presidency.³²⁴ During the meeting, she reiterated Italy's commitment to green energy development through the Energy for Growth in Africa initiative. The program supports the implementation of infrastructure for the production and distribution of renewable energy, contributing to the expansion of energy transition technologies.

On 31 December 2024, the Ministry of the Environment and Energy Security opened a call for research, development and technological innovation project proposals aimed at supporting the supply chain for critical and strategic raw minerals.³²⁵ Selected projects will receive a total of EUR21 million in funding to support the transition to clean technologies.

On 1 January 2025, Minister of Environment and Energy Security Gilberto Pichetto Fratin attended the Future Minerals Forum in Riyadh.³²⁶ He underscored Italy's priority of establishing secure and sustainable access to critical raw materials. His remarks focused on international cooperation and domestic policy to ensure responsible development of critical minerals and materials, especially for clean energy supply chains.

On 14 January 2025, Minister Pichetto and Minister of Energy of Saudi Arabia, Abdulaziz Bin Salman Al-Saud signed a Memorandum of Understanding for energy.³²⁷ The countries will collaborate to advance the energy transition and energy security through the advancement of renewable energy, decreasing methane emissions, carbon capture and storage and supporting supply chain projects in developing countries.

On 15 January 2025, Prime Minister Meloni visited Abu Dhabi and participated in the signing of a trilateral agreement between Italy, the United Arab Emirates and Albania for the development and export of renewable electricity from Albania to Italy.³²⁸ The agreement involves the construction of an undersea power cable, contributing to regional integration and strengthening Italy's infrastructure for clean energy.

On 21 January 2025, Italy, Germany, Austria, Algeria and Tunisia signed a Joint Declaration of Intent to develop the Southern Hydrogen Corridor.³²⁹ This initiative aims to establish a 3,500-4,000-kilometre pipeline

transporting renewable hydrogen from North Africa to Europe and is expected to deliver up to 163 terawatt-hours of hydrogen annually to Europe.

On 27 January 2025, Prime Minister Meloni conducted an official visit to Saudi Arabia, where she met with government officials to strengthen bilateral cooperation on clean energy technologies.³³⁰ Discussions focused on the development and deployment of renewable energy systems, in line with Italy's broader strategy of enhancing energy transition partnerships.

On 21 February 2025, the Ministry of the Environment and Energy Security announced EUR38 million in funding for innovative renewable energy projects in Italy.³³¹ These include projects that combine energy plants with carbon storage facilities and projects that encourage "self-consumption of energy."

On 24 February 2025, Minister Pichetto signed two strategic agreements with the United Arab Emirates.³³² The first agreement supports bilateral cooperation on hydrogen, decarbonization and renewable energy. The second outlines collaboration in the field of critical minerals, with a focus on ethical extraction and sustainable development, reinforcing responsible supply chains for energy transitions.

On 13 March 2025, the Ministry of the Environment and Energy Security announced that it will provide EUR232 million for energy sustainability in Italian cities beginning on 8 April 2025.³³³ This will support projects to advance renewable energy, reduce consumption and finance "photovoltaic and solar thermal systems, heat pumps, relamping systems, high-efficiency fixtures and hybrid solutions."

On 28 March 2025, Italy and Kenya signed a Memorandum of Understanding focused on energy transition projects, specifically hydrogen and biofuels.³³⁴

On 7 April 2025, the Ministry of Environment and Energy Security and Research on the Energy System announced a call for project proposals aimed at technological innovation for renewable energy and clean hydrogen.³³⁵ Selected projects will receive a total of EUR200 million for "non-programmable renewable sources, flexibility and energy storage, data and digitalization of networks, electrolyzers and networks, biohydrogen and biofuels."

On 27 May 2025, Prime Minister Meloni announced that Italy will strengthen supply chains for critical raw materials, semiconductors and energy transition technologies.³³⁶ She confirmed a EUR3 billion Silicon Box

semiconductor plant, a EUR40 billion United Arab Emirates investment targeting critical raw materials and energy projects and initiatives in renewables and nuclear power.

On 29 May 2025, Italy and Uzbekistan signed a EUR100 million agreement to support Uzbekistan's green transition.³³⁷ Italy will financially support the decarbonization of Uzbekistan's energy sector as well as environmental sustainability across sectors.

On 10 June 2025, Cassa Depositi e Prestiti, Italy's development bank, issued a EUR500 million Green Bond.³³⁸ The proceeds will be invested in sustainability, renewable energy and infrastructure projects.

On 17 June 2025, the G7, including Italy, launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit.³³⁹ It supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 20 June 2025, Cassa Depositi e Prestiti signed a EUR250 million loan agreement with the Africa Finance Corporation to support sustainable infrastructure projects in Africa.³⁴⁰ The loan supports renewable energy, supply chain projects and continued support for the Lobito Railway Corridor.

On 15 July 2025, Italy advanced cooperation with Austria to strengthen energy transition technology supply chains.³⁴¹ Prime Minister Meloni highlighted joint plans for the SouthH2 Corridor to produce and transport green hydrogen from North Africa to Europe via Italy, Austria and Germany.

On 5 August 2025, Minister Pichetto decreed EUR900 million for Conto Termico 3.0 an energy efficiency incentive scheme for individual and public administration buildings.³⁴² The funds are to be invested in electric heat pumps, solar collectors, "solar photovoltaic systems with storage systems," electric vehicle charging stations and more.

On 8 August 2025, the Ministry of the Environment and Energy Security announced a new EUR597 million incentive programs to support individuals and businesses electric vehicle purchases.³⁴³ Individuals will be provided a direct discount of up to EUR11 thousand and microbusinesses up to EUR20 thousand.

On 9 September 2025, Minister of Enterprise and Made in Italy Adolfo Urso and Minister of Geology and Mineral Resources of Uzbekistan Babir Islamov held a bilateral meeting to discuss areas of cooperation.³⁴⁴ The focus of the meeting was on cooperation in diversifying critical raw materials supply chains and the energy transition.

On 11 September 2025, Minister Urso met with United Arab Emirates Special Envoy for Business and Philanthropy Badr Jafar to discuss cooperation in Artificial intelligence, automation and manufacturing.³⁴⁵

On 23 September 2025, Minister Urso announced over EUR100 million to transform former industrial plants into manufacturing hubs for photovoltaic components and solar panels.³⁴⁶ The initiative will result in jobs and a local solar supply chain.

Italy has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. It has taken strong action towards the combined welfare target and supported supply chains for energy transitions and critical minerals through a Memorandum of Understanding with the United Arab Emirates, Kenya and Albania, participation in the Southern Hydrogen Corridor, funding for critical and strategic minerals and clean energy projects and funding for energy sustainability. Additionally, Italy has created incentive structures to promote transition technologies.

Thus, Italy receives a score of +1.

Analyst: Michelle Kim

Japan: +1

Japan has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 4 December 2024, the Ministry of Economy, Trade and Industry (METI) hosted the sixth RD20, an initiative under Japan's leadership that promotes international collaboration on research and development for carbon neutrality among G20 countries and regions.³⁴⁷ The event brought together heads of leading research

institutions and focused on enhancing low-carbon energy systems, with particular attention to cooperation on hydrogen, carbon capture and solar technologies.

On 24 December 2024, Japan and the United States agreed to strengthen cooperation in the development and deployment of advanced clean energy technologies.³⁴⁸ This includes floating offshore wind, clean hydrogen and derivatives such as ammonia and synthetic fuels, carbon capture and recycling and small modular reactors. Japan also committed to collaborate on resilient mineral supply chains and methane emission reductions in the Indo-Pacific. Japan and the United States also co-hosted a session involving private sector representatives to boost public-private collaboration in the energy transition. Participants exchanged views on emerging clean energy markets, including synthetic methane and hydrogen, to meet the growing demand for clean electricity in the digital age.

On 27 December 2024, the Ministry of Finance released the approved a Draft Budget for fiscal year 2025, announcing JPY100 billion for mass semiconductor production and JPY31.8 billion for semiconductor design.³⁴⁹

On 22 January 2025, METI, the Ministry of Internal Affairs and Communications and the Digital Agency of Japan held an online meeting with the United Kingdom to discuss cooperation in digital technology.³⁵⁰ The meeting reviewed progress under the Japan-UK Digital Partnership, focusing on areas such as Beyond 5G/6G research, semiconductor supply chain resilience and the promotion of Data Free Flow with Trust.

On 27 January 2025, Prime Minister Shigeru Ishiba announced new domestic financing to support the green transformation.³⁵¹ This includes a supplementary budget allocating over JPY900 billion to enhance productivity and wage growth and a bill aimed at creating a carbon pricing framework to attract more than JPY150 trillion in green investment.

On 18 February 2025, Japan's Cabinet approved the Seventh Strategic Energy Plan.³⁵² The plan includes policy to increase renewable energy supply, grid development, support for hydrogen supply chains and diversification of critical minerals by advancing "marine mineral resources."

On 19 February 2025, Minister of Economy, Trade and Industry Ogushi Masaki met with German Parliamentary State Secretary Stefan Wenzel to exchange views on Japan-Germany energy cooperation.³⁵³ The discussion addressed the strengthening of the supply chain for clean energy technologies, renewable energy collaboration and decarbonization of the liquified natural gas value chain.

On 21 February 2025, METI designated a sea area offshore Tomakomai, Hokkaido for exploratory drilling under Japan's Act on Carbon Dioxide Storage Business.³⁵⁴ This designation builds on the region's previous

success, where approximately 300,000 tons of carbon dioxide were injected as part of Japan's first large-scale CCS demonstration project.

On 25 February 2025, METI released updates on the implementation of the Pro-Growth Carbon Pricing Concept under the Act on the Promoting Transition to the Decarbonized Growth Economic Structure.³⁵⁵ These updates aim to balance economic growth with emissions reduction by building a circular economy and introducing carbon pricing mechanisms.

On 27 February 2025, Deputy Director General Urata Hideyuki of the Manufacturing Industries Bureau at the Ministry of Economy, Trade and Industry and Director General Yoon-Change-Hyun from Korea's Ministry of Trade, Industry and Energy held the first Japan-Republic of Korea High-Level Dialogue on critical minerals.³⁵⁶ Japan committed to policy coordination on critical minerals production and stockpiling through multilateral frameworks like the Minerals Security Partnership.

On 7 March 2025, the Cabinet approved a bill to amend the Act on Promoting the Utilization of Sea Areas for the Development of Marine Renewable Energy Power Generation Facilities.³⁵⁷ The amendment aims to allow the installation of marine renewable energy facilities in Japan's Exclusive Economic Zones and to strengthen environmental research efforts, contributing to Japan's 2050 carbon neutrality goal.

On 10 March 2025, the Japan Bank for International Cooperation signed a GBP283 million loan agreement with Seagreen to connect offshore wind energy production to the UK National Grid, supporting energy transition technologies and a reliable energy supply.³⁵⁸

On 17 March 2025, the Japan Organization for Metals and Energy Security and Iwatani Corporation announced EUR100 million in joint financing for Caremag SAS's rare earth refining plant in France.³⁵⁹ This funding will support the development of the plant which aims to minimize carbon emissions through the use of recycled materials, reduce water usage, diversify rare earth sources and strengthen rare earth supply chains. Caremag has also agreed to provide 50 per cent of its rare earth products to the Japan Organization and Iwatani Corporation, on a long-term basis.

On 21 March 2025, METI announced updated electricity purchase prices under the Act on Special Measures Concerning Procurement of Electricity from Renewable Energy Sources.³⁶⁰ The pricing adjustments are based on supply efficiency and profitability, promoting the expansion of renewable energy use through market mechanisms.

On 26 March 2025, the Japan Bank for International Cooperation signed a USD95 million loan agreement with Banco Nacional de Desenvolvimento Econômico e Social, Brazil's development bank.³⁶¹ This loan invests in expanding Brazil's electricity transmission and diversifies the energy supply with biofuel projects.

On 28 March 2025, Minister of Economy, Trade and Industry Muto Yoji met with Governor of Alaska Mike Dunleavy to discuss Japanese investment in energy projects in Alaska.³⁶² The meeting underscored Japan's strategic involvement in global energy initiatives and support Alaskan energy projects.

On 1 April 2025, the Japan Bank for International Cooperation signed a USD466 million loan agreement with Corporación Nacional del Cobre de Chile, Chile's mining company, to secure a stable supply of copper concentrates.³⁶³ This will support a reliable and diverse supply chain for critical minerals beneficiated at the source.

On 18 April 2025, the Agency for Natural Resources and Energy announced a series of initiatives promoting the use of condensing water heaters and similar systems in the residential sector as part of a broader effort to meet new energy efficiency standards.³⁶⁴ These efforts include cooperation between manufacturers, national government, and businesses to promote energy conservation infrastructure.

On 28 April 2025, METI participated in the Summit on the Future of Energy Security, co-hosted by the International Energy Agency and the United Kingdom.³⁶⁵ Discussions addressed the resilience of clean energy supply chains and securing access to critical minerals, reaffirming Japan's engagement in global cooperation for energy transition resilience.

On 29 April 2025, METI signed a Memorandum of Cooperation with the Ministry of Industry and Trade of Vietnam on clean energy transitions.³⁶⁶ The agreement reaffirmed both parties' commitment to the Asia Zero Emission Community principles and aimed to promote investment and technology exchange to support decarbonization pathways.

On 11 May 2025, Japan and the European Union held the third Digital Partnership Council to reinforce Japan and the EU's cooperation in technology.³⁶⁷ Both members agreed to collaborate on semiconductor, artificial intelligence and 5G/6G research. This will support both members diversification of responsible semiconductor supply chains.

On 12 May 2025, Ambassador of Japan to the Democratic Republic of the Congo Hidetoshi Ogawa and the Democratic Republic of Congo's Minister for Foreign Affairs, International Cooperation and Francophonie Thérèse Kayikwamba Wagner signed and exchanged notes on increasing Japanese aid for a project to improve

electricity access in the Mon Amba District of Kinshasa City.³⁶⁸ JPY3.898 billion in aid will fund the renovation of a Mon Amba substation.

On 16 May 2025, Permanent Representative to the United Nations Atsuyuki Oike signed a partnership agreement for a critical minerals initiative with UN Trade and Development Secretary-General Rebeca Grynspan.³⁶⁹ USD680,000 in funding will support Namibia, Zambia and Madagascar's economic diversification of critical mineral supply chains.³⁷⁰

On 19 May 2025, the Ministry of the Environment and the Ministry of Economy, Trade and Industry co-hosted the first Asia Zero Emission Community (AZEC) International Conference to Developing Carbon Markets.³⁷¹ The dialogue focused on supply chain emissions transparency and policy approaches to high-integrity carbon markets among AZEC partners.

On 10 June 2025, Minister of Economy, Trade and Industry Koga Yuichiro attending the signing ceremony for Memorandums of Understanding between private companies including GE Veronova, Eurus Energy and Mitsubishi Electric to expand renewable energy infrastructure and semiconductor-based electrification.³⁷² The Ministry and GE Veronova also launched a focus group to promote innovation in hydrogen, nuclear and carbon capture and storage technologies.

On 16 June 2025, Ambassador of Japan to Sierra Leone Hiroshi Yoshimoto and Sierra Leone's Minister of Foreign Affairs and International Cooperation Timothy Musa Kabba signed and exchanged notes to increase Japanese aid for an "Electricity Distribution Network Expansion Project along the Freetown Peninsula."³⁷³ Over JPY2 billion in aid will fund the construction of a new substation, transmission lines and electricity grid infrastructure.

On 17 June 2025, the G7, including Japan, launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit.³⁷⁴ It supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 19 June 2025, Senior Deputy Minister of Education, Culture, Sports, Science and Technology Hiroshi Masuko and the United Kingdom's Minister for Climate Kerry McCarthy signed a Memorandum of Understanding for a partnership in fusion energy.³⁷⁵

On 1 July 2025, Minister for Foreign Affairs Iwata Takeshi attended the Japan-Australia-India-US (Quad) Foreign Ministers' Meeting in Washington D.C. along with United States Secretary of State Marco Rubio, Australian Minister for Foreign Affairs Penny Wong and Indian Minister of External Affairs Subrahmanyam.³⁷⁶ The Quad Foreign Ministers issued a Joint Statement and Fact Sheet announcing the launch of the Quad Critical Minerals Initiative which aims to secure and diversify reliable supply chains for critical minerals, including through electronic waste recovery and re-processing, while coordinating with private sector partners to facilitate investment.³⁷⁷

On 2 July 2025, METI co-hosted the Conference on battery and Critical Minerals Ecosystem in New Delhi, aiming to strengthen and diversify battery and critical mineral supply chains.³⁷⁸ The event focused on promoting collaboration between Japanese and Indian companies in establishing an ecosystem for battery-related industries.

On 11 July 2025, the Japan Bank for International Cooperation (JBIC) signed a USD46 million loan agreement with MGC Pure Chemicals America, Inc. (MPCA).³⁷⁹ The loan will support increased MPCA's production of "ultra-pure hydrogen peroxide and ultra-pure aqueous ammonia," two chemicals critical for the semiconductor supply chain.

On 15 July 2025, JBIC made an equity investment in TeraWatt Technology to support expansion and manufacturing of its "next-generation batteries."³⁸⁰ These batteries are a critical component of electric vehicles, energy storage and drone technology.

On 22 July 2025, the Japan Organization for Metals and Energy Security (JOGMEC) and Sumitomo Corporation announced that their joint entity, Japan Fluorite Corporation, will invest AUD11 million to partially cover Fluorite SPV's exploration and operation expenses.³⁸¹ Fluorite SPV is expected to produce over 100,000 "tons of chemical grade fluorite concentrate annually," which is an essential mineral for the semiconductor supply chain.

On 4 August 2025, JOGMEC and Sojitz Corporation announced a joint equity investment for research and development of gallium production, a key critical mineral, in Western Australia.³⁸² This equity investment will

include feasibility studies with Alcoa of Australia Limited which operates alumina refineries that create gallium from the alumina refinement processes. This project is aimed at providing Japan and Australia with a reliable and sustainable supply of gallium for transition technologies and semiconductors supply chains.

On 6 August 2025, Ambassador of Japan to Angola Hiroaki Sano and Angola's Minister of External Relations Tête António signed and exchanged notes about an Official Development Assistance loan.³⁸³ The Japanese loan of JPY39.105 billion will support the "Power Transmission System Reinforcement Project in the Southern Region," expanding hydroelectricity generation for Southern Angola.

On 20 August 2025, JOGMEC and Democratic Republic of the Congo's Gecamines renewed a Memorandum of Understanding to support continued collaboration and partnership in the mining sector.³⁸⁴

On 22 August 2025, Minister of Economy, Trade and Industry Yoji Muto and South Africa's Minister of Trade, Industry and Competition Parks Tau, Minister of Electricity and Energy Kgosisentsho Ramokgopa and Minister of Science, Technology and Innovation Blade Nzimande signed a joint declaration to promote decarbonization and cooperation.³⁸⁵

On 22 August 2025, South Africa, the African Union, Japan and African Union member-states released the TICAD 9 Yokohama Declaration to "[c]o-create innovative solutions with Africa."³⁸⁶ The declaration includes a statement on cooperation for enhancing artificial intelligence governance and projects. It highlights the importance of continued collaboration between Japan and Africa in energy transition technologies and clean energy projects.

On 26 August 2025, Japan and Canada held the second meeting of the dialogue on battery Supply Chains in Tokyo under their 2023 Memorandum of Cooperation.³⁸⁷ Officials from Japan's Ministry of Economy, Trade and Industry and Canada's Department of Natural Resources agreed to advance collaboration through policy exchange, trade and investment promotion and joint research. The initiative aims to continue collaborating with research institutions and industry to advance sustainable and reliable global battery supply chains.

On 24 September 2025, JOGMEC and FPX Nickel Corp. launched a joint nickel exploration at the Awarwa mine in Newfoundland and Labrador, Canada.³⁸⁸

Japan has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Japan has taken several important steps toward fulfilling its G20 commitment, including passing legislation to promote marine renewable energy, advancing green growth through carbon pricing initiatives and strengthening bilateral and multilateral cooperation on clean energy transitions. It has also participated in global dialogues to enhance supply chain resilience, signed multiple agreements to expand

renewable energy infrastructure and semiconductor-based electrification, and launched new initiatives to diversify critical mineral supply chains, including through the Quad Critical Minerals Initiative and a UN partnership to support economic diversification in Africa. Japan has also updated its renewable energy procurement policies, promoted high-integrity carbon markets and taken strong action to support supply chains for rare earth elements through its funding for Caremag. Finally, through international loans and the Japan Bank for International Cooperation, Japan has funded projects to support reliable, sustainable and responsible energy supply chains worldwide.

Thus, Japan receives a score of +1.

Analyst: Maham Khokhar

Korea: +1

Korea has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 27 November 2024, the Ministry of Trade, Industry and Energy announced plans to provide KRW14 trillion in low-interest loans throughout 2024 to support the semiconductor industry.³⁸⁹ This initiative aims to enhance competitiveness and includes KRW1.8 trillion allocated for developing power transmission infrastructure for new chip complexes in Yongin and Pyeongtaek.

On 27 November 2024, the Ministry of Economy and Finance announced the establishment of a KRW1.4 trillion policy fund for 2025 to support the semiconductor sector.³⁹⁰ This initiative is designed to alleviate corporate burdens related to infrastructure in semiconductor clusters by expanding tax breaks for private research and development and facility investments.

On 17 December 2024, Korea announced the allocation of KRW2.7 trillion in 2025 to develop technologies for adapting to climate change over the next decade.³⁹¹ This investment aims to enhance the country's resilience to climate-related challenges.

On 20 December 2024, Korea and Australia signed a new Green Economy Partnership Arrangement on Climate and Energy.³⁹² The partnership agreement includes cooperation on renewable hydrogen, critical minerals and green metals projects. This supports both members' commitments to diversified energy transition technologies and supply chains.

On 1 January 2025, Minister of Environment Kim Wansup announced that an increased budget of KRW196.3 billion will be invested to install more than 64 hydrogen charging stations, with a target of over 450 cumulative stations.³⁹³ This initiative supports the adoption of hydrogen vehicles and the development of related infrastructure.

On 17 February 2025, the Ministry of Trade, Industry and Energy held the second Korea-Czech Republic Supply Chain and Energy Dialogue to enhance cooperation on sustainably operating the sources for minerals

essential for semiconductors.³⁹⁴ The meeting focused on deepening bilateral cooperation in nuclear energy and critical mineral supply chain resilience.

On 18 February 2025, Korea held the inaugural Core Mineral Investment Council meeting between private companies and the government.³⁹⁵ The council will use KRW50 billion Supply Chain Stabilization Fund to fund mineral projects.

On 21 February 2025, Korea outlined a new energy mix plan for 2038, which includes constructing two large nuclear power plants and one small modular reactor.³⁹⁶ The country aims to increase its nuclear power generation and boost renewable energy, targeting an average of seven gigawatts annually until 2030. Overall, carbon-free power generation, including nuclear and renewables is expected to reach 70 per cent by 2038.

On 24 February 2025, the Ministry of Land, Infrastructure and Transport announced the increase of the hydrogen fuel subsidy for buses to KRW5000 per kilogram.³⁹⁷ This initiative encourages the adoption of fuel-cell vehicles in public transportation by lessening the cost gap between hydrogen buses and electric buses.

On 27 February 2025, Director General Yoon-Change-Hyun from the Ministry of Trade, Industry and Energy and Deputy Director General Urata Hideyuki of the Manufacturing Industries Bureau at Japan's Ministry of Economy, Trade and Industry held the First Japan-Republic of Korea High-Level Dialogue on critical minerals. Korea committed to policy coordination on critical minerals production and stockpiling through multilateral frameworks like the Minerals Security Partnership.

On 21 March 2025, Korea's Ambassador to Thailand Yong-min Park and Thailand's Minister of Higher Education, Science, Research, and Innovation Supamas Isarabhakdi signed the Korea-Thailand Nuclear Cooperation Agreement.³⁹⁸ The agreement includes cooperation on the development and construction of nuclear energy projects as well as sharing technology, equipment and training.

On 25 March 2025, the Ministry of Economy and Finance released the Guidelines for the 2026 Budget Proposal.³⁹⁹ The proposal outlines four key pillars for the 2026 budget, including pillar two "Enhancing Industrial Competitiveness" and pillar three "Building a Sustainable Future by Bolstering Economic and Social Fundamentals." The Ministry aims to invest in semiconductors, artificial intelligence, stable supply chains and developments in "carbon-free energy."

On 15 April 2025, Korea announced an expanded support package for its semiconductor industry, increasing total aid to KRW33 trillion, up from the previous KRW26 trillion.⁴⁰⁰ Financial assistance specifically for the chips sector will also increase to KRW20 trillion, from KRW17 trillion.

On 17 June 2025, the G7 launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit, welcoming Korea's endorsement of the plan.⁴⁰¹ The Action Plan supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by India and Australia.

On 12 August 2025, MOTIE signed an MoU with Vietnam's Ministry of Industry and Trade to promote cooperation in renewable energy.⁴⁰² The countries plan to cooperate renewable energy projects, nuclear power technical assistance for the beneficiation of critical minerals in Vietnam.

On 8 September 2025, Deputy Minister for Trade Jong-won Park met Saskatchewan's Minister of Trade and Export Development Warren Kaeding in Seoul.⁴⁰³ The parties discussed cooperation in the critical minerals and energy sectors.

On 17 September 2025, MOTIE hosted the Korea-South Africa Insight Forum in Yangjae-Dong.⁴⁰⁴ The participants discussed areas for cooperation including supply chain, energy, and critical minerals.

On 23 September 2025, Minister of Trade, Industry and Energy Jung-kwan Kim attended the 95th Saudi National Day celebration at the Saudi embassy in Seoul.⁴⁰⁵ Minister Kim pledged to increase cooperation in several areas including semiconductors.

Korea has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials benefited at source, semiconductors and technologies. It has taken strong action to support reliable, diversified, sustainable and responsible supply chains for energy transitions by providing subsidies, partnering with Peru in cooperation for the critical minerals sector and providing low-interest semiconductor loans. Regular allocation of funds to increasing capacity for clean energy and supporting domestic industries underscore Korea's alignment to their G20 commitments.

Thus, Korea receives a score of +1.

Mexico: +1

Mexico has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 6 January 2025, President Claudia Sheinbaum launched Olinia, a manufacturer of mini electric vehicles.⁴⁰⁶ The government is partnering with academic institutions and private companies to develop the technology and support regional manufacturers to develop affordable electric vehicles. The government will allocate MXN25 million to the National Polytechnic Institute and the National Institute of Technology of Mexico in 2025 for this initiative.

On 13 January 2025, President Sheinbaum announced “Plan Mexico” which entails USD277 billion in investment for various industries.⁴⁰⁷ In part, Plan Mexico is focused on developing a domestic semiconductor industry.⁴⁰⁸

On 23 February 2025, the Federal Electricity Commission and the National Institute of Indigenous Peoples announced an investment of MXN421 million for off-grid solar and grid extensions for Indigenous households.⁴⁰⁹

On 12 March 2025, the Secretariat of Energy announced the approval of Secondary Laws to consolidate the country’s energy sovereignty, restoring the public nature of Petróleos Mexicanos (PEMEX) and the Federal Electricity Commission as state-owned enterprises.⁴¹⁰ The approved legislation introduces the concept of energy justice, creates the National Energy Commission, and implements measures such as fuel traceability and a simplified tax regime for PEMEX to promote a reliable, sustainable, and socially equitable energy sector.

On 13 March 2025, Banco Nacional de Comercio Exterior (Bancomext) issued MXN16.5 billion in sustainability bonds to fund financing programs to support sustainability projects in vulnerable communities.⁴¹¹ These funds will be utilized for projects funded by Bancomext’s “Sustainable-Bond-Framework.” The framework includes investments in renewable energy generation, transmission and storage.⁴¹²

On 28 March 2025, Undersecretary for Planning and Energy Transition Jorge Islas announced that all future Mexican wind and solar plants will require battery storage up to 30 per cent of their original capacity.⁴¹³ This promotes energy transition technologies and storage.

On 3 April 2025, the Secretariat of Science, Humanities, Technology and Innovation established a group dedicated promoting the energy transition and energy sovereignty in Mexico.⁴¹⁴ The group highlighted the development of energy generation, transmission and storage as well as renewable energy systems to decrease energy poverty.

On 9 April 2025, Secretary Luz Elena Gonzales Escobar announced a MXN624 billion investment in the electric sector, of which MXN430 billion will be used to increase generation capacity.⁴¹⁵ This investment supports Mexico's plans for increasing access to electricity while contributing to the energy transition.

On 2 May 2025, Mexico's Secretariat of Science, Humanities, Technology and Innovation and the Government of Sonora signed a collaboration agreement to advance the country's semiconductor industry.⁴¹⁶ The agreement supports the federal "Kutsari" initiative, aiming to strengthen the semiconductor value chain and enhance Mexico's technological sovereignty.

On 9 June 2025, the Mexican Petroleum Institute and Zelandez Limited signed an agreement to collaborate on research and development of lithium industry in Mexico.⁴¹⁷ The two institutions will collaborate on research projects, technological development and specialized training.

On 25 June 2025, the Secretariat of Economy and various public and private sector partners attended the "Mexico-United States Semiconductor Collaboration Forum" in Phoenix, Arizona.⁴¹⁸ Attendees discussed bilateral cooperation between Mexico and the state of Arizona, focusing on strengthening semiconductor value chains in the region.

artificial intelligence in Mexico.⁴¹⁹ SECIHTI aims to boost innovation in Mexico by establishing mechanisms for knowledge transfer and capacity building.

On 6 August 2025, InnovaBienestar and the Ministry of Science, Humanities, Technology, and Innovation of the State of Puebla signed an agreement to support semiconductor supply chain development.⁴²⁰ This agreement will allow for the creation of a National Semiconductor Design center in Puebla as a part of the Kutsari project and improve local semiconductor supply chains.

On 19 August 2025, SECIHTI's InnovaBienestar de México and the State of Jalisco signed an agreement to develop technological and semiconductor leadership in Jalisco.⁴²¹ This includes participation in the National Artificial Intelligence Laboratory.

On 21 August 2025, the Ministry of Economy issued three orders for geological exploration in the states of Sonora, Sinaloa, Mexico and Durango to identify potential mineral deposits.⁴²² These actions are being done so Mexico has access to the necessary minerals for its local energy transition.

On 14 September 2025, National Commission for the Efficient use of Energy and National Institute of Electricity and Clean Energy signed an agreement committing to share information and collaborate on designing tools and methodologies for the energy transition.⁴²³

Mexico has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Mexico has supported the joint welfare target and supported supply chains for energy transition technologies and semiconductors through its support for mini electric vehicles, Plan Mexico's investment for the domestic semiconductor industry, collaboration with the Government of Sonora for semiconductors, investment for off-grid solar and grid extensions for Indigenous communities and major investment for the electric sector.

Thus, Mexico receives a score of +1.

Russia: +1

Russia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 25 November 2024, Russia announced new investments in clean energy initiatives aimed at improving energy efficiency and reducing environmental impact.⁴²⁴ These investments include the construction of a Green Cyber Farm.

On 26 November 2024, Prime Minister Mikhail Mishustin chaired a strategic session to discuss enhancing the energy efficiency of the national economy.⁴²⁵ This initiative includes efforts to modernize infrastructure, such as converting existing boiler stations to more efficient fuel types.

On 2 December 2024, Russia extended several benefits including decreased insurance premium rates to companies manufacturing semiconductor production equipment, including Computer Numerical Control machines and microcircuit development tools, supporting semiconductor supply chain security.⁴²⁶ These incentives aim to bolster semiconductor supply chain security, which indirectly contributes to the resilience of clean energy systems.

On 5 December 2024, Russia approved measures to enhance safety for nuclear technologies, line with International Atomic Energy Agency recommendations.⁴²⁷ This action is part of Russia's long-standing commitment to nuclear energy development. Additionally, Russia launched the Green Cyber Farm project which promotes sustainable agriculture through automated platforms powered by renewable energy. This project seeks to address environmental sustainability in agriculture, leveraging technological innovation to support green energy use in the farming sector.

On 12 December 2024, Russia held a strategic session to discuss increasing the energy and resource efficiency of the national economy.⁴²⁸ This session discussed ongoing efforts to modernize infrastructure, transition boiler stations to more efficient fuel sources and expand the use of alternative and renewable energy.

On 26 December 2024, the State Atomic Energy Corporation Rosatom announced the opening of a wind blade production facility.⁴²⁹ This facility will produce over 400 blades per year, with enough blades for over 100 wind turbines, which supports the creation of a local supply chain for wind energy technology.

On 31 January 2025, Deputy Minister of Energy Roman Marshavin and Ambassador of Kyrgyzstan to Russia Kubanychbek Bokontayev met to discuss energy sector cooperation.⁴³⁰ This included a focus on joint electric projects in Kyrgyzstan, oil and gas cooperation and the Central Asian Coordinating Electric Power Council.

On 5 March 2025, President Putin and Prime Minister of Myanmar Min Aung Hlaing signed a cooperation agreement for the construction of a small modular nuclear reactor in Myanmar.⁴³¹ The parties agreed to a project generating 110 megawatts with the option to increase production in the future.

On 16 March 2025, First Deputy Prime Minister Denis Manturov attended joint talks with Qatar on trade and industrial cooperations.⁴³² The parties discussed industrial cooperation in the renewable energy sector.

On 17 March 2025, the Ministry of Natural Resources and Environment announced plans to significantly boost lithium production in Russia.⁴³³

On 31 March 2025, Special Envoy and Head of the Russian Direct Investment Fund Kirill Dmitriev announced that Russia and the United States had begun discussions on joint projects to develop rare-earth metal reserves in Russia.⁴³⁴ Special Envoy Dmitriev noted growing interest from companies in cooperating on rare earth projects.

On 17 April 2025, the Ministry of Energy allocated RUB3.1 million to update Rostov Region's power grid to ensure a reliable energy supply for residents.⁴³⁵ This includes plans to modernize the electric grid, create a mobile reserve for energy generation and implement new technologies.

On 25 April 2025, the State Research and Design Institute of the Rare Metal Industry and the National University of Science and Technology MISIS signed separate Joint Declarations of Intent with India's Council of Scientific and Industrial Research's Institute of Minerals and Materials Technology.⁴³⁶ Both agreements are focus on collaboration for critical mineral technologies.

On 9 May 2025, President Putin met with Brazilian President Lula da Silva in Moscow.⁴³⁷ The two discussed expanding cooperation in nuclear energy and in the critical minerals sector.⁴³⁸

On 14 May 2025, the Ministry of Energy announced that a modernized hydroelectric unit has begun operation at the Krasnoyarsk hydroelectric plant.⁴³⁹ This unit has a capacity of 500 megawatts which will increase the plant's annual electricity generation by 5 per cent.

On 16 May 2025, Deputy Prime Minister Alexei Overchuk participated in the first Russia-Afghanistan business forum.⁴⁴⁰ Government officials and business representatives from both countries discussed joint projects in several areas including energy and mineral extraction.

On 18 June 2025, Minister of Energy Sergey Tsivilev attended a ceremony for the agreement of the production of autonomous hybrid energy complexes in Yakutia.⁴⁴¹ Minister Tsivilev emphasized the importance of maintaining the supply of energy to remote and isolated areas.

On 24 June 2025, Director General of Rosatom Alexey Likhachev and Mali Minister of Energy and Water Resources Boubacar Diané signed an agreement on the cooperation “in the peaceful use of atomic energy.”⁴⁴² The agreement underlines the development of nuclear energy sector within Mali and responsible nuclear regulation.

On 11 July 2025, the Ministry of Industry and Trade organized a roundtable with private sector representatives to discuss mining opportunities in Saudi Arabia.⁴⁴³ Saudi representatives discussed opportunities for mineral production in Saudi Arabia.

On 30 July 2025, Rosseti began construction on an electricity transmission line that will connect the Vostochny Cosmodrome to a reliable energy supply.⁴⁴⁴

On 26 September 2025, Deputy Prime Minister Alexander Novak and China's Vice Premier Ding Xuexiang led the 22nd China-Russia Energy Cooperation Committee Meeting.⁴⁴⁵ Both members agreed to deepen energy cooperation and partner on energy projects. The Vice Premier highlighted “renewable energy, hydrogen energy and energy storage” as key areas for further cooperation.

Russia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Russia has taken strong action towards the combined welfare target and supported supply chains for energy transitions and semiconductors through financial incentives for

semiconductor manufacturers, funding to update Rostov Region's power grid, a new hydroelectric unit and investments for clean energy initiatives.

Thus, Russia has received a score of +1.

Analyst: Maham Khokhar

Saudi Arabia: +1

Saudi Arabia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials benefited at source, semiconductors and technologies.

On 26 November 2024, Saudi Arabia signed investment agreements worth over USD9 billion to develop extraction and processing facilities for metals and rare earth elements.⁴⁴⁶

On 3 December 2024, Saudi Arabia hosted the fourth Saudi Green Initiative Forum and announced USD60 million in new funding for climate and environmental initiatives.⁴⁴⁷ This funding will support renewable energy projects, protection of natural ecosystems and reducing desertification.

On 9 January 2025, the National Semiconductor Hub and National Technology Development Program formed a partnership with Kneron, an artificial intelligence (AI) semiconductor solutions company.⁴⁴⁸ Kneron will establish a Riyadh subsidiary that will support Saudi Arabia's semiconductor ecosystem.

On 14 January 2025, Minister of Industry and Mineral Resources Bandar Alkhorayef and Vice Minister of Industry and Mineral Resources for Mining Affairs Khalid Al-Mudaifer signed several Memorandums of Understanding with representatives from Djibouti, Jordan, the United Kingdom, Austria and Zambia, respectively, to cooperate for mineral resources development, as well as declaration of intent with France for the mineral resources sector.⁴⁴⁹ These partnerships, formalized at the Future Minerals Forum, will support the diversification of Saudi Arabia's critical minerals supply chains.

On 4 February 2025, Minister of Industry and Mineral Resources Bandar Ibrahim Alkhorayef and India's Minister of Coal and Mines Kishan Reddy met in New Delhi to discuss cooperation for critical minerals.⁴⁵⁰ The ministers discussed the need for reliable critical minerals supply chains and discussed potential cooperation for critical minerals to support the energy transition.

On 5 February 2025, the Ministry of Investment selected EdgeCortex, a semiconductor company, to join the NSH program.⁴⁵¹ As part of this partnership, EdgeCortex will establish a local subsidiary to drive advanced semiconductor engineering and edge AI development.

On 10 February 2025, Saudi Arabia committed USD1.5 billion to AI chip startup Groq to expand the delivery of its advanced AI chips to the country.⁴⁵² This funding will support the development of reliable semiconductors supply chains.

On 14 February 2025, Saudi Arabia signed Memorandum of Understanding for mineral resource development with Djibouti, Jordan, the United Kingdom, Zambia, Austria and France.⁴⁵³ This collaboration will help the diversification of Saudi Arabia's critical minerals supply chains.

On 16 February 2025, Saudi Arabia launched the Mining Innovation Studio to drive advancements in mineral exploration and processing.⁴⁵⁴ The initiative, supported by key government and private sector stakeholders, focuses on accelerating technology adoption, enhancing efficiency and fostering sustainable practices in the mining sector.

On 17 April 2025, Saudi Arabia and Indonesia signed a series of memoranda of understanding aimed at increasing cooperation in the mining sector. The agreements will foster collaboration in areas including "mineral exploration, geological surveying, sustainable mining practices, mineral production and processing and the development of modern technologies for the mining and metallurgical industries."⁴⁵⁵

On 29 June 2025, Minister of Energy Abdulaziz bin Salman bin Abdulaziz signed a Memorandum of Understanding with the United Nations Environment Programme.⁴⁵⁶ The memorandum aims to promote transition technologies and cooperation on lowering carbon emissions.

On 2 July 2025, Saudi Arabia and Indonesia agreed to enhance cooperation in developing and sustaining energy supply chains, developing renewable energy and energy storage and developing carbon capture and storage technologies.⁴⁵⁷ The agreement entails encouraging collaborative research, technology transfer, encouraging private sector joint ventures and expertise exchange in the aforementioned areas.

On 10 July 2025, Minister Alkhorayef held meetings with leading Russian industrial and mining companies.⁴⁵⁸ The parties discussed mining technology transfer and exploration opportunities in Saudi Arabia.

On 11 July 2025, Minister Alkhorayef chaired a private sector roundtable in Russia on mining opportunities in Saudi Arabia.⁴⁵⁹ Minister Alkhorayef emphasized Saudi Arabia's focus on mining and highlighted its mineral discoveries.

On 14 July 2025, ACWA Power, Badeel and Saudi Aramco agreed to develop five solar projects and two wind projects totaling SAR63.75 billion.⁴⁶⁰ The new projects aim to generate a combined capacity of 15,000 megawatts.

On 17 July 2025, the Ministry of Industry and Mineral Resources established a non-profit association to enhance research and innovation.⁴⁶¹ This action aims to support sustainability and efficiency in the industrial sector.

On 20 July 2025, ACWA Power announced an agreement with energy corporations from Italy, France, the Netherlands and Germany to develop a green hydrogen and renewable energy export corridor between Saudi Arabia to Europe.⁴⁶² The agreements aim to enhance energy security and serve industrial demand.

On 29 July 2025, Minister of Industry and Mineral Resources Bandar bin Ibrahim Al Khorayef met with American private sector leaders to discuss investment opportunities in Saudi Arabia.⁴⁶³ Minister Al Khorayef emphasized opportunities in Saudi Arabia's mining sector, including its rare earth element reserves.

On 26 August 2025, Saudi Arabian officials met with Brazil's National Secretary for Oil, Natural Gas and Biofuels Pietro Mendes to discuss the implementation of the Action Plan for Energy Cooperation.⁴⁶⁴ Brazil and Saudi Arabia agreed to create technical working groups to further explore initiatives and collaboration hydrogen and energy supply chains.

On 28 September 2025, Minister of Industry and Mineral Resources Bandar bin Ibrahim Alkhorayef returned to Saudi Arabia from China where he established over 42 Memorandums of Understanding with Chinese companies in the energy and technology sectors.⁴⁶⁵ Additionally, the National Industrial Development Center and Tsinghua Unigroup signed an Memorandum of Understanding to cooperate on semiconductors.

Saudi Arabia has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. Saudi Arabia has taken strong action towards the combined welfare target and supported supply chains for critical minerals, semiconductors and energy transition technologies through the Mining Innovation Studio, funding for AI chip startup Groq, funding for renewable energy projects and investing in extraction and processing facilities for metals and rare earth elements.

Thus, Saudi Arabia receives a score of +1.

South Africa: 0

South Africa has partially complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 23 December 2024, Minister of Electricity and Energy Kgosientsho Ramokgopa announced bidders for the Renewable Energy Independent Power Producer Procurement Programme.⁴⁶⁶ This program is designed to facilitate the procurement of up to 5,000 megawatts of renewable energy capacity.

On 3 January 2025, President Cyril Ramaphosa signed into law a 150 per cent tax deduction on investments in electric and hydrogen-powered vehicles.⁴⁶⁷

On 12 February 2025, Minister of Forestry, Fisheries and the Environment announced changes to South Africa's environmental authorization processes to prioritize transition technology projects.⁴⁶⁸ This includes speeding up environmental review for renewable energy projects, removing environmental authorization for "solar and battery facilities," the creation of renewable energy zones and transmission corridors.

On 1 March 2025, South Africa and Chile signed an agreement to improve cooperation in critical minerals and the energy transition.⁴⁶⁹ This agreement focuses on leveraging trade and industry to strengthen cooperation.

On 12 March 2025, President Ramaphosa, President of the European Commission Ursula von der Leyen and President of the European Council António Costa signed a joint statement on various issues including supply chains and energy transition technologies.⁴⁷⁰ The members agreed to launch negotiations for a "Clean Trade and Investment Partnership." This partnership will include investment in raw materials supply chains and renewable energy projects.

On 28 March 2025, the Cabinet approved the South Africa Renewable Energy Master Plan. This plan pursues a target of developing three to five gigawatts of energy generation to support domestic manufacturing.⁴⁷¹ The plan seeks to "improve the resilience and sustainability of energy supply."

On 14 April 2025, Minister of Forestry, Fisheries and the Environment Dion Goerge welcomed Eskom's issuance of a tender to establish a separate renewable energy business unit.⁴⁷² Minister Goerge encouraged private sector actors to participate and drive innovation to bolster renewable energy capacity.

On 17 April 2025, South Africa signed a Memorandum of Understanding with Nigeria to deepen cooperation in the mining sector.⁴⁷³ The agreement outlines several areas of cooperation including technical support, training, technology transfer and joint exploration projects.

On 20 May 2025, Minister of Mineral and Petroleum Gwede Mantashe welcomed the Cabinet approval of both the Critical Minerals and Metal Strategy along with the Mineral Resources Development Bill of 2025.⁴⁷⁴ These legislations identify critical minerals and strategies for exploration, production and beneficiation.

On 21 May 2025, Minister of Finance Enoch Godongwana gave a budget speech which outlined ZAR219.2 billion for energy supply networks through the 2025 budget.⁴⁷⁵ This includes investments in renewable energy, energy transmission and expansion to stabilize power and reduce loadshedding.

On 23 May 2025, Minister Ramokgopa concluded a visit to the Republic of Namibia where parties discussed maintaining existing power supply agreements and exploring the establishment of cross border transmission infrastructure between the two countries.⁴⁷⁶

On 27 May 2025, Minister Mantashe announced a visit to Orion Minerals in the Northern Cape, where it possesses mineral rights over precious metals and critical minerals.⁴⁷⁷ The purpose of the visit is to receive an appraisal on mining operations and discuss mining opportunities.

On 30 May 2025, Minister Ramokgopa announced that five bidders had been appointed to the Battery Storage power procurement program.⁴⁷⁸ These private bidders will be assigned to development projects to increase battery energy storage of the grid.

On 12 June 2025, Minister of Trade, Industry and Competition Parks Tau gave an address at the Green Hydrogen summit held in Cape Town.⁴⁷⁹ Minister Tau announced EUR23 million from the German government's KfW development bank to be used in funding catalytic green hydrogen projects.

On 29 July 2025, Minister Mantashe hosted the G20 Critical Minerals Stakeholder Engagement.⁴⁸⁰ The meeting sought to launch a collaborative process to translate the G20 Critical Minerals Framework into actionable partnerships, investment, and capacity building across exploration, processing, supply chains, and technology innovation.

On 22 August 2025, Minister of Economy, Trade and Industry Yoji Muto and South Africa's Minister of Trade, Industry and Competition Parks Tau, Minister of Electricity and Energy Kgosientsho Ramokgopa and Minister of Science, Technology and Innovation Blade Nzimande signed a joint declaration to promote decarbonization and cooperation.⁴⁸¹

On 22 August 2025, South Africa, African Union, Japan and African Union member-states released the TICAD 9 Yokohama Declaration to “[c]o-create innovative solutions with Africa.”⁴⁸² The declaration includes a statement on cooperation for enhancing artificial intelligence governance and projects. It highlights the importance of continued collaboration between Japan and Africa in energy transition technologies and clean energy projects.

On 25 August 2025, Minister of Transport announced two new Train Operating Companies that will directly manage manganese routes, ensuring manganese is reliably transported to the Port of Saldanha.⁴⁸³

On 3 September 2025, Deputy Minister Phumzile Mgcina announced a new policy framework on mineral output.⁴⁸⁴ The framework aims to optimize African mineral output with geoscience mapping, investments in new infrastructure and endeavors to localize the industry.

On 10 October 2025, the African Union and South Africa launched an Africa Energy Efficiency Facility to develop and enhance energy efficiency projects.⁴⁸⁵

On 12 October 2025, Deputy Minister of International Relations and Cooperation Alvin Botes and the African Union Commission's Deputy Chairperson Selma Malika Haddadi reaffirmed cooperation to support African development and shared frameworks such as Agenda 2063 and G20.⁴⁸⁶

South Africa has partially complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. South Africa has made steps to increase the renewable share of the energy production. It has also taken steps to work with other African countries to increase the output of critical minerals. However, South Africa has not taken action with regards to semiconductors or energy transition technologies.

Thus, South Africa receives a score of 0.

Türkiye: +1

Türkiye has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 27 November 2024, Minister of Energy Alparslan Bayraktar discussed strategies for energy transitions with Germany and private stakeholders at the German-Turkish Energy Forum.⁴⁸⁷ Minister Bayraktar called for German investors to partner in Türkiye's efforts to increase wind and solar capacity and several memoranda of understanding were signed between Turkish and German organizations.

On 10 February 2025, President Recep Tayyip Erdoğan met with Malaysian Prime Minister Anwar Ibrahim to announce increased partnership in the research, development and production of semiconductors.⁴⁸⁸ This partnership includes Turkish firms hiring Malaysian engineers and Malaysia purchasing Turkish semiconductors.

On 12 February 2025, the Ministry of Energy and Natural Resources and Indonesia's Ministry of Energy and Mineral Resources announced cooperation to accelerate clean energy development in Indonesia, including the signing of a Memorandum of Understanding.⁴⁸⁹ This collaboration will bolster Indonesia's commitment to clean power generation.

On 2 May 2025, Minister of Energy Alparslan Bayraktar announced that state-owned company MTA has plans to renew its partnership with Niger.⁴⁹⁰ Minister Bayraktar along with Nigerien Minister of Mines announced that MTA has had significant progress in the mining of critical minerals in Niger and has developed a partnership that is mutually beneficial.

On 2 May 2025, Hungarian Deputy Minister of Foreign Affairs and Trade Boglarka Illes announced that the Turkish state-owned Turkish Petroleum Corporation has signed an agreement with Hungary to commence mineral exploration and extraction within Hungary.⁴⁹¹ This supports the diversification of minerals within the energy transition supply chain.

On 7 May 2025, President Erdoğan announced a commitment to invest USD80 billion by 2035 to ensure Türkiye's energy transition to renewable energy.⁴⁹² Türkiye aims to raise its wind and solar power capacity to 120,000 megawatts by 2035.

On 2 July 2025, the Turkish Grand National Assembly adopted the country's first climate law.⁴⁹³ The law seeks to ensure greater energy efficiency in the country and the development of new technologies.

On 19 July 2025, the Law on Amendment of Certain Laws (Law No. 7554) entered into force. Law No. 7554 includes multiple amendments to existing laws.⁴⁹⁴ Under Article 3, mining exploration permits are allowed within state forests and “environmental protection zones.” Article 11 allows olive trees to be relocated for mining activities. Article 15 specifies new permitting rules for solar and wind energy facilities on “forest properties,” which allow companies with “preliminary license[s]” to survey and drill the area.

On 29 July 2025, Minister Bayraktar and Minister of Energy of Kazakhstan Yerlan Akkenzhenov signed a Memorandum of Understanding (MoU) on collaboration in the fields of energy and mining.⁴⁹⁵ The parties aim to develop joint projects in areas including exploration and production as well as electricity and renewable energy.

On 31 July 2025, President Erdogan and President of Gabon Brice Clotaire Oligui Nguema witnessed the signing of two intergovernmental MoUs to increase cooperation within the fields of renewable energy and mining.⁴⁹⁶ The MoUs highlights cooperation in critical mineral supply chains and electricity transmission and distribution infrastructure.

Türkiye has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. It has taken action domestically and internationally to diversify supply chains for energy transitions and has taken steps to strengthen supply chains for critical minerals and semiconductors.

Thus, Türkiye receives a score of +1.

Analyst: Arash Aslan-Beigi

United Kingdom: +1

The United Kingdom has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 9 December 2024, the United Kingdom, the United States and Tokamak Energy announced a joint fusion energy project for lithium research which is essential to diversify the energy sector to include fusion energy.⁴⁹⁷ Fusion energy, once commercially available, has the potential to provide ample clean electricity. This project will be supported by GBP40.5 million in funding of which the United Kingdom and United States will each provide GBP13.5 million.

On 10 December 2024, UK Export Finance offered JDR Cables a GBP30 million bond support for a project in the floating winds sector.⁴⁹⁸ JDR Cables is a British power-cable company that installs subsea cables for electricity. This financial assistance will support the technology development of green energy solutions and public-private partnerships for renewable energy sources in the United Kingdom.

On 10 December 2024, contracts for the East Coast Cluster in Teesside were signed.⁴⁹⁹ This is part of the United Kingdom's carbon capture, usage and storage project and is aligned with the government's Plan for Change environmental policy. The Teesside project will capture carbon emission from regional industries and provide the contractors of the East coast Cluster with GBP4 billion to be used in technological innovation, energy security and supply chain development.

On 14 January 2025, Secretary of State for Business and Trade Jonathan Reynolds and Saudi Arabia's Minister of Mineral Resources Bandar Alkhorayef and Vice Minister of Industry and Mineral Resources for Mining Affairs Khalid Al-Mudaifer signed a Memorandum of Understanding to cooperate for mineral resources development.⁵⁰⁰ Formalized at the Future Minerals Forum, this collaboration will support the diversification of Saudi Arabia's critical minerals supply chains.

On 22 January 2025, the United Kingdom and Japan's Ministry of Economy, Trade and Industry, Ministry of Internal Affairs and Communications and the Digital Agency of Japan held an online meeting to discuss cooperation in digital technology.⁵⁰¹ The meeting reviewed progress under the Japan-UK Digital Partnership, focusing on areas such as Beyond 5G/6G research, semiconductor supply chain resilience and the promotion of Data Free Flow with Trust.

On 5 February 2025, Foreign Secretary David Lammy announced GBP17 million in funding to support round two of the InnovateUkraine initiative.⁵⁰² Projects selected through this initiative will advance low-carbon energy solutions for Ukraine with a focus on renewable energy, smart grids, industrial decarbonization and green fuels.

On 13 February 2025, the Department for Energy Security and Net Zero launched the Clean Industry Bonus to support clean energy manufacturing and create skilled jobs in industrial towns and coastal areas.⁵⁰³ The initiative offers financial support to offshore wind developers who invest in deprived regions, build low-carbon factories and enhance net-zero supply chains.

On 21 February 2025, the Department for Energy Security and Net Zero started a consultation process for policy proposals of relaxing the eligibility criteria on planning consent, changing how offshore wind budgets are set and published and increasing the Contracts for Difference contract term.⁵⁰⁴ These policy changes will help bolster the UK commitment to a clean energy system by 2030 as they will strengthen sustainable energy infrastructure through increased investment and the promotion of public-private cooperation in green energy systems.

On 11 March 2025, the Department for Energy Security and Net Zero introduced the Planning and Infrastructure Bill which will help expedite green electricity project initiatives.⁵⁰⁵ This bill will bring "ready-to-

go” infrastructure projects at the front of the grid connection queue instead of approving projects on a first come first serve basis. This shift in policy framework will aid the timeline of renewable energy projects and bring the UK closer to its decarbonization goals in the Clean Power 2030 Action Plan.

On 20 March 2025, the Office of Gas and Electricity Markets introduced their GBP4 billion Advanced Procurement Mechanism for supply chains pertinent to electricity.⁵⁰⁶ This action will expedite the approval process for electricity transmission officers for spending on the necessary resources for renewable energy projects.

On 21 March 2025, Great British Energy launched a GBP10 million partnership with metro mayors to develop clean power projects across England.⁵⁰⁷ The initiative will support rooftop solar, onshore wind and hydropower installations, with profits reinvested in communities or used to reduce residents’ energy bills.

On 26 March 2025, Chancellor of the Exchequer Rachel Reeves presented the Spring Statement.⁵⁰⁸ The statement includes a commitment to review the Climate Change Levy for electricity used to produce hydrogen and greater investment in energy and housing infrastructure. The government confirmed the allocation of GBP42 million for “DSIT-led Frontier AI Exemplars” aimed at creating greater government efficiency.

On 27 March 2025, the UK Atomic Energy Authority announced GBP3.5 million in funding for 13 organizations to “develop robust sensing technologies for use in future fusion power plants.”⁵⁰⁹ These technologies are essential to diversifying the energy sector to include fusion energy.

On 28 March 2025, the Department for Science, Innovation and Technology announced a third wave of semiconductor startups which will receive GBP1.1 million to advance innovative technologies related to semiconductors.⁵¹⁰ The selected companies include RX-Watt which is developing “battery-free sensors that can be wirelessly powered using safe microwave signals.”

On 7 April 2025, the Department for Energy Security and Net Zero shortlisted 27 hydrogen projects as part of the next step of the government’s hydrogen plan.⁵¹¹ This initiative is another step in the decarbonization process and creates investment opportunities for the private sector to engage in the implementation process for these hydrogen projects.

On 12 April 2025, Minister of State for Trade Policy and Economic Security Douglas Alexander and China’s Vice Minister of Industry and Information Technology Xin Guobin discussed deepening China-UK industrial cooperation in artificial intelligence, digital economy and green energy.⁵¹² The talks demonstrate a step in strengthening cooperation in energy transition technologies.

On 24 April 2025, the Department for Energy Security and Net Zero and energy company Eni agreed to a deal that will create GBP2 billion in supply chain contracts for the Liverpool Carbon Capture and Storage Project.⁵¹³ This deal will increase investment in the United Kingdom's green energy industry and is a major commitment to the decarbonization process of the region.

On 14 May 2025, the Department for Energy Security and Net Zero announced a Great British Energy scheme with GBP4 million in funding for Scottish clean energy projects.⁵¹⁴ Selected projects will focus on community-based clean energy projects including onshore wind, solar and hydropower.

On 19 May 2025, the United Kingdom and the European Union held the 2025 EU-UK Leaders' Summit to discuss plans for cooperation.⁵¹⁵ The summit affirmed energy cooperation between the two parties on a permanent basis and further discussion was held as to the UK's role in the internal electricity market of the EU.

On 13 June 2025, the Department for Energy Security and Net Zero announced a GBP500 million investment for hydrogen infrastructure.⁵¹⁶ The funding will establish the United Kingdom's first regional hydrogen transport and storage network.

On 17 June 2025, the G7, including the United Kingdom, launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit.⁵¹⁷ It supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 19 June 2025, Minister for Climate Kerry McCarthy and Japan's Senior Deputy Minister of Education, Culture, Sports, Science and Technology Hiroshi Masuko signed a Memorandum of Understanding for a partnership in fusion energy.⁵¹⁸

On 23 June 2025, the Department for Energy Security and Net Zero published its ten-year Clean Energy Industries Sector Plan which will invest GBP700 million in clean energy supply chains in Britain.⁵¹⁹ The investment will go towards key clean power initiatives such as floating offshore wind platforms, electric cables and hydrogen infrastructure.

On 23 June 2025, the United Kingdom announced GBP2.5 billion over 5 years in investments in fusion energy.⁵²⁰ UK Industrial Fusion Solutions aims to deliver a prototype fusion power plant by 2040.

On 30 June 2025, the Department of Energy Security and Net Zero released “The Solar Roadmap” which details 70 actions needed to help increase solar deployment across the country.⁵²¹ Actions included streamlining grid connections, reviewing reinforcement costs, scaling innovative technologies and more.

On 3 July 2025, the Compound Semiconductor Applications Catapult and National Research Council of Canada and Quebec’s MiQro Innovation Collaborative Centre signed a memorandum of understanding to bolster semiconductor supply chains in G7 countries and improve their resiliency.⁵²² This memorandum will synthesize Canada and the United Kingdom’s respective abilities to design, fabricate and package semiconductors.

On 4 July 2025, the Department for Energy Security and Net Zero published a new plan for offshore wind revolution.⁵²³ This initiative involves resolving the current offshore wind turbines and expanding the wind farms through encouragement of domestic and foreign investment in wind turbine supply chains.

On 8 July 2025, the UK Atomic Energy Authority launched its International Fellowships Scheme to build global fusion expertise.⁵²⁴ The scheme aims to create impactful research opportunities at both domestic and international institutions.

On 10 July 2025, the Department for Energy Security and Net Zero announced reforms to its electricity system focusing on increasing efficiency and lowering costs.⁵²⁵

On 13 July 2025, the United Kingdom announced a GBP63 million funding package to expand electric vehicle infrastructure.⁵²⁶ As part of the Plan for Change, this funding will be used to expand access to affordable charging and electrify ambulances and medical fleets.

On 14 July 2025, the United Kingdom and the Czech Republic signed a partnership regarding industrial collaboration on modular reactors and their export to other European countries.⁵²⁷ This partnership will help shift the United Kingdom’s dependency on fossil fuels and further promote their energy security goals.

On 15 July 2025, Transport Secretary Heidi Alexander announced a GBP3650 million Electric Car Grant.⁵²⁸ The grant supports upfront discounts on electric vehicles (EVs) aiming to incentive consumers to purchase EVs from participating manufacturers.

On 17 July 2025, the United Kingdom and Germany signed the Treaty on Friendship and Bilateral Cooperation, agreeing to implement 17 joint projects under its Implementation Plan.⁵²⁹ Of these, two focus on advancing energy cooperation. The North Sea Energy Infrastructure Project commits both countries to developing offshore hybrid interconnection between the UK and Germany by the mid-2030s and the Strategic Science and Technology Partnership outlines collaboration on developing technologies such as quantum, AI, semiconductors, advanced connectivity and sustainable energy solutions.

On 24 July 2025, Maritime Minister Mike Kane announced GBP30 million to decarbonize the shipping sector.⁵³⁰ The funds will go towards hydrogen, methanol and ammonia fuel projects as well as renewable energy development within the shipping industry.

On 24 July 2025, Prime Minister Modi and British Prime Minister Starmer met and endorsed the new India-UK Vision 2035.⁵³¹ It builds on the finalized Trade Deal to develop, among others, a transformative climate partnership, such as enhancing India-UK Nuclear Cooperation Agreement to include small modular reactors, exchange best practices, advance joint work on renewables, energy storage and carbon capture.

On 4 August 2025, Great British Energy and Highlands and Islands Enterprise signed a partnership agreement to accelerate the UK's transition towards renewable energy.⁵³² The partnership agreement focuses on the goals of clean energy storage, generation, supply chain development and community energy projects.

On 3 September 2025, the government released a strategic bilateral framework with Spain.⁵³³ This framework provides a foundation for renewable energy supply chains, through increased cooperation in the just transition and the development of a Memorandum of Understanding.

On 10 September 2025, the government-owned National Wealth Fund and EIG Global Energy Partners allocated up to GBP445 in investment funding for FIDRA Energy.⁵³⁴ This will support FIDRA Energy's standalone Battery Energy Storage System in the Thorpe Marsh region. The 1,400-megawatt project has the potential "to export over 2 million Mega Watt hours annually."

On 15 September 2025, the Department for Transport announced GBP448 million in funding to reduce emissions from the UK's shipping industry.⁵³⁵ The investment will be used for research and development into renewable alternatives for maritime shipments such as electric, hydrogen and wind power.

On 18 September 2025, the United Kingdom and United States signed a Technology Prosperity Memorandum of Understanding.⁵³⁶ The partnership highlights technological cooperation, partnership in the development of nuclear energy regulatory processes, technologies and supply chains.

On 22 September 2025, the United Kingdom Atomic Energy Authority and Energy and Mines Commission of Ontario, Canada signed a Memorandum of Understanding for the supply of tritium to the UK.⁵³⁷ This advancement of the UK's nuclear energy supply chain in cooperation with the Ontario provincial government.

On 24 September 2025, Department for Science, Innovation and Technology announced GBP10 million for the UK's semiconductor industry.⁵³⁸ The funds will support a diverse range of projects in the semiconductors industry.

On 29 September 2025, UK's Secretary of State for Energy Security and Net Zero formally announced that the Maritime Energy Security Hub project headed by the energy transition company EnergyPathways, will be treated as a development of national significance.⁵³⁹ This initiative will support UK wind power with the use of hydrogen geo-storage to help capture and monetize lost wind energy as well as develop the UK's hydrogen production capacity.

The United Kingdom has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. The United Kingdom has taken strong action towards the combined welfare target and supported supply chains for energy transitions and semiconductors through sustainable supply chain projects, investment for clean energy projects, funding for semiconductor startups and fusion energy technologies and support for the InnovateUkraine initiative. The UK has also signed a critical minerals partnership with Saudi Arabia.

Thus, the United Kingdom receives a score of +1.

Analyst: Simeon Karakolev

United States: +1

The United States has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and energy transition technologies.

On 9 December 2024, the United Kingdom, the United States and Tokamak Energy announced a joint fusion energy project for lithium research which is essential to diversify the energy sector to include fusion energy.⁵⁴⁰ Fusion energy, once commercially available, has the potential to provide ample clean electricity. This project will be supported by GBP40.5 million in funding of which the United Kingdom and United States will each provide GBP13.5 million.

On 19 December 2024, President Joe Biden announced a new climate target for the United States, aiming for a 61-66 per cent reduction in net greenhouse gas emissions by 2035 from 2005 levels.⁵⁴¹ The strategy includes leveraging investments from the Inflation Reduction Act and Bipartisan Infrastructure Law, implementing federal standards and mobilizing private capital. This commitment supports the sustainability and responsibility of energy transition supply chains by promoting clean energy initiatives and reducing emissions.

On 24 December 2024, the United States and Japan agreed to strengthen cooperation in the development and deployment of advanced clean energy technologies.⁵⁴² This includes floating offshore wind, clean hydrogen and derivatives such as ammonia and synthetic fuels, carbon capture and recycling and small modular reactors. Japan also committed to collaborate on resilient mineral supply chains and methane emission reductions in the Indo-Pacific. The United States and Japan also co-hosted a session involving private sector representatives to boost public-private collaboration in the energy transition. Participants exchanged views on emerging clean energy markets, including synthetic methane and hydrogen, to meet the growing demand for clean electricity in the digital age.

On 3 January 2025, the Biden-Harris Administration awarded the Semiconductor Research Corporation Manufacturing Consortium USD285 million to establish a new CHIPS Manufacturing USA Institute for Digital Twins, headquartered in North Carolina.⁵⁴³ This initiative aims to advance US leadership in semiconductor technology, enhancing the reliability and diversification of semiconductor supply chains critical for energy transition technologies.

On 16 January 2025, the Department of Energy announced an investment of nearly USD14 million in federal funding for four projects aimed at advancing the large-scale conversion of carbon dioxide emissions into valuable products.⁵⁴⁴ These projects focus on developing technologies that transform carbon emissions into fuels, building materials and other carbon-based products, contributing to the sustainability and responsibility of energy transition supply chains by reducing greenhouse gas emissions and promoting innovative uses of captured carbon.

On 20 January 2025, President Donald Trump issued a memorandum temporarily withdrawing all areas on the Outer Continental Shelf from offshore wind leasing and initiating a review of the federal government's leasing and permitting practices for wind projects.⁵⁴⁵

On 20 January 2025, President Trump signed an executive order titled "Unleashing American Energy" which outlines policies to encourage energy exploration and production on federal lands and waters, including the Outer Continental Shelf.⁵⁴⁶ The order emphasizes establishing the United States as a leading producer and processor of non-fuel minerals, including rare earth minerals, to create jobs, strengthen supply chains and reduce reliance on adversarial states. While this action could promote domestic production of critical minerals essential for energy transition technologies, it also intends to disrupt existing global critical minerals supply chains.

On 13 February 2025, President Trump hosted Indian Prime Minister Narendra Modi for an Official Working Visit in Washington D.C. where a Strategic Mineral Recovery initiative was launched. The initiative is a new US-India cooperative program to recover and process critical minerals including lithium, cobalt and rare earths from heavy industries like aluminum, coal mining and oil and gas.⁵⁴⁷ President Trump and Prime Minister Modi also re-committed to the US-India Energy Security Partnership, including in oil, gas and civil nuclear energy.

On 13 February 2025, the US-India Transforming the Relationship Utilizing Strategic Technology Initiative was launched to build trusted and resilient supply chains for semiconductors and critical minerals.⁵⁴⁸ This partnership will build on ongoing collaboration between the US National Science Foundation and several Indian science agencies to enable joint research in the areas of semiconductors.

On 24 March 2025, the Department of Energy re-issued a USD900 million solicitation to support the deployment of small modular reactors.⁵⁴⁹ This will enable energy transition to cleaner alternatives to meet demand forecasts driven by AI data center growths.

On 31 March 2025, Russia's Special Envoy and Head of the Russian Direct Investment Fund Kirill Dmitriev announced that Russia and the United States had begun discussions on joint projects to develop rare-earth metal reserves in Russia.⁵⁵⁰ Special Envoy Dmitriev noted growing interest from companies in cooperating on rare earth projects.

On 8 April 2025, President Trump signed an Executive Order to designate coal as a mineral, lift barriers on coal mining and require agencies to rescind any policies that seek transition away from coal.⁵⁵¹ This action goes

against the promotion of energy transition technologies and dilutes the importance placed to critical minerals as the Secretary of Energy is asked to review the inclusion of “steel.”

On 22 April 2025, the Department of Energy released the third loan disbursement to Holtec for the reopening of the Palisades Nuclear Plant.⁵⁵² When completed, it is expected to provide 800 megawatts of affordable, reliable baseload power in Michigan.

On 13 May 2025, the Department of Energy and the Ministry of Industry and Mineral Resources in Saudi Arabia signed a Memorandum of Cooperation to collaborate on mining and mineral resources.⁵⁵³ The investment will contribute to economic development and the diversification and resilience of critical mineral supply chains.

On 2 June 2025, the Department of Energy announced funding of USD8 million through the Community Microgrid Assistance Partnership to support microgrid projects.⁵⁵⁴ The 14 projects selected through the program will advance microgrid innovation in remote communities.

On 17 June 2025, the G7, including the United States, launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit.⁵⁵⁵ It supports the diversification of critical mineral supply, investment in local value creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 25 June 2025, the Department of Energy announced USD15 million in support for three energy storage projects.⁵⁵⁶ The projects support critical industries and infrastructure in the event of a power outage or other emergency.

On 26 June 2025, the Department of Energy’s Office of Nuclear Energy awarded 23 Rapid Turnaround Experiment projects to support the advancement of nuclear technology.⁵⁵⁷ These awards provide researchers access to access to irradiation testing, post-irradiation examination, and technical expertise at no cost.

On 27 June 2025, Secretary of Energy Chris Wright and other senior officials met with Argentina’s Minister of Foreign Affairs Gerardo Werthein to discuss bilateral cooperation in energy and mining.⁵⁵⁸ The meeting highlighted Argentina’s regulatory measures to attract investment, including the development of Vaca Muerta for unconventional hydrocarbons, lithium and other critical minerals for energy transition.

On 1 July 2025, Secretary of State Marco Rubio attended the Japan-Australia-India-US (Quad) Foreign Ministers' Meeting in Washington D.C. along with Australian Minister for Foreign Affairs Penny Wong, Indian Minister of External Affairs Subrahmanyam Jaishankar and Japanese Minister for Foreign Affairs Iwama Takeshi.⁵⁵⁹ The Quad Foreign Ministers issued a Joint Statement and Fact Sheet announcing the launch of the Quad Critical Minerals Initiative which aims to secure and diversify reliable supply chains for critical minerals, including through electronic waste recovery and re-processing, while coordinating with private sector partners to facilitate investment.⁵⁶⁰

On 4 July 2025, President Trump enacted the One Big Beautiful Bill Act (OBBBA), allocating USD125 million for the US military to develop small modular nuclear reactors for its use, diversifying the military's energy security.⁵⁶¹ Section 70308 of the OBBBA also expanded tax incentives provided under CHIPS and Science Act from 25 per cent to 35 per cent on advanced manufacturing investment credit, supporting the strengthening of semiconductor supply chains and section 20004(c and d) allocated USD5 billion to the US Department of Defense (DoD) to boost its Industrial Base Fund, facilitating investments to secure critical mineral supply chains. It also allocated USD500 million to the DoD Credit Account Program to specifically invest in any critical mineral related projects. However, sections 70501-70510 of the OBBBA terminated clean energy subsidies previously accorded by the Green New Deal, including the clean vehicle credit, residential clean energy credit and energy efficient home improvement credit. Section 70511 will also eliminate the clean hydrogen production tax credit by 2028, almost 6 years earlier than the previously legislated 2033 timeline and section 70512(a) terminated clean energy production credits for wind and solar facilities that produce electricity after December 2027, earlier than the previous 2032 timeline. These terminations undermine the commitment's focus on a sustainable and responsible energy transition and use of energy transition technologies to achieve this goal.

On 7 July 2025, the Department of Energy extended an agreement with Norway's Royal Ministry of Energy to collaborate in joint research and development of hydropower and marine energy technologies.⁵⁶² This action will reduce barriers in technology development, testing and expand generation capacity for a creative, underused source of energy transition.

On 16 July 2025, the Department of Energy launched a pilot program to build and operate nuclear fuel production lines.⁵⁶³ This program strengthens domestic nuclear fuel supply chains, reduce reliance on foreign sources and open private sector investment in testing advanced reactor designs.

On 24 July 2025, the Department of the Interior directed the US Geological Survey to map and inventory federal mine waste sites and streamline federal regulation on critical mineral recovery from mine waste, prioritizing uranium.⁵⁶⁴ This action will add a new source of supply by recovering critical minerals whilst also cleaning up mining sites, thereby strengthening energy transition.

On 26 July 2025, the United States and European Union agreed to a deal on tariffs and trade.⁵⁶⁵ The parties agreed to “zero-for-zero” tariffs on strategic products including semiconductor equipment and critical raw materials.

On 26 July 2025, the United States and European Union agreed to a deal on tariffs and trade.⁵⁶⁶ The parties agreed to “zero-for-zero” tariffs on strategic products including semiconductor equipment and critical raw materials.

On 13 August 2025, the Department of Energy announced nearly USD1 billion in funding opportunities to advance critical mineral and material supply chain projects.⁵⁶⁷ These include an accelerator program to facilitate commercialization, a byproduct recovery pilot from existing industrial processes, a grant to support manufacturing critical material in batteries, and to recover critical minerals from industrial wastewater.

On 13 August 2025, the Department of Energy unveiled a USD50 million notice of funding opportunity for a ‘Critical Minerals and Materials Accelerator’ that will promote partnerships led by American industries to prototype and pilot processing technologies for innovative critical materials.⁵⁶⁸ This specific accelerator will support research and development to enable predictable supply chains for energy transition technologies.

On 15 September 2025, the Office of Fossil Energy and Carbon Management announced USD6 million for gallium research and development projects.⁵⁶⁹ The TRACE-Ga initiative aims to produce technologies that can generate pure gallium from aluminum or zinc for semiconductor, energy and defense supply chains.

On 15 September 2025, the United States and United Kingdom signed a bilateral deal expediting the manufacturing process of nuclear power plants within both countries.⁵⁷⁰ This will be done by speeding up the licensing process through removal of red tape and opening to cross-Atlantic market cooperation.

On 18 September 2025, the United States and the United Kingdom signed a Technology Prosperity Memorandum of Understanding.⁵⁷¹ The partnership highlights technological cooperation, partnership in the development of nuclear energy regulatory processes, technologies and supply chains.

On 26 September 2025, the Department of Energy announced USD80 million for mining technology and USD15 million for research and development in critical minerals.⁵⁷² The program is aimed at supporting the development of a national critical minerals supply chain.

On 1 October 2025, the Department of Energy announced USD365 million for Puerto Rico's energy grid and infrastructure.⁵⁷³

On 2 October 2025, the Department of Energy terminated USD7.56 billion funding for 223 projects issued by the Offices of Clean Energy Demonstrations, Manufacturing and Energy Supply Chains, Advanced Research Projects Agency-Energy, amongst others for being economically unviable.⁵⁷⁴ These actions will disrupt the diversification of energy supply chains, from battery factories to hydrogen fuel supply chains projects.⁵⁷⁵

The United States has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. The United States has taken strong action towards the combined welfare target and to strengthen supply chains for energy transition technologies and semiconductors through strengthening domestic semiconductor supply chains, advance nuclear energy as a reliable energy transition technology and financing fusion energy projects.

Thus, the United States receives a score of +1.

Analyst: Ajay Gokul Sivanandam

African Union: 0

The African Union has partially complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 5 December 2024, at the African Union's Specialized Technical Committee on Transport and Energy, African ministers from 39 countries approved the Climate Resilient and Smart Infrastructure Policy.⁵⁷⁶ This policy ensures the promotion of Information Communication Technology industrialization, resilient energy, water and transportation development while ensuring the policies adaptivity to climate related changes.

On 20 January 2025, Commissioner for Infrastructure and Energy Amani Abou-Zeid emphasized the African Union's energy transition and its potential as a leader of this movement.⁵⁷⁷ Through the "Pathways to Competitiveness: Setting the Industrial Policy Agenda" and "Powering Progress: Financing the Energy Transition" sessions, the Commissioner highlighted the need for private investment in clean energy within Africa and outside investment in the energy sector to develop Africa's gaps in energy access.

On 13 February 2025, the African Energy Commission and Denmark launched a project to enhance energy efficiency and sustainable development within the AU.⁵⁷⁸ The project will focus on improving energy capacity and advancing sustainable and reliable supply chains in line with the energy transition.

On 16 February 2025, the African Union adopted the Continental Strategy for Sustainable Aviation Fuels, Low Carbon Aviation Fuels and the African Green Hydrogen Strategy at the 38th African Union summit.⁵⁷⁹ The first and second strategy aims to decrease the carbon output of aviation through the creation of a sustainable aviation fuels industry providing aircrafts with non-carbon fuel sources. The third initiative verifies that financial and technical advancements in hydrogen are at the forefront of Africa's green hydrogen plan which is in line with ensuring energy security in the African Union.

On 21 March 2025, the African Forum on Mining offered a platform to discuss Africa's green energy potential due to its abundant mineral supply.⁵⁸⁰ This meeting emphasized the African Mining vision and is expected to mitigate the challenges inhibiting the release of this environmental potential. Other expected outcomes of this forum are policy recommendations, a climate action roadmap for Africa's green energy transition and developing intra-African partnership frameworks.

On 25 March 2025, the fifth India–Africa Strategic Dialogue convened to explore synergies between India's Critical Minerals Mission and the African Green Minerals Strategy.⁵⁸¹ Building on momentum from India's G20 presidency and the African Union's inclusion as a permanent member, the dialogue emphasized the importance of equitable partnerships. One session highlighted the need for India and African nations to integrate social responsibility into critical mineral extraction.

On 29 May 2025, the African Energy Commission and Swedish International Development Cooperation Agency concluded a three day "Validation Workshop for the Framework for Cross-Border Strategic Cooperation in Skills Sharing."⁵⁸² This event reinforces the energy transition partnership between the two countries, while also promoting a pathway for skills exchange aimed at enhancing the energy sector of both the African Union and Sweden.

On 12 June 2025, Commissioner for Infrastructure and Energy of the African Union Commission Lerato Mataboge spoke at the Africa Green Hydrogen Summit and pushed for action by African states to adopt green hydrogen.⁵⁸³ The summit concluded with a pledge by the members to "fast-track the development of national green hydrogen strategies" with "technical support from the African Union Commission."

On 27 June 2025, Commissioner Mataboge conducted a four-day official visit to the Democratic Republic of Algeria to explore bilateral cooperation to promote Africa's clean energy future.⁵⁸⁴ The conversation centered around Algeria's contribution to the African Single Electricity Market and the capacity of natural gas as Africa's energy fuel.

On 1 July 2025, Director of Infrastructure and Energy Kamugisha Kazaura highlighted the foundation of the African Union's renewable energy framework at the African Single Electricity Market High-Level Technical Meeting.⁵⁸⁵ This conference between AU countries acknowledged the work already done to support the AU's unified pathway to energy transition and outlined the future plans of the "AfSEM High-Level Technical Oversight Committee" which serves to create a fully integrated electricity system between all AU member states.

On 11 July 2025, the Pan-African Parliament hosted the Africa Digital Parliamentary Summit on Artificial Intelligence (AI), Data Protection and Privacy.⁵⁸⁶ The delegates declared their intention to create legislation to regulate AI in collaboration with civil society and AU departments, enhance science and technology education and fund "Digital Infrastructure, Research, Innovation and Development in AI."

On 20 August 2025, Union Commission Chairperson Mahmoud Ali Youssouf spoke with Japanese Prime Minister Shigeru Ishiba about African development, policy cooperation and collaboration on the African Union's Agenda 2063.⁵⁸⁷ Agenda 2063 includes priorities including renewable energy development and sustainable natural resource management.⁵⁸⁸

On 22 August 2025, South Africa, African Union, Japan and African Union member-states released the TICAD 9 Yokohama Declaration to "[c]o-create innovative solutions with Africa".⁵⁸⁹ The declaration includes a statement on cooperation for enhancing artificial intelligence governance and projects. It highlights the importance of continued collaboration between Japan and Africa in energy transition technologies and clean energy projects.

On 12 October 2025, the African Union Commission's Deputy Chairperson Selma Malika Haddadi and South Africa's Deputy Minister of International Relations and Cooperation Alvin Botes reaffirmed cooperation to support African development and shared frameworks such as Agenda 2063 and G20.⁵⁹⁰

On 10 October 2025, African Union and South Africa launched an Africa Energy Efficiency Facility to develop and enhance energy efficiency projects.⁵⁹¹

The African Union has partially complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. The African Union has advanced the combined welfare target through a partnership with Denmark and has taken action to support supply chains for energy transitions through the partnership, Continental Strategy for Sustainable Aviation Fuels, Low Carbon Aviation Fuels and African Green Hydrogen Strategy and Climate Resilient and Smart Infrastructure Policy.

Thus, the African Union receives a score of 0.

Analyst: Simeon Karakolev

European Union: +1

The European Union has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies.

On 5 December 2024, the European Union and Mercosur concluded negotiations on a new EU-Mercosur agreement which includes increasing support in renewable energy sectors, diversifying supply chains and securing raw materials for the green transition.⁵⁹²

On 14 January 2025, the European Commission published a report that suggests that EU states need to review outbound investments in key areas such as artificial intelligence, semiconductors and quantum technologies.⁵⁹³ The report highlights the importance of economic security for the EU.

On 15 January 2025, the European Investment Bank (EIB) gave a EUR1 billion loan to NXP Semiconductors.⁵⁹⁴ The loan will support NXP's semiconductor solutions and research in five EU member states and is part of broader investment by the EU into artificial intelligence, quantum computing and the digitalization of numerous industries.

On 16 January 2025, the EU and Mexico concluded negotiations on an updated Global Agreement which includes securing supply chains for raw materials.⁵⁹⁵ The agreement also includes advancements towards net-zero and development in sectors like telecommunications and e-commerce.

On 1 February 2025, the European Commission allocated EUR645 million from the Connecting Europe Facility towards Denmark and Germany's offshore wind energy project.⁵⁹⁶ The Bornholm Energy Island project

aims to integrate 3 gigawatts of wind energy within the European electricity grid by the next decade. This will support energy efficiency, the renewable energy transition and energy security within Europe.

On 5 February 2025, the European Union, the French Development Agency, the Indonesian Ministry of Energy and Mineral Resources and the National Electricity Company launched the 2025-2030 Indonesia Energy Transition Facility, under the Just Energy Transition Partnership Framework.⁵⁹⁷ This project will focus on developing and implementing renewable energy and transmission projects and ensuring appropriate public policies for the energy transition. The EU will provide EUR10.6 million and AFD will provide EUR4.1 million for this initiative.

On 23 February 2025, the European Commission approved a EUR227 million aid measure to support the construction of a wafer manufacturing facility in Austria.⁵⁹⁸ The measure will strengthen Europe's security of supply, resilience and technological autonomy in semiconductor technologies.

On 27 February 2025, the EIB Bank loaned EUR430 million to Portugal for a renewable hydrogen project and a biofuels project.⁵⁹⁹ The renewable hydrogen production unit project will be one of the first major operational hydrogen production units in the EU.

On 12 March 2025, President of the European Commission Ursula von der Leyen, President of the European Council António Costa and President of South Africa Cyril Ramaphosa signed a joint statement on various issues including supply chains and energy transition technologies.⁶⁰⁰ The members agreed to launch negotiations for a "Clean Trade and Investment Partnership." This partnership will include investment in raw materials supply chains and renewable energy projects.

On 24 March 2025, the European Commission adopted 47 Strategic Projects from 13 EU member states, including a focus on strategic raw materials.⁶⁰¹ The raw materials include lithium, nickel, cobalt, manganese, tungsten, magnesium and graphite. These extraction, processing or recycling projects all meet the EU's environmental and social governance criteria.

On 27 March 2025, the European Commission invested EUR1 billion in artificial intelligence technologies.⁶⁰² The Commission aims to promote the adoption of artificial intelligence within the public and private sectors as well as the creation of a digital Earth to support climate adaptation technologies.

On 28 March 2025, the EIB loaned EUR110 million to Banco del Estado de Chile for renewable energy investments and climate action.⁶⁰³ The loan specifies that mining companies and providers of critical raw

materials are eligible beneficiaries. The focus of the loan is on small and medium businesses to support the decarbonization of supply chains.

On 3 April 2025, the European Union, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan signed a joint declaration committing to further cooperation.⁶⁰⁴ The declaration includes cooperation on sustainable and diversified critical raw materials and supply chains. The EU also declared its support of “regional cooperation within Central Asia,” specifically for energy transition technologies and projects.

On 25 April 2025, the EIB and PGE Polska Grupa Energetyczna signed a EUR525 million loan agreement for Poland’s energy transition.⁶⁰⁵ The deal includes investments in photovoltaic installations and storage units. This supports Poland and the EU’s energy transition.

On 11 May 2025, the European Union and Japan held the third Digital Partnership Council to reinforce their technology cooperation.⁶⁰⁶ Both members agreed to collaborate on semiconductors, Artificial Intelligence and 5G/6G research. This will support both members diversification of responsible semiconductor supply chains.

On 19 May 2025, the European Union and the United Kingdom held the 2025 EU-UK Leaders’ Summit to discuss plans for cooperation.⁶⁰⁷ The summit affirmed energy cooperation between the two parties on a permanent basis and further discussion was held as to the UK’s role in the internal electricity market of the EU.

On 3 June 2025, the European Commission signed an agreement with the European Investment Bank (EIB) to renew support for innovative decarbonisation projects not covered by the Innovation Fund.⁶⁰⁸ Under the renewed agreement, the EIB will provide project development assistance to up to 250 projects until 2028.

On 15 June 2025, President of the European Commission Ursula von der Leyen urged G7 partners to boost cooperation on critical mineral supply chains, proposing joint action to diversify sourcing, invest in processing and coordinate policies in key sectors to cut dependencies and counter non-market practices.⁶⁰⁹

On 16 June 2025, the EIB announced EUR1.6 billion to finance the Bay of Biscay electricity interconnection between Spain and France.⁶¹⁰ The project will nearly double cross-border capacity from 2,800 megawatts (MW) to 5,000 MW.

On 17 June 2025, the G7, including the European Union, launched the G7 Critical Minerals Action Plan during the G7 Kananaskis Summit.⁶¹¹ It supports the diversification of critical mineral supply, investment in local value

creation and sustainable mining practices, to strengthen responsible and resilient critical mineral supply chains. The Action Plan was also endorsed by Australia, India and Korea.

On 20 June 2025, the EIB announced a financing ceiling of EUR100 billion for 2025 to boost investments in European security and defence, energy grids and technological leadership.⁶¹² The approved major projects span several countries including both European Union member states and third countries.

On 22 June 2025, the EU and Canada signed a Security and Defence Partnership to boost defence cooperation and launched talks on Canada's access to the EUR150 billion SAFE procurement instrument.⁶¹³ They also agreed to enhance critical raw materials trade with Canada and announced the EU-Canada Industrial Policy Dialogue to further strengthen supply chains in critical sectors.

On 24 June 2025, European Commission announced the Clean Industrial Deal a new State aid framework.⁶¹⁴ This will support green energy development and energy transition within EU member states.

On 30 June 2025, EIB announced a long-term credit facility of EUR450 million for construction and development of energy infrastructure in Northern Germany.⁶¹⁵ This investment in reliable energy transmission supports the European Union's energy transition.

On 2 July 2025, European Commission and EIB released EUR3.66 billion for energy related projects in Croatia, Czechia, Greece, Hungary, Latvia, Lithuania, Poland, Romania and Slovenia.⁶¹⁶ Energy related projects include investments in energy storage, energy efficiency and updating electricity grid and transmission for renewable energy.

On 3 July 2025, the EIB announced EUR50,000 for Kenya's National Hospital for an assessment to implement a photovoltaic system within the hospital's energy grid.⁶¹⁷

On 3 July 2025, the European Commission announced EUR852 million in grants for six electric vehicle battery manufacturing projects.⁶¹⁸ The investments aim to support the development of battery technologies and accelerate the growth of European battery manufacturing.

On 22 July 2025, six projects selected under the Innovation Fund 2023 general call for Net-Zero Technologies signed their Grant Agreements.⁶¹⁹ These projects will receive approximately EUR319 million in grants.

On 23 July 2025, the European Union and China issued a joint press statement on climate on the 50th anniversary of their diplomatic relations.⁶²⁰ The parties committed to accelerating global renewable energy deployment and increasing access to green technologies.

On 26 July 2025, European Union and United States agreed to a deal on tariffs and trade.⁶²¹ The parties agreed to “zero-for-zero” tariffs on strategic products including semiconductor equipment and critical raw materials.

On 28 July 2025, European Infrastructure Bank approved a EUR264 million loan to support the construction of gas pipelines dedicated to biomethane.⁶²² The project seeks to integrate biomethane plants into the Italian gas transmission network.

On 8 September 2025, the European Union and African Union launched two flagship programs aimed at accelerating the African Union’s just transition, namely the Continental Energy Program in Africa funded by the European Union and Engaging for Africa’s Green Energy Transition funded by Germany’s Ministry for Economic Cooperation and Development.⁶²³

On 8 September 2025, the European Union, French Development Agency and Ethiopia signed a EUR120 million loan and grant agreement to support Ethiopia’s green and digital transition.⁶²⁴ The funding will go towards renewable generation, electricity infrastructure and training schemes.

On 16 September 2025, European Commission announced EUR300 million for projects that meet Work Programme for Cluster Five.⁶²⁵ Cluster Five emphasizes sustainable, reliable, inclusive and responsible energy supply chains.

⁶²⁵ Horizon Europe Energy: over €300 million available to fund new energy research projects, European Commission (Brussels) 16 September 2025. Access Date: 18 October 2025. https://cinea.ec.europa.eu/news-events/news/horizon-europe-energy-over-eu300-million-available-fund-new-energy-research-projects-2025-09-16_en

On 23 September 2025, Indonesia and the European Union agreed to a Comprehensive Economic Partnership Agreement (CEPA), including provisions related to clean energy.⁶²⁶ The CEPA eliminates tariff and non-tariff barriers for clean energy technologies and infrastructures between the two members.

On 24 September 2025, the EIB announced an EUR380 million loan for BEN Berlin Energie und Netzholding and Stromnetz Berlin to modernize and transition Berlin's electricity infrastructure.⁶²⁷ This includes new digital components, power cables and renewable energy integration.

On 27 September 2025, European Commission revealed an EUR545 million package to support Africa's energy transition.⁶²⁸ The funding will be allocated to projects in Côte d'Ivoire, Cameroon, Republic of Congo, Lesotho, Ghana, Central Africa, Madagascar, Mozambique and Somalia for energy infrastructure, renewable energy projects and electrification of rural areas.

On 1 October 2025, the EIB and Intesa Sanpaolo signed an EUR500 million loan agreement and an EUR250 million counter-guarantee to finance renewable energy supply chains in Italy.⁶²⁹ The first loan aims to support renewable energy projects and storage. The counter-guarantee aims to generate new investment in wind industry and supply chain.

On 9 October 2025, European Commission announced EUR618 million package to develop Africa's renewable energy capacity.⁶³⁰ Half of the projects focus on electrification and energy infrastructure in Kenya, Uganda, Democratic Republic of Congo and Mauritania. The rest include renewable energy and storage projects in Togo, Cabo Verde, Nigeria and the Zambia-Tanzania interconnector power exchange project.

On 9 October 2025, European Commission and Team Europe announced an EUR430 million package to support the Bac Ai Pumped Hydro Storage Project.⁶³¹ The investment supports Vietnam's renewable energy integration as well as reliable and sustainable energy transmission.

The European Union has fully complied with its commitment to support reliable, diversified, sustainable and responsible supply chains for energy transitions, including for critical minerals and materials beneficiated at source, semiconductors and technologies. The EU's 47 Strategic Projects demonstrate investment in reliable, diversified and sustainable supply chains beneficiated at source. In addition, the EU has invested in multiple member states energy transition technologies, semiconductor research and facilities as well as critical minerals projects. The EU's projects and loans robust environmental and social criteria also help ensure responsible supply chains for energy transitions.

⁶³¹ EU reinforces support for Vietnam's Just Energy Transition with €430 million package, European Investment Bank (Luxembourg) 9 October 2025. Access Date: 18 October 2025. <https://www.eib.org/en/press/all/2025-377-eu-reinforces-support-for-vietnam-s-just-energy-transition-with-eur430-million-package>

Thus, European Union receives a score of +1.

Analyst: Michelle Kim

2. Development: Financial Support for Low- and Middle-Income Countries

“We [will] reaffirm our commitment in the New Delhi Leaders’ Declaration to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources and to provide strong support for the poorest countries.”

Background

Concessional finances, which are grants or loans given at preferential rates by financial institutions such as the World Bank, help to address fiscal inequalities and enable development in low- and middle-income countries (LMICs).⁶³² To this end, the World Bank’s concessional finance is essential to address “globally significant development challenges” including climate change, mitigation and resilience, healthcare, water and sanitation, and education and to achieve the Sustainable Development Goals (SDGs) set out by the United Nations. As such, G20 leaders have mentioned concessional financing or the World Bank in relation to development at G20 summits since the 2009 London Summit where they committed to using USD6 billion in flexible concessional finance to support the poorest countries worldwide.⁶³³

⁶³² What You Need to Know About Concessional Finance for Climate Action, The World Bank (Washington D.C.) 16 September 2021. Access Date: 14 March 2025. <https://www.worldbank.org/en/news/feature/2021/09/16/what-youneed-to-know-about-concessional-finance-for-climate-action>

⁶³³ London Summit – Leaders’ Statement, G20 Information Centre (Toronto) 2 April 2009. Access Date: 15 March 2025. <https://www.g20.utoronto.ca/2009/2009communique0402.html>

At the 2009 Pittsburgh Summit, G20 leaders reaffirmed their support of concessional financing to low-income countries and reiterated their commitment to supporting the Multilateral Development Banks (MDBs) such as the International Development Agency and African Development Fund to this end.⁶³⁴

At the 2010 Toronto Summit, G20 leaders reaffirmed their commitment to supporting and replenishing the MDBs' concessional lending facilities.⁶³⁵ G20 leaders also announced the successful completion of their 2009 Pittsburgh Summit commitment to provide the MDBs with USD350 billion in capital increases to support concessional lending.

At the 2012 Los Cabos Summit, G20 leaders recognized the importance of inclusive green growth and sustainable development to achieve economic and developmental goals.⁶³⁶ They also acknowledged the importance of social safety nets and both public and private sector investment for development, especially in developing countries.

At the 2013 St. Petersburg Summit, G20 leaders recognized the actions of the World Bank and Regional Development Banks to “catalyze additional financing for infrastructure investment, particularly in emerging markets and developing countries.”⁶³⁷ To this end, G20 leaders encouraged long-term investment financing and endorsed the G20-Organisation for Economic Co-operation and Development High-Level Principles of Long-Term Investment Financing by Institutional Investors.

At the 2014 Brisbane Summit, G20 leaders reaffirmed their commitment to supporting MDBs and encouraging national development banks to providing additional lending to low-income countries and pledged to improve infrastructure benefits for them.⁶³⁸ G20 leaders also welcomed the establishment of the World Bank Group's Global Infrastructure Facility which aims to increase “private sector investment in developing countries.”

At the 2019 Osaka Summit, G20 leaders recognized developing countries' efforts to achieve the SDGs and recognized the importance of innovative financing mechanisms such as public-private investments and blended finance to advance development.⁶³⁹

At the 2021 Rome Summit, G20 leaders reaffirmed their commitment to advancing the SDGs and ensuring equitable and sustainable recovery after the Covid-19 pandemic.⁶⁴⁰ G20 leaders also acknowledged the importance of MDBs to achieve the “high financing needs of low-income countries,” committing to replenishing MDBs to support this objective.

At the 2022 Bali Summit, G20 leaders committed to supporting the implementation of the SDGs by investing in innovative financing sources and instruments for LMICs and other developing countries.⁶⁴¹ G20 leaders also called on the MDBs to provide additional financing opportunities to address global challenges and promote sustainable development and infrastructure investments.

At the 2023 New Delhi Summit, G20 leaders committed to “collectively mobilize more headroom and concessional finance to boost the World Bank’s capacity to support low and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources and to provide strong support for the poorest countries.”⁶⁴² They also recognized the need for innovative financing mechanisms such as blended finance and risk-sharing facilities as well as concessional financing for developing countries to advance climate action and forest protection.

At the 2024 Rio Summit, G20 leaders reaffirmed their commitment made in the New Delhi Leaders’ Declaration “to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.”⁶⁴³ They emphasized the need for a clear framework to allocate limited concessional resources effectively while ensuring strong support for the poorest countries.

Commitment Features

The overarching welfare target of this commitment is to support the poorest, low- and middle-income countries to address a range of global challenges. To do so, G20 members have agreed to directly support the World Bank by taking action to collectively mobilize more 1) headroom finance, 2) concessional finance, based on 3) a clear framework for how such resources will be fairly allocated. There are therefore three criteria each G20 member must take strong action on in order to advance the welfare target. Only G20 members that contribute financially to the World Bank will be assessed for compliance, excluding the African Union which is a recipient institution that does not contribute to the World Bank.

Definitions and Concepts

“Reaffirm” is understood to mean to “affirm again” whereby affirm is to assert strongly, state as fact, confirm or ratify a judgment.⁶⁴⁴

“Mobilize” is understood to mean “to organize or prepare something, such as a group of people, for a purpose.”⁶⁴⁵ In the context of this commitment, it refers to the mobilization of headroom and concessional finance for the World Bank.

“More” refers to “a greater quantity, number, or amount.”⁶⁴⁶ G20 members are required to mobilize a greater number of resources in 2025, than in 2024, to achieve full compliance for the commitment. As the World Bank’s financial data is primarily focused on fiscal year distributions, this commitment will use fiscal year allocations, as well as calendar year allocations where available, to determine compliance. The World Bank’s fiscal year “begins on July 1st of the previous year and runs through June 30th of the designated year.”⁶⁴⁷

“Headroom” is understood to mean “any undrawn amount (i.e. amount remaining available) under a finance agreement.”⁶⁴⁸ “More headroom” is understood to mean an increase in the undrawn or unused amount remaining available to a country. More fiscal headroom, in terms of lending, refers to the increase in the lending capacity of a country towards another.

⁶⁴⁵ Mobilize, Oxford English Dictionary. Access Date: 28 February 2025. <https://dictionary.cambridge.org/dictionary/english/mobilize>

⁶⁴⁶ More, Merriam-Webster (Springfield) n.d. Access Date: 30 July 2025. <https://www.merriam-webster.com/dictionary/more>

⁶⁴⁷ Glossary, World Bank Group (Washington D.C.) n.d. Access Date: 30 July 2025. <https://financesone.worldbank.org/glossary>

⁶⁴⁸ Headroom, LexisNexis (New York) n.d. Access Date: 28 February 2025. <https://www.lexisnexis.co.uk/legal/glossary/headroom>

“Concessional finance” is understood to mean “below market rate finance provided by major financial institutions, such as development banks and multilateral funds, to developing countries to accelerate development objectives.”⁶⁴⁹

The World Bank Group is “an international development organization owned by 189 countries” that supports lending capacity for poorer countries to address global challenges and pursue development-related projects.⁶⁵⁰ The World Bank is comprised of the International Bank for Reconstruction and Development (IBRD) which “lends to low- and middle-income countries,” the International Development Association (IDA) which “lends to low-income countries,” the International Finance Corporation (IFC) which “lends to the private sector,” the Multilateral Investment Guarantee Agency (MIGA) which “encourages private companies to invest in foreign countries” and the International Centre for Settlement of Investment Disputes which manages dispute resolution.

The IDA is primarily funded through contributions by members during its replenishment processes.⁶⁵¹ The 21st replenishment (IDA21) will be used to finance initiatives between 1 July 2025-30 June 2028. Contributions to IDA21 will count towards compliance for this commitment.

“Upon joining the IBRD, each member is assigned shares issued at par value and pays (or can be called upon to pay) a capital subscription to the IBRD that is equal to its shareholdings.”⁶⁵² A capital subscription can be understood to mean “a sum of money given or pledged as a contribution, payment, investment, etc.” to belong to an organization.⁶⁵³ The IBRD expresses subscription amounts in “US dollars of the weight and fineness in effect on July 1, 1944.”⁶⁵⁴ For the purposes of this report, this amount will be referred to as USD[amount] (in 1944 currency).

Membership in the IFC is open to World Bank members and is accompanied with a subscription in capital stock.⁶⁵⁵ The IFC expresses subscription amounts in thousands of USD.

“Membership in MIGA requires subscription of capital stock.”⁶⁵⁶ MIGA expresses subscription amounts in Special Drawing Rights (SDR). “The SDR is an international reserve asset. The SDR is not a currency, but its value is based on a basket of five currencies – the US dollar, the euro, the Chinese renminbi, the Japanese yen, and the British pound sterling.”⁶⁵⁷

⁶⁵⁷ Special Drawing Rights, International Monetary Fund (Washington D.C.) n.d. Access Date: 5 August 2025. <https://www.imf.org/en/About/Factsheets/Sheets/2023/special-drawing-rights-sdr>

Additionally, the World Bank uses trusts funds to “complement core funding” for its institutions, for the purpose of mobilizing and directing “concessional resources to strategic development priorities and to mobilize the resources and capabilities of other development actors through partnership programs.”⁶⁵⁸

“Trust funds” are understood to mean “a financing arrangement set up with contributions from one or more development partners.” These funds include bank-executed trust funds, recipient-executed trust funds which have “third party executing agencies” and Financial Intermediary Funds that the World Bank is a trustee for.⁶⁵⁹

“Co-financing” is understood to mean arrangements in which “World Bank resources and third-party resources are deployed in a coordinated manner to World Bank operations.”⁶⁶⁰ Co-financing is key for mobilizing resources, supporting concessional lending, increasing “efficiencies through reduced transaction costs for client countries” and “leveraging the comparative advantages of co-financiers.”

“Low-and middle-income countries” are defined according to gross national income (GNI).⁶⁶¹ “For the current 2024 fiscal year, low-income economies are defined as those with a GNI per capita, calculated using the World Bank Atlas method, of [USD]1,135 or less in 2022. Lower middle-income economies are those with a GNI per capita between [USD]1,136 and [USD]4,465; upper middle-income economies are those with a GNI per capita between [USD]4,466 and [USD]13,845; high-income economies are those with a GNI per capita of [USD]13,846 or more, according to the World Bank Country and Lending Groups.”

“Global challenges” are understood to mean the challenges faced by all countries related to poverty, climate change, inequality, peace, justice and environmental degradation.⁶⁶²

“Scarce” is understood to mean “deficient in quantity or number compared with the demand.”⁶⁶³

“Concessional resources” is understood to mean debt as lending extended by creditors at terms that are below the market.⁶⁶⁴

“Strong support” is understood to mean financial support that “can take the following forms: grants, interest-free loans or equity investments, and can be referred to as foreign aid, humanitarian assistance, development aid or official development aid.”⁶⁶⁵

“Poorest countries” is understood to mean “low-income countries confronting severe structural impediments to sustainable development. They are highly vulnerable to economic and environmental shocks and have low levels of human assets.”⁶⁶⁶

General Interpretive Guidelines

Full compliance, or a score of +1, will be given to a G20 member that takes strong action in all three of the commitment criteria which require G20 members to collectively mobilize more 1) headroom finance and 2) concessional finance, based on 3) a clear framework for how such resources will be fairly allocated. Actions taken towards this commitment must support the overarching welfare target of supporting the poorest, low- and middle-income countries to address a range of global challenges.

To achieve full compliance, a G20 member must mobilize more headroom finance across at least three of the following five components of the World Bank: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds. Examples of mobilizing more headroom finance include increasing core contributions to the IFC, IBRD or MIGA, contributing more to the IDA's 21st replenishment than the 20th replenishment, increasing funding for the World Bank's trust funds and co-financing initiatives with World Bank institutions, including the IDA and IFC, to support low- and middle-income countries in addressing global challenges. Examples of strong action to mobilize more concessional finance include contributing to the World Bank's Executive Board of Directors meetings to approve concessional loans, grants or equity investments for the poorest LMICs, unlocking new concessional financing for the World Bank to increase its concessional lending capacity, implementing debt relief programs through the World Bank and co-financing initiatives to provide concessional loans to LMICs. Co-financing through multilateral funds which include a G20 member on its Board of Directors will also count towards compliance. For this commitment, a clear framework for the allocation of scarce concessional resources can include an extension of a current framework or the development of a new framework that provides new solutions for financing.

Partial compliance, or a score of 0, will be assigned to a G20 member that takes strong action across two of the three commitment criteria or weak action across all three criteria to collectively mobilize more 1) headroom finance and 2) concessional finance, based on 3) a clear framework for how such resources will be fairly allocated. Examples of actions that count towards partial compliance include verbal reaffirmations of support towards the commitment and informal discussions regarding a clear framework for resources. A G20 member that maintains its contribution across three of the five components of the World Bank or increases its contribution in two of the five components will also receive partial compliance.

Non-compliance, or a score of -1, will be assigned if the G20 member fails to take action towards the commitment, takes weak action in two or less of the three criteria, does not take action to directly support the World Bank, or takes action that is directly and explicitly antithetical to the commitment. A G20 member that decreases its funding for more than two of the five components of the World Bank will receive a score of non-compliance.

Scoring Guidelines

-1	The G20 member does not take action in any of the three commitment areas, takes weak action in two or fewer of the three criteria, does not take action to directly support the World Bank, or takes action that is directly and explicitly antithetical to the commitment.
0	The G20 member takes strong action across two of the three commitment criteria or weak action across all three criteria to collectively mobilize more 1) headroom finance and 2) concessional finance, based on 3) a clear framework for how such resources will be fairly allocated AND takes weak or strong action to directly support the World Bank.
+1	The G20 member takes strong action in all three of the commitment criteria which require G20 members to collectively mobilize more 1) headroom finance and 2) concessional finance, based on 3) a clear framework for how such resources will be fairly allocated AND takes strong action to directly support the World Bank.

Compliance Director and Lead Analyst: Ridhima Sinha

Argentina: 0

Argentina has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for Argentina, Bolivia, Chile, Paraguay, Peru and Uruguay Olga Fuentes and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.⁶⁶⁷ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.⁶⁶⁸ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 11 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved USD20 million in International Development Association (IDA) credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.⁶⁶⁹ This will support new hydropower projects, early warning systems and increased resilience.

On 12 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved USD240 million for a second water and sewerage project in Karachi, Pakistan.⁶⁷⁰ Funded through the IBRD, this project aims to improve water, sanitation and hygiene services in the city.

On 12 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved USD325.10 million for a project to support climate-resilient agriculture and farmers in Uttar Pradesh, India.⁶⁷¹ Funded through the IBRD, this project aims to improve value chains, access to finance and encourage private investment. France will also financially support this initiative.

On 12 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved USD100 million in IDA credit for Nepal's second development policy operation.⁶⁷² This will support environmental resilience, sustainability and development.

On 13 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved a USD110 million IDA credit for Kiribati.⁶⁷³ This will support sustainable economic development on the island through improving infrastructure, including enhancing climate resilience and emergency preparedness and response.

On 17 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved a USD350 million IDA grant for a hydropower project in Tajikistan.⁶⁷⁴ The project will support access to reliable and sustainable electricity in the country and Central Asia. The project will be co-financed by several institutions including USD550 million from the European Investment Bank and USD100 million from the Saudi Fund for Development.⁶⁷⁵

On 19 December 2024, Executive Director Fuentes and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and "increase power transmission capacity to southern regions of Tanzania."⁶⁷⁶ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Fuentes and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.⁶⁷⁷ The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Fuentes and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.⁶⁷⁸ This will support "education, health and social protection services" in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.⁶⁷⁹

On 14 January 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.⁶⁸⁰ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.⁶⁸¹ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.⁶⁸²

On 28 January 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.⁶⁸³ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 14 March 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved a USD31 million IDA project for Djibouti.⁶⁸⁴ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA’s Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.⁶⁸⁵ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan’s new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.⁶⁸⁶ This project

aims to accelerate development by improving public institutions through career development and training, better management and “a human resource certification system.”

On 24 March 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.⁶⁸⁷ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany’s KfW Development Bank.

On 26 March 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved a USD200 million IDA credit for Bangladesh’s project to improve social protection and resilience for vulnerable groups.⁶⁸⁸ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 28 March 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved a USD300 million IDA credit for Pakistan.⁶⁸⁹ This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 28 March 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved a USD150 million IDA credit for Nepal’s bridge systems project.⁶⁹⁰ The project aims to improve bridge infrastructure to ensure resilience and connectivity across the country, given its rough terrain.

On 4 April 2025, Executive Director Fuentes and the World Bank’s Board of Executive Directors approved an IDA credit worth USD200 million for the Guinea Water and Sanitation Project.⁶⁹¹ The European Investment Bank will provide a EUR220 million loan and the European Union will provide a EUR26 million grant to co-finance this initiative which aims to improve water, sanitation, and hygiene in Guinea. Argentina’s representative at the Global Environmental Facility Council Mauricio Gonzales and the Global Environmental Facility Council also approved USD10.092 million in co-financing for this project.⁶⁹²

On 15 April 2025, Minister of Economy Luis Andres Caputo and the IDA’s Board of Governors adopted resolution 255, approving a report authorizing additional contributions and guarantees for the IDA’s 21st replenishment (IDA21).⁶⁹³ The report was adopted as approved by the World Bank’s Board of Executive Directors on 17 March 2025 and notes that Argentina will contribute USD12.5 million to IDA21 between 1

Policy Financing, aimed at restoring fiscal sustainability, stabilising the financial sector and improving energy-sector discipline.⁷³³

On 30 June 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the International Finance Corporation (IFC), noting that Argentina has a total subscription amount of USD323,320,000.⁷³⁴ This amount is the same as Argentina's subscription amount from 15 April 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.⁷³⁵

On 30 June 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the Multilateral Investment Guarantee Agency (MIGA), noting that Argentina has a total subscription amount of SDR22.1 million.⁷³⁶ This amount is the same as Argentina's subscription amount from 30 June 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.⁷³⁷

On 1 July 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the IBRD, noting that Argentina has a total subscription amount of USD2,889.7 million (in 1944 currency).⁷³⁸ This is an increase in the total subscription amount from 17 May 2024, which was USD2806 million (in 1944 currency).⁷³⁹ Therefore, Argentina has mobilized more headroom finance for the IBRD.

On 3 July 2025, Executive Director Fuentes and the World Bank's Board of Executive Directors approved USD1 billion for the Second Sustainable and Inclusive Growth Development Policy Operation (DPO) for Ethiopia, consisting of a USD650 million in IDA grant and USD350 million in concessional credit, to advance the country's transition to a private-sector-led, inclusive growth model.⁷⁴⁰ The DPO aims to deepen economic reforms, improve financial intermediation and expand social-protection and human-capital programmes for the poor.

On 11 July 2025, Executive Director Fuentes and the World Bank's Board of Executive Directors approved a USD2.97 million grant to support Djibouti in enhancing education and care for children with disabilities.⁷⁴¹

Argentina has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Argentina has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address a number of development challenges in these countries. Argentina has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions to IDA21 and the IBRD and co-financing World Bank initiatives through the Global Environmental Facility. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Argentina receives a score of 0.

Analyst: Will Makris

Australia: 0

Australia has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 22 November 2024, the World Bank released a report outlining recommendations and an action plan for Vietnam's electric mobility roadmap.⁷⁵⁵ This report received funding from the Australian government under the Australia-World Bank Strategic Partnership, underscoring Australia's role in supporting Vietnam's green energy transformation efforts.

On 26 November 2024, Executive Director for Australia, Korea and other members Robert Bruce Nicholl and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.⁷⁵⁶ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.⁷⁵⁷ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 5 December 2024, Australia's representative Mark Lloyd and the Gavi, the Vaccine Alliance Board approved changes to support the sustainability of immunization programmes.⁷⁵⁸ This includes updating its

On 19 December 2024, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and "increase power transmission capacity to southern regions of Tanzania."⁷⁶⁶ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.⁷⁶⁷ The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.⁷⁶⁸ This will support "education, health and social protection services" in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.⁷⁶⁹

On 14 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD257.8 million in financing for the "Second Greater Beirut Water Supply Project" in Lebanon.⁷⁷⁰ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.⁷⁷¹ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.⁷⁷²

On 28 January 2025, Executive Director Nicholl and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.⁷⁷³ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 14 March 2025, Executive Director Nicholl and the World Bank’s Board of Executive Directors approved a USD31 million IDA project for Djibouti.⁷⁷⁴ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA’s Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Nicholl and the World Bank’s Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.⁷⁷⁵ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan’s new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Nicholl and the World Bank’s Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.⁷⁷⁶ This project aims to accelerate development by improving public institutions through career development and training, better management and “a human resource certification system.”

On 24 March 2025, Executive Director Nicholl and the World Bank’s Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.⁷⁷⁷ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany’s KfW Development Bank.

On 25 March 2025, Treasurer Jim Chalmers delivered the 2025-2026 federal budget to Parliament.⁷⁷⁸ The budget notes that Australia will contribute AUD660 million to the IDA’s 21st replenishment (IDA21) over the

On 7 October 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD500 million in financing for the Building Resilient Digital Infrastructure for Growth Project and USD250 million for Phase II of the Health Security Program in Western and Central Africa, Nigeria.⁸⁴⁷ These projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 22 October 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.⁸⁴⁸ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.⁸⁴⁹ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.⁸⁵⁰ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Australia has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Australia has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Australia has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions to IDA21 and the World Bank's trust funds, co-financing through the Global Environmental Facility and by maintaining its contribution amount for the IBRD, IFC and MIGA. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Australia receives a score of 0.

Analyst: Karissa Cruz

Brazil: 0

Brazil has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for Brazil, Colombia, Dominican Republic, Ecuador, Haiti, Panama, Philippines, Suriname and Trinidad and Tobago Marcos Chiliatto and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.⁸⁵¹ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.⁸⁵² This will help address economic and gender disparities and stimulate growth in the Indian state.

On 11 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD20 million in International Development Association (IDA) credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.⁸⁵³ This will support new hydropower projects, early warning systems and increased resilience.

On 12 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD240 million for a second water and sewerage project in Karachi, Pakistan.⁸⁵⁴ Funded through the IBRD, this project aims to improve water, sanitation and hygiene services in the city.

On 12 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD325.10 million for a project to support climate-resilient agriculture and farmers in Uttar Pradesh, India.⁸⁵⁵ Funded through the IBRD, this project aims to improve value chains, access to finance and encourage private investment. France will also financially support this initiative.

On 12 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD100 million in IDA credit for Nepal's second development policy operation.⁸⁵⁶ This will support environmental resilience, sustainability and development.

On 13 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD110 million IDA credit for Kiribati.⁸⁵⁷ This will support sustainable economic development on the island through improving infrastructure, including enhancing climate resilience and emergency preparedness and response.

On 17 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD350 million IDA grant for a hydropower project in Tajikistan.⁸⁵⁸ The project will support access to reliable and sustainable electricity in the country and Central Asia. The project will be co-financed by several institutions including USD550 million from the European Investment Bank and USD100 million from the Saudi Fund for Development.⁸⁵⁹

On 19 December 2024, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and "increase power transmission capacity to southern regions of Tanzania."⁸⁶⁰ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.⁸⁶¹ The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.⁸⁶² This will support "education, health and social protection

services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.⁸⁶³

On 14 January 2025, Executive Director Chiliatto and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.⁸⁶⁴ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Chiliatto and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.⁸⁶⁵ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.⁸⁶⁶

On 28 January 2025, Executive Director Chiliatto and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.⁸⁶⁷ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 27 February 2025, Secretary of Public Integrity Livia Oliveira and the Climate Investment Fund (CIF)’s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and USD5 million grants for the India Investment Plan.⁸⁶⁸ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD’s offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the International Financial Corporation (IFC)’s battery storage system project. This approval marks the mobilization of headroom finance to increase World Bank’s capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 28 February 2025, Secretary Oliveira and the CIF’s Strategic Climate Fund (SCF) Committee approved financing for several climate-related development projects.⁸⁶⁹ This includes USD35.66 million in co-financing for the World Bank and African Development Bank’s project for regenerative agriculture and ecosystems in Kenya. The SCF Committee also approved USD60.35 million in co-financing for a land use planning, biodiversity and forest restoration project in Namibia, Malawi, Mozambique, Tanzania, Zambia, with the World Bank and African Development Bank co-financing. This approval marks the mobilization of headroom finance

to increase World Bank's capacity to address global challenges. It is also expected to result in significant private sector investment.

On 14 March 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.⁸⁷⁰ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.⁸⁷¹ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.⁸⁷² This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.⁸⁷³ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.⁸⁷⁴ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 28 March 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD300 million IDA credit for Pakistan.⁸⁷⁵ This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 30 September 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD141 million Disaster Risk Management Development Policy Financing with a Catastrophe Deferred Drawdown Option for Rwanda.⁹³⁶

On 30 September 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD145 million loan for the Integrated Resilient Development Project in Viet Nam to strengthen flood protection and transport connectivity in Da Nang City and Gia Lai Province.⁹³⁷

On 7 October 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD500 million in financing for the Building Resilient Digital Infrastructure for Growth Project and USD250 million for Phase II of the Health Security Program in Western and Central Africa, Nigeria.⁹³⁸ These projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 22 October 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.⁹³⁹ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.⁹⁴⁰ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Chiliatto and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.⁹⁴¹ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Brazil has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Brazil has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries.

⁹⁴¹ World Bank Approves New Financing to Enhance Climate Change Mitigation and Adaptation in Sierra Leone, World Bank Group (Washington D.C.) 30 October 2025. Access Date: 16 November 2025. <https://www.worldbank.org/en/news/press-release/2025/10/31/world-bank-approves-new-financing-to-enhance-climate-change-mitigation-and-adaptation-in-sierra-leone>

Brazil has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions to IDA21 and the IFC and by maintaining its contribution amount for MIGA and the IBRD. Brazil has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF and CTF Committees which have supported several World Bank, IBRD and IFC projects. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Brazil receives a score of 0.

Analysts: Ridhima Sinha and Alia Sagermann

Canada: 0

Canada has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for Canada, Ireland and other members Katharine Rechico and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.⁹⁴² This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Rechico and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.⁹⁴³ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 5 December 2024, Canada's representative Ruth Lawson and the Gavi, the Vaccine Alliance Board approved changes to support the sustainability of immunization programmes.⁹⁴⁴ This includes updating its eligibility and co-financing model to ensure targeted support measures and support lower middle income and International Development Association (IDA)-recipient countries.

On 11 December 2024, Executive Director Rechico and the World Bank's Board of Executive Directors approved USD20 million in IDA credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.⁹⁴⁵ This will support new hydropower projects, early warning systems and increased resilience.

Access Date: 17 July 2025. <https://www.worldbank.org/en/news/press-release/2025/06/27/world-bank-provides-ghana-360-million-to-strengthen-macroeconomic-stability-and-lay-the-foundations-for-resilient-growth>

¹⁰¹⁷ INTERNATIONAL FINANCE CORPORATION SUBSCRIPTIONS AND VOTING POWER OF MEMBER COUNTRIES, World Bank Group (Washington D.C.) 30 June 2025. Access Date: 3 August 2025. <https://thedocs.worldbank.org/en/doc/c80cbb3c6ece4fa9d06109541cef7d34-0330032021/original/IFCCountryVotingTable.pdf>

same as Canada's subscription amount from 15 April 2024.¹⁰¹⁸ This amount does not include Canada's co-financing initiatives with the IFC.

On 30 June 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the Multilateral Investment Guarantee Agency (MIGA), noting that Canada has a total subscription amount of SDR52.25 million.¹⁰¹⁹ This amount is the same as Canada's subscription amount as of 30 June 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.¹⁰²⁰

On 30 June 2025, the World Bank Group's Finances One updated its Trust Funds Contribution by Donors visualization, based on the Contributions (Receipts) to Trust Funds dataset.¹⁰²¹ The data reveals that Canada decreased its contribution to the World Bank's trust funds from USD517,967,328 in fiscal year 2024 to USD417,743,606 in fiscal year 2025, thereby constituting an action that is antithetical to the commitment's objective of mobilizing more headroom finance for the World Bank. This amount includes CAD12,450,000 deposited for the District and Community Health Services Multi-Donor Trust Fund on 26 February 2025.

On 1 July 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the IBRD, noting that Canada has a total subscription amount of USD7,045.5 million (in 1944 currency).¹⁰²² This amount is the same as Canada's subscription amount as of 17 May 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.¹⁰²³

On 3 July 2025, Executive Director Rechico and the World Bank's Board of Executive Directors approved USD1 billion for the Second Sustainable and Inclusive Growth Development Policy Operation (DPO) for Ethiopia, consisting of a USD650 million in IDA grant and USD350 million in concessional credit, to advance the country's transition to a private-sector-led, inclusive growth model.¹⁰²⁴ The DPO aims to deepen economic reforms, improve financial intermediation and expand social-protection and human-capital programmes for the poor.

On 11 July 2025, Executive Director Rechico and the World Bank's Board of Executive Directors approved a USD2.97 million grant to support Djibouti in enhancing education and care for children with disabilities.¹⁰²⁵

services in Mongolia.¹⁰³⁸ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Rechico and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.¹⁰³⁹ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Rechico and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹⁰⁴⁰ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Canada has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Canada has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Canada has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions to IDA21 and the IFC through subscriptions and co-financing, while maintaining its contribution amount for MIGA and the IBRD. Canada has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF and CTF Committees which have supported several World Bank, IBRD and IFC projects. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Canada receives a score of 0.

Analyst: Karissa Cruz

China: +1

China has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for China Jiandi Ye and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD)

develop a climate-resilient health system in Kerala, India.¹¹²⁹ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Ye and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹¹³⁰ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

China has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. China has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. China has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has mobilized more headroom finance to support the World Bank's capacity through increased contributions to IDA21, the IFC and the World Bank's trust funds, including a USD50 million contribution to the China-World Bank Group Partnership Facility. China has also maintained its contribution amount for MIGA and the IBRD and mobilized more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives.

Thus, China receives a score of +1.

Analyst: Will Makris

France: +1

France has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for France Arnaud Buissé and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹¹³¹ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

on the island through improving infrastructure, including enhancing climate resilience and emergency preparedness and response.

On 17 December 2024, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD350 million IDA grant for a hydropower project in Tajikistan.¹¹³⁹ The project will support access to reliable and sustainable electricity in the country and Central Asia. The project will be co-financed by several institutions including USD550 million from the European Investment Bank and USD100 million from the Saudi Fund for Development.¹¹⁴⁰

On 19 December 2024, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and “increase power transmission capacity to southern regions of Tanzania.”¹¹⁴¹ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹¹⁴² The changes aim to improve the independence, “effectiveness, efficiency and functioning of the accountability process” through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹¹⁴³ This will support “education, health and social protection services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹¹⁴⁴

On 14 January 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved USD257.8 million in financing for the "Second Greater Beirut Water Supply Project" in Lebanon.¹¹⁴⁵ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Buissé and the World Bank's Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹¹⁴⁶ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹¹⁴⁷

On 28 January 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹¹⁴⁸ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 14 February 2025, President Emmanuel Macron promulgated Law No. 2025-127, also known as the Finance Act for 2025. Article 165 of the Act authorizes the Ministry of Economy to provide a EUR300 million guarantee to the IDA, covering principal, interest and other charges for its loans and grants.¹¹⁴⁹ This allocation is subject to an agreement between the IDA and France regarding the terms and conditions of the guarantee.

On 27 February 2025, France's representative Pierre Marc and the Climate Investment Fund (CIF)'s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and USD5 million grants for the India Investment Plan.¹¹⁵⁰ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD's offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the International Financial Corporation (IFC)'s battery storage system project. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 14 March 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹¹⁵¹ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹¹⁵² This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹¹⁵³ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹¹⁵⁴ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.¹¹⁵⁵ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 28 March 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD300 million IDA credit for Pakistan.¹¹⁵⁶ This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 28 March 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD150 million IDA credit for Nepal's bridge systems project.¹¹⁵⁷ The project aims to improve bridge infrastructure to ensure resilience and connectivity across the country, given its rough terrain.

On 4 April 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved an IDA credit worth USD200 million for the Guinea Water and Sanitation Project.¹¹⁵⁸ The European Investment Bank will provide a EUR220 million loan and the European Union will provide a EUR26 million grant to co-

finance this initiative which aims to improve water, sanitation, and hygiene in Guinea. Senior Advisor for Climate and Environment Stephane Cieniewski and the Global Environmental Facility Council also approved USD10.092 million in co-financing for this project.¹¹⁵⁹

On 15 April 2025, Minister of Economy, Finance and Industrial and Digital Sovereignty Eric Lombard and the IDA's Board of Governors adopted resolution 255, approving a report authorizing additional contributions and guarantees for the IDA's 21st replenishment (IDA21).¹¹⁶⁰ The report was adopted as approved by the World Bank's Board of Executive Directors on 17 March 2025 and notes that France will contribute EUR1,170 million to IDA21 between 1 July 2025 and 30 June 2028. France will also provide a EUR300 million portfolio guarantee for IDA21. In sum, this marks an increase from France's pledge of EUR1,457.21 million for IDA20, thereby mobilizing more headroom finance for the IDA.¹¹⁶¹

On 18 April 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved USD121 million in IDA for the first phase of the Kyrgyz Republic Water Supply and Sanitation Universal Access Program.¹¹⁶² This funding package includes a USD50 million line of credit co-financed by the Asian Infrastructure Investment Bank.

On 18 April 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved USD120 million to develop a sustainable finance market for micro, small and medium sized enterprises in Kyrgyzstan.¹¹⁶³

On 19 April 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD50 million grant for the second phase of Haiti's Resilient Landscape Project which aims to integrate agriculture, environmental conservation and water management to improve food security, boost livelihoods and build climate resilience in Haiti.¹¹⁶⁴

On 24 April 2025, Minister Lombard spoke at the World Bank Development Committee's 111th Meeting, confirming that France will contribute EUR1,170 million to IDA21 alongside a EUR300 million portfolio guarantee.¹¹⁶⁵ Minister Lombard shared that France is the first country to announce its portfolio guarantee contribution for the IDA and encouraged other members to follow suit.

develop a climate-resilient health system in Kerala, India.¹²²⁵ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Buissé and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹²²⁶ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

France has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. France has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. France has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has mobilized more headroom finance to support the World Bank's capacity through increased contributions to IDA21, the IFC and the World Bank's trust funds, while maintaining its contribution amount for MIGA and the IBRD. France has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's CTF Committee which has supported World Bank, IBRD and IFC projects.

Thus, France receives a score of +1.

Analyst: Ronan Hasan

Germany: 0

Germany has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for Germany Michael Krake and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹²²⁷ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 1 December 2024, Head of Division 122 for Agriculture and Rural Development at the Ministry for Economic Cooperation and Development Jens Busma and the IBRD's Director of Trust Funds and Partner Relations Maitreyi B Das amended a contribution agreement between Germany and the Consultative Group

services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹²⁴¹

On 14 January 2025, Executive Director Krake and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.¹²⁴² This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Krake and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹²⁴³ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹²⁴⁴

On 28 January 2025, Executive Director Krake and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹²⁴⁵ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 27 February 2025, Germany’s representative Laura Schmidt and the Climate Investment Fund (CIF)’s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and USD5 million grants for the India Investment Plan.¹²⁴⁶ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD’s offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the International Financial Corporation (IFC)’s battery storage system project. This approval marks the mobilization of headroom finance to increase World Bank’s capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 28 February 2025, representative Schmidt and the CIF’s Strategic Climate Fund (SCF) Committee approved financing for several climate-related development projects.¹²⁴⁷ This includes USD35.66 million in co-financing for the World Bank and African Development Bank’s project for regenerative agriculture and ecosystems in Kenya. The SCF Committee also approved USD60.35 million in co-financing for a land use planning, biodiversity and forest restoration project in Namibia, Malawi, Mozambique, Tanzania, Zambia, with the World

Bank and African Development Bank co-financing. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. It is also expected to result in significant private sector investment.

On 14 March 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹²⁴⁸ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹²⁴⁹ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹²⁵⁰ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹²⁵¹ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.¹²⁵² This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 28 March 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD300 million IDA credit for Pakistan.¹²⁵³ This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 28 March 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD150 million IDA credit for Nepal's bridge systems project.¹²⁵⁴ The project aims to improve bridge infrastructure to ensure resilience and connectivity across the country, given its rough terrain.

On 4 April 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved an IDA credit worth USD200 million for the Guinea Water and Sanitation Project.¹²⁵⁵ The European Investment Bank will provide a EUR220 million loan and the European Union will provide a EUR26 million grant to co-finance this initiative which aims to improve water, sanitation, and hygiene in Guinea. Head of the Climate Finance Division at the Ministry for Economic Cooperation and Development Annette Windmeisser and the Global Environmental Facility Council also approved USD10.092 million in co-financing for this project.¹²⁵⁶

On 15 April 2025, Minister for Economic Cooperation and Development Svenja Schulze and the IDA's Board of Governors adopted resolution 255, approving a report authorizing additional contributions and guarantees for the IDA's 21st replenishment (IDA21).¹²⁵⁷ The report was adopted as approved by the World Bank's Board of Executive Directors on 17 March 2025 and notes that Germany will contribute EUR1,617.93 million to IDA21 between 1 July 2025 and 30 June 2028. This contribution is the same as Germany's pledge for IDA20, thereby partially complying with the commitment's goal to mobilize more headroom finance for the IDA.¹²⁵⁸

On 18 April 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD121 million in IDA for the first phase of the Kyrgyz Republic Water Supply and Sanitation Universal Access Program.¹²⁵⁹ This funding package includes a USD50 million line of credit co-financed by the Asian Infrastructure Investment Bank.

On 18 April 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD120 million to develop a sustainable finance market for micro, small and medium sized enterprises in Kyrgyzstan.¹²⁶⁰

On 19 April 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD50 million grant for the second phase of Haiti's Resilient Landscape Project which aims to integrate

On 30 June 2025, the World Bank Group's Finances One updated its Trust Funds Contribution by Donors visualization, based on the Contributions (Receipts) to Trust Funds dataset.¹³⁰² The data reveals that Germany decreased its contribution to the World Bank's trust funds from USD1,147,928,944 in fiscal year 2024 to USD1,571,737,025 in fiscal year 2025, thereby mobilizing more headroom finance for the World Bank. This includes EUR25 million for the Consultative Group on International Agricultural Research Trust Fund, as announced on 1 December 2024.

On 1 July 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the IBRD, noting that Germany has a total subscription amount of USD11,857.8 million (in 1944 currency).¹³⁰³ This amount is the same as Germany's subscription amount from 17 May 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.¹³⁰⁴

On 1 July 2025, Germany, as a donor state of the Joint Capital Markets Program fund of the World Bank, announced the launch of sustainability-linked finance measures in Côte d'Ivoire.¹³⁰⁵ Through the program, Côte d'Ivoire can borrow funds through the program with specific climate targets and indicators, allowing the country to mobilize capital at low costs through the implementation of environmental measures.

On 3 July 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD1 billion for the Second Sustainable and Inclusive Growth Development Policy Operation (DPO) for Ethiopia, consisting of a USD650 million IDA and USD350 million concessional credit, to advance the country's transition to a private-sector-led, inclusive growth model.¹³⁰⁶ The DPO aims to deepen economic reforms, improve financial intermediation and expand social-protection and human-capital programmes for the poor.

On 11 July 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD2.97 million grant to support Djibouti in enhancing education and care for children with disabilities.¹³⁰⁷ The funding is intended to assist families by ensuring that children with disabilities receive early support and the resources needed to thrive throughout their learning journey.

On 17 July 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD127.5 million IDA investment for the Second Kenya Social and Economic Inclusion Project, aimed at strengthening Kenya's social-protection systems and extending safety-net support to 12 million vulnerable citizens.¹³⁰⁸

On 30 September 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD145 million loan for the Integrated Resilient Development Project in Viet Nam to strengthen flood protection and transport connectivity in Da Nang City and Gia Lai Province.¹³¹⁶

On 7 October 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD500 million in financing for the Building Resilient Digital Infrastructure for Growth Project and USD250 million for Phase II of the Health Security Program in Western and Central Africa, Nigeria.¹³¹⁷ These projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 15 October 2025, Minister for Economic Cooperation and Development Reem Alabali Radovan announced EUR15 million in funding for Ukraine's Recovery Trust Fund during meetings at the World Bank.¹³¹⁸

On 22 October 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.¹³¹⁹ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.¹³²⁰ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Krake and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹³²¹ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Germany has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Germany has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries.

Germany has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions to the World Bank's trust funds and the IDA through its 21st replenishment and co-financing through the KfW Development Bank, while maintaining its contribution amount for the IFC, MIGA and the IBRD. Germany has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF and CTF Committees which have supported several World Bank, IBRD and IFC projects. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Germany receives a score of 0.

Analyst: Lorenzo Songsare Sherry

India: +1

India has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for India, Bangladesh, Bhutan and Sri Lanka Parameswaran Iyer and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹³²² This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Iyer and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.¹³²³ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 11 December 2024, Executive Director Iyer and the World Bank's Board of Executive Directors approved USD20 million in International Development Association (IDA) credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.¹³²⁴ This will support new hydropower projects, early warning systems and increased resilience.

On 8 January 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹³³² The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹³³³ This will support "education, health and social protection services" in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹³³⁴

On 14 January 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved USD257.8 million in financing for the "Second Greater Beirut Water Supply Project" in Lebanon.¹³³⁵ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Iyer and the World Bank's Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹³³⁶ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹³³⁷

On 28 January 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹³³⁸ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 27 February 2025, India's representative Hemang Priyavadan Jani and the Climate Investment Fund (CIF)'s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and USD5

million grants for the India Investment Plan.¹³³⁹ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD's offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the International Financial Corporation (IFC)'s battery storage system project. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 14 March 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹³⁴⁰ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹³⁴¹ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹³⁴² This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Fuentes and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹³⁴³ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Iyer and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.¹³⁴⁴ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

support for the poorest countries. India has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. India has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has mobilized more headroom finance to support the World Bank's capacity through increased contributions to IDA21, the IFC and the World Bank's trust funds, while maintaining its contribution amount for MIGA and the IBRD. India has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's CTF Committee which has supported several World Bank, IBRD and IFC projects.

Thus, India receives a score of +1.

Analyst: Jubi Kosamia

On 8 January 2025, Executive Director Saputra and the World Bank’s Board of Executive Directors approved changes to the World Bank’s Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹⁴²² The changes aim to improve the independence, “effectiveness, efficiency and functioning of the accountability process” through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment’s focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Saputra and the World Bank’s Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹⁴²³ This will support “education, health and social protection services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹⁴²⁴

On 14 January 2025, Executive Director Saputra and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.¹⁴²⁵ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Saputra and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹⁴²⁶ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹⁴²⁷

On 28 January 2025, Executive Director Saputra and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹⁴²⁸ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 14 March 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹⁴²⁹ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹⁴³⁰ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹⁴³¹ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹⁴³² This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.¹⁴³³ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 28 March 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved a USD300 million IDA credit for Pakistan.¹⁴³⁴ This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 30 September 2025, Executive Director Saptura and the World Bank's Board of Executive Directors approved a USD145 million loan for the Integrated Resilient Development Project in Viet Nam to strengthen flood protection and transport connectivity in Da Nang City and Gia Lai Province.¹⁴⁹⁶

On 7 October 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved USD500 million in financing for the Building Resilient Digital Infrastructure for Growth Project and USD250 million for Phase II of the Health Security Program in Western and Central Africa, Nigeria.¹⁴⁹⁷ These projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 22 October 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.¹⁴⁹⁸ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.¹⁴⁹⁹ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Saputra and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹⁵⁰⁰ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Indonesia has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Indonesia has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Indonesia has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity by maintaining its contributions for the IDA, IFC, IBRD and MIGA. Indonesia has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives. However, it has not increased its contributions across at least three of the five

¹⁵⁰⁰ World Bank Approves New Financing to Enhance Climate Change Mitigation and Adaptation in Sierra Leone, World Bank Group (Washington D.C.) 30 October 2025. Access Date: 16 November 2025. <https://www.worldbank.org/en/news/press-release/2025/10/31/world-bank-approves-new-financing-to-enhance-climate-change-mitigation-and-adaptation-in-sierra-leone>

components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Indonesia receives a score of 0.

Analyst: Adriana Meriam Elsabel

Italy: +1

Italy has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for Italy, Albania, Greece, Malta, Portugal, San Marino and Timor-Leste Matteo Bugamelli and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹⁵⁰¹ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.¹⁵⁰² This will help address economic and gender disparities and stimulate growth in the Indian state.

On 5 December 2024, Italy's representative Ryo Nakamura and the Gavi, the Vaccine Alliance Board approved changes to support the sustainability of immunization programmes.¹⁵⁰³ This includes updating its eligibility and co-financing model to ensure targeted support measures and support lower middle income and International Development Association (IDA)-recipient countries.

On 11 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD20 million in IDA credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.¹⁵⁰⁴ This will support new hydropower projects, early warning systems and increased resilience.

On 12 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD240 million for a second water and sewerage project in Karachi, Pakistan.¹⁵⁰⁵ Funded through the IBRD, this project aims to improve water, sanitation and hygiene services in the city.

On 12 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD325.10 million for a project to support climate-resilient agriculture and farmers in Uttar Pradesh, India.¹⁵⁰⁶ Funded through the IBRD, this project aims to improve value chains, access to finance and encourage private investment. France will also financially support this initiative.

On 12 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD100 million in IDA credit for Nepal's second development policy operation.¹⁵⁰⁷ This will support environmental resilience, sustainability and development.

On 13 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD110 million IDA credit for Kiribati.¹⁵⁰⁸ This will support sustainable economic development on the island through improving infrastructure, including enhancing climate resilience and emergency preparedness and response.

On 17 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD350 million IDA grant for a hydropower project in Tajikistan.¹⁵⁰⁹ The project will support access to reliable and sustainable electricity in the country and Central Asia. The project will be co-financed by several institutions including USD550 million from the European Investment Bank and USD100 million from the Saudi Fund for Development.¹⁵¹⁰

On 19 December 2024, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and "increase power transmission capacity to southern regions of Tanzania."¹⁵¹¹ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹⁵¹² The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹⁵¹³ This will support "education, health and social protection services" in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹⁵¹⁴

On 14 January 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD257.8 million in financing for the "Second Greater Beirut Water Supply Project" in Lebanon.¹⁵¹⁵ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹⁵¹⁶ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹⁵¹⁷

On 28 January 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹⁵¹⁸ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 28 February 2025, Deputy Director at the Global Public Goods Office of the International Financial Relations Directorate Gisella Berardi and the Climate Investment Fund (CIF)'s Strategic Climate Fund (SCF) Committee approved financing for several climate-related development projects.¹⁵¹⁹ This includes USD35.66 million in co-financing for the World Bank and African Development Bank's project for regenerative agriculture and ecosystems in Kenya. The SCF Committee also approved USD60.35 million in co-financing for a land use planning, biodiversity and forest restoration project in Namibia, Malawi, Mozambique, Tanzania, Zambia, with the World Bank and African Development Bank co-financing. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. It is also expected to result in significant private sector investment.

On 14 March 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹⁵²⁰ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹⁵²¹ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹⁵²² This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹⁵²³ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience

projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 22 October 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.¹⁵⁹¹ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.¹⁵⁹² The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Bugamelli and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹⁵⁹³ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Italy has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Italy has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Italy has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has mobilized more headroom finance to support the World Bank's capacity through increased contributions for IDA21, the IFC and the IBRD, while maintaining its contribution to MIGA. Italy has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF Committee which has supported World Bank projects. Finally, Italy has also increased its trust fund contribution, aided by a EUR12 million contribution to the Early Learning Partnership Multi-Donor Trust Fund on 21 July 2025.

Thus, Italy receives a score of +1.

Analyst: Adriana Meriam Elsabel

Japan: 0

Japan has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 14 January 2025, Executive Director Imamura and the World Bank's Board of Executive Directors approved USD257.8 million in financing for the "Second Greater Beirut Water Supply Project" in Lebanon.¹⁶⁰⁷ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Imamura and the World Bank's Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹⁶⁰⁸ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹⁶⁰⁹

On 28 January 2025, Executive Director Imamura and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹⁶¹⁰ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 27 February 2025, Director for Climate Change and Environmental Issues at the Ministry of Finance Tsuyoshi Hyokai and the Climate Investment Fund (CIF)'s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and USD5 million grants for the India Investment Plan.¹⁶¹¹ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD's offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the International Financial Corporation (IFC)'s battery storage system project. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 28 February 2025, Director Hyokai and the CIF's Strategic Climate Fund (SCF) Committee approved financing for several climate-related development projects.¹⁶¹² This includes USD35.66 million in co-financing for the World Bank and African Development Bank's project for regenerative agriculture and ecosystems in Kenya. The SCF Committee also approved USD60.35 million in co-financing for a land use planning, biodiversity and forest restoration project in Namibia, Malawi, Mozambique, Tanzania, Zambia, with the World Bank and African Development Bank co-financing. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. It is also expected to result in significant private sector investment.

On 30 October 2025, Executive Director Imamura and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹⁶⁹¹ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Japan has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Japan has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Japan has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions for IDA21 and the IBRD through subscriptions and a credit enhancement, while maintaining its contributions to the IFC and MIGA. Japan has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF and CTF Committees which have supported several World Bank, IBRD and IFC projects. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Japan receives a score of 0.

Analysts: Lorenzo Songsare Shery and Eva Tsai

Korea: 0

Korea has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 25 November 2024, the Ministry of Economy and Finance announced a USD7 million contribution to the Green Climate Fund's new Loss and Damage Fund during the COP29 conference in Baku.¹⁶⁹² The funding will help developing countries cope with climate-related disasters, such as rising sea levels and extreme weather events. The Green Climate Fund is one of the World Bank's financial intermediary funds.

On 26 November 2024, Executive Director for Korea, Australia and other members Robert Bruce Nicholl and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹⁶⁹³ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

on the island through improving infrastructure, including enhancing climate resilience and emergency preparedness and response.

On 17 December 2024, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD350 million IDA grant for a hydropower project in Tajikistan.¹⁷⁰¹ The project will support access to reliable and sustainable electricity in the country and Central Asia. The project will be co-financed by several institutions including USD550 million from the European Investment Bank and USD100 million from the Saudi Fund for Development.¹⁷⁰²

On 19 December 2024, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and "increase power transmission capacity to southern regions of Tanzania."¹⁷⁰³ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹⁷⁰⁴ The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹⁷⁰⁵ This will support "education, health and social protection services" in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹⁷⁰⁶

On 14 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD257.8 million in financing for the "Second Greater Beirut Water Supply Project" in Lebanon.¹⁷⁰⁷ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹⁷⁰⁸ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹⁷⁰⁹

On 28 January 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹⁷¹⁰ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 28 February 2025, Korea's representative Do Ik Kim and the Climate Investment Fund (CIF)'s Strategic Climate Fund (SCF) Committee approved financing for several climate-related development projects.¹⁷¹¹ This includes USD35.66 million in co-financing for the World Bank and African Development Bank's project for regenerative agriculture and ecosystems in Kenya. The SCF Committee also approved USD60.35 million in co-financing for a land use planning, biodiversity and forest restoration project in Namibia, Malawi, Mozambique, Tanzania, Zambia, with the World Bank and African Development Bank co-financing. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. It is also expected to result in significant private sector investment.

On 10 March 2025, Director General for the Fiscal Policy Bureau at the Ministry of Economy and Finance Moonsun Jang and the IBRD and IDA's Director for Strategy and Operations Elisabeth Huybens signed an administration agreement whereby Korea will provide USD2,300,000 for the Public Expenditure Management Network in Asia Phase III Multi-Donor Trust Fund.¹⁷¹² Of this, USD900,000 will be deposited by 30 June 2025, with the remainder in 2026-2028. On 14 March 2025, Executive Director Nicholl and the World Bank's

Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹⁷¹³ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹⁷¹⁴ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 18 March 2025, the International Finance Corporation (IFC) and Inter-American Development Bank Invest announced a USD13.5 million investment for Solengy Haiti S.A., a solar energy company in Haiti.¹⁷¹⁵ Of this, USD1.5 million will be provided through the Korea Green, Resilient and Innovative Development program. This funding will support 10 megawatts-peak in solar energy and 20 megawatts-hours of energy storage, supporting energy distribution, resilience and transformation.

On 21 March 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹⁷¹⁶ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹⁷¹⁷ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.¹⁷¹⁸ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 30 October 2025, Executive Director Nicholl and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹⁷⁹⁰ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Korea has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Korea has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Korea has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions for IDA21 and the IFC, while maintaining its contributions to the IBRD and MIGA. Korea has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF Committee which has supported World Bank projects. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Korea receives a score of 0.

Analyst: Soohyun Lee

Mexico: 0

Mexico has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for Mexico, Spain, Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua Teresa Solbes and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹⁷⁹¹ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Solbes and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.¹⁷⁹² This will help address economic and gender disparities and stimulate growth in the Indian state.

On 11 December 2024, Executive Director Solbes and the World Bank's Board of Executive Directors approved USD20 million in International Development Association (IDA) credit and USD20 million in for an

Tanzania.”¹⁸⁰⁰ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office’s Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Solbes and the World Bank’s Board of Executive Directors approved changes to the World Bank’s Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹⁸⁰¹ The changes aim to improve the independence, “effectiveness, efficiency and functioning of the accountability process” through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment’s focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Solbes and the World Bank’s Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹⁸⁰² This will support “education, health and social protection services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹⁸⁰³

On 14 January 2025, Executive Director Solbes and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.¹⁸⁰⁴ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Solbes and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹⁸⁰⁵ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹⁸⁰⁶

On 28 January 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹⁸⁰⁷ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 14 March 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹⁸⁰⁸ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹⁸⁰⁹ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹⁸¹⁰ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹⁸¹¹ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.¹⁸¹² This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 28 March 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved a USD300 million IDA credit for Pakistan.¹⁸¹³ This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 28 March 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved a USD150 million IDA credit for Nepal's bridge systems project.¹⁸¹⁴ The project aims to improve bridge infrastructure to ensure resilience and connectivity across the country, given its rough terrain.

On 4 April 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved an IDA credit worth USD200 million for the Guinea Water and Sanitation Project.¹⁸¹⁵ The European Investment Bank will provide a EUR220 million loan and the European Union will provide a EUR26 million grant to co-finance this initiative which aims to improve water, sanitation, and hygiene in Guinea. General Director of International Fora and Sustainable Finance Ministry of Finance and Public Credit Regina Rosales Talamas and the Global Environmental Facility Council also approved USD10.092 million in co-financing for this project.¹⁸¹⁶

On 15 April 2025, Minister of Finance and Public Credit Edgar Amador Zamora and the IDA's Board of Governors adopted resolution 255, approving a report authorizing additional contributions and guarantees for the IDA's 21st replenishment (IDA21).¹⁸¹⁷ The report was adopted as approved by the World Bank's Board of Executive Directors on 17 March 2025 and notes that Mexico will not contribute to IDA21 between 1 July 2025 and 30 June 2028. This marks a decrease from Mexico's pledge of USD17 million for IDA20, thereby constituting an action that is antithetical to the commitment's objective of mobilizing more headroom finance for the World Bank.¹⁸¹⁸

On 18 April 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved USD121 million in IDA for the first phase of the Kyrgyz Republic Water Supply and Sanitation Universal Access Program.¹⁸¹⁹ This funding package includes a USD50 million line of credit co-financed by the Asian Infrastructure Investment Bank.

Access Date: 17 July 2025. <https://www.worldbank.org/en/news/press-release/2025/06/27/world-bank-provides-ghana-360-million-to-strengthen-macroeconomic-stability-and-lay-the-foundations-for-resilient-growth>

USD232,794,000.¹⁸⁵⁸ This amount is the same as Mexico's subscription amount from 15 April 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.¹⁸⁵⁹

On 30 June 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the Multilateral Investment Guarantee Agency (MIGA), noting that Mexico has a total subscription amount of SDR11.92 million.¹⁸⁶⁰ This amount is the same as Mexico's subscription amount from 30 June 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.¹⁸⁶¹

On 30 June 2025, the World Bank Group's Finances One updated its Trust Funds Contribution by Donors visualization, based on the Contributions (Receipts) to Trust Funds dataset.¹⁸⁶² The data reveals that Mexico decreased its contribution to the World Bank's trust funds from USD3,235,601 in fiscal year 2024 to USD2,607,519 in fiscal year 2025, thereby constituting an action that is antithetical to the commitment's objective of mobilizing more headroom finance for the World Bank.

On 1 July 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the IBRD, noting that Mexico has a total subscription amount of USD4,772 million (in 1944 currency).¹⁸⁶³ This is an increase in its total subscription amount from 17 May 2024, which was USD4,011.9 million (in 1944 currency).¹⁸⁶⁴ Therefore, Mexico has mobilized more headroom finance for the IBRD.

On 3 July 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved USD1 billion for the Second Sustainable and Inclusive Growth Development Policy Operation (DPO) for Ethiopia, consisting of a USD650 million in IDA grant and USD350 million in concessional credit, to advance the country's transition to a private-sector-led, inclusive growth model.¹⁸⁶⁵ The DPO aims to deepen economic reforms, improve financial intermediation and expand social-protection and human-capital programmes for the poor.

On 11 July 2025, Executive Director Solbes and the World Bank's Board of Executive Directors approved a USD2.97 million grant to support Djibouti in enhancing education and care for children with disabilities.¹⁸⁶⁶

Mexico has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Mexico has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Mexico has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contribution for the IBRD, while maintaining its contributions to the IFC and MIGA. Mexico has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Mexico receives a score of 0.

Analyst: Jubi Kosamia

Russia: 0

Russia has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Alternate Executive Director for Russia, Syria and Belarus Alexey Morozov and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹⁸⁸⁰ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.¹⁸⁸¹ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 11 December 2024, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD20 million in International Development Association (IDA) credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.¹⁸⁸² This will support new hydropower projects, early warning systems and increased resilience.

On 8 January 2025, Executive Director Morozov and the World Bank’s Board of Executive Directors approved changes to the World Bank’s Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹⁸⁹⁰ The changes aim to improve the independence, “effectiveness, efficiency and functioning of the accountability process” through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment’s focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Morozov and the World Bank’s Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹⁸⁹¹ This will support “education, health and social protection services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹⁸⁹²

On 14 January 2025, Executive Director Morozov and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.¹⁸⁹³ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Morozov and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹⁸⁹⁴ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹⁸⁹⁵

On 28 January 2025, Executive Director Morozov and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹⁸⁹⁶ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 14 March 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹⁸⁹⁷ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹⁸⁹⁸ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.¹⁸⁹⁹ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.¹⁹⁰⁰ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.¹⁹⁰¹ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

On 28 March 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD300 million IDA credit for Pakistan.¹⁹⁰² This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 28 March 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD150 million IDA credit for Nepal's bridge systems project.¹⁹⁰³ The project aims to improve bridge infrastructure to ensure resilience and connectivity across the country, given its rough terrain.

On 4 April 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved an IDA credit worth USD200 million for the Guinea Water and Sanitation Project.¹⁹⁰⁴ The European Investment Bank will provide a EUR220 million loan and the European Union will provide a EUR26 million grant to co-finance this initiative which aims to improve water, sanitation, and hygiene in Guinea. Russia's representative at the Global Environmental Facility Ruzanna Grigoryan and the Global Environmental Facility Council also approved USD10.092 million in co-financing for this project.¹⁹⁰⁵

On 15 April 2025, Deputy Prime Minister Alexei Logvinovich Overchuk and the IDA's Board of Governors adopted resolution 255, approving a report authorizing additional contributions and guarantees for the IDA's 21st replenishment (IDA21).¹⁹⁰⁶ The report was adopted as approved by the World Bank's Board of Executive Directors on 17 March 2025 and notes that Russia will not contribute to IDA21 between 1 July 2025 and 30 June 2028. This marks a decrease from Russia's pledge of USD50 million for IDA20, thereby constituting an action that is antithetical to the commitment's objective of mobilizing more headroom finance for the World Bank.¹⁹⁰⁷

On 18 April 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD121 million in IDA for the first phase of the Kyrgyz Republic Water Supply and Sanitation Universal Access Program.¹⁹⁰⁸ This funding package includes a USD50 million line of credit co-financed by the Asian Infrastructure Investment Bank.

On 18 April 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD120 million to develop a sustainable finance market for micro, small and medium sized enterprises in Kyrgyzstan.¹⁹⁰⁹

On 19 April 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD50 million grant for the second phase of Haiti's Resilient Landscape Project which aims to integrate

On 30 September 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD145 million loan for the Integrated Resilient Development Project in Viet Nam to strengthen flood protection and transport connectivity in Da Nang City and Gia Lai Province.¹⁹⁶³

On 7 October 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD500 million in financing for the Building Resilient Digital Infrastructure for Growth Project and USD250 million for Phase II of the Health Security Program in Western and Central Africa, Nigeria.¹⁹⁶⁴ These projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 22 October 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.¹⁹⁶⁵ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.¹⁹⁶⁶ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Morozov and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.¹⁹⁶⁷ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Russia has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Russia has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Russia has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity by maintaining its contributions for the IFC, IBRD and MIGA. Russia has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank

¹⁹⁶⁷ World Bank Approves New Financing to Enhance Climate Change Mitigation and Adaptation in Sierra Leone, World Bank Group (Washington D.C.) 30 October 2025. Access Date: 16 November 2025. <https://www.worldbank.org/en/news/press-release/2025/10/31/world-bank-approves-new-financing-to-enhance-climate-change-mitigation-and-adaptation-in-sierra-leone>

initiatives. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Russia receives a score of 0.

Analyst: Christine Huang

Saudi Arabia: 0

Saudi Arabia has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for Saudi Arabia Suhail Saeed and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.¹⁹⁶⁸ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.¹⁹⁶⁹ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 11 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD20 million in International Development Association (IDA) credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.¹⁹⁷⁰ This will support new hydropower projects, early warning systems and increased resilience.

On 12 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD240 million for a second water and sewerage project in Karachi, Pakistan.¹⁹⁷¹ Funded through the IBRD, this project aims to improve water, sanitation and hygiene services in the city.

On 12 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD325.10 million for a project to support climate-resilient agriculture and farmers in Uttar Pradesh, India.¹⁹⁷² Funded through the IBRD, this project aims to improve value chains, access to finance and encourage private investment. France will also financially support this initiative.

On 12 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD100 million in IDA credit for Nepal's second development policy operation.¹⁹⁷³ This will support environmental resilience, sustainability and development.

On 13 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD110 million IDA credit for Kiribati.¹⁹⁷⁴ This will support sustainable economic development on the island through improving infrastructure, including enhancing climate resilience and emergency preparedness and response.

On 17 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD350 million IDA grant for a hydropower project in Tajikistan.¹⁹⁷⁵ The project will support access to reliable and sustainable electricity in the country and Central Asia. The project will be co-financed by several institutions including USD550 million from the European Investment Bank and USD100 million from the Saudi Fund for Development.¹⁹⁷⁶

On 19 December 2024, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and "increase power transmission capacity to southern regions of Tanzania."¹⁹⁷⁷ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.¹⁹⁷⁸ The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.¹⁹⁷⁹ This will support "education, health and social protection

services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.¹⁹⁸⁰

On 14 January 2025, Executive Director Saeed and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.¹⁹⁸¹ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Saeed and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.¹⁹⁸² The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.¹⁹⁸³

On 28 January 2025, Executive Director Saeed and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.¹⁹⁸⁴ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 14 March 2025, Executive Director Saeed and the World Bank’s Board of Executive Directors approved a USD31 million IDA project for Djibouti.¹⁹⁸⁵ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA’s Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Saeed and the World Bank’s Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.¹⁹⁸⁶ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan’s new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 30 June 2025, the World Bank Group's Finances One updated its Trust Funds Contribution by Donors visualization, based on the Contributions (Receipts) to Trust Funds dataset.²⁰⁴⁰ The data reveals that Saudi Arabia decreased its contribution to the World Bank's trust funds from USD55,972,180 in fiscal year 2024 to USD10,000,000 in fiscal year 2025, thereby constituting an action that is antithetical to the commitment's objective of mobilizing more headroom finance for the World Bank.

On 1 July 2025, the World Bank's Corporate Secretariat released subscriptions and voting power information for the IBRD, noting that Saudi Arabia has a total subscription amount of USD7,696.7 million (in 1944 currency).²⁰⁴¹ This amount is the same as Saudi Arabia's subscription amount from 17 May 2024, thereby partially complying with the commitment's goal to mobilize more headroom finance for the World Bank.²⁰⁴²

On 3 July 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD1 billion for the Second Sustainable and Inclusive Growth Development Policy Operation (DPO) for Ethiopia, consisting of a USD650 million in IDA grant and USD350 million in concessional credit, to advance the country's transition to a private-sector-led, inclusive growth model.²⁰⁴³ The DPO aims to deepen economic reforms, improve financial intermediation and expand social-protection and human-capital programmes for the poor.

On 11 July 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD2.97 million grant to support Djibouti in enhancing education and care for children with disabilities.²⁰⁴⁴ The funding is intended to assist families by ensuring that children with disabilities receive early support and the resources needed to thrive throughout their learning journey.

On 17 July 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD127.5 million IDA investment for the Second Kenya Social and Economic Inclusion Project, aimed at strengthening Kenya's social-protection systems and extending safety-net support to 12 million vulnerable citizens.²⁰⁴⁵

On 28 July 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD200 million IDA grant for the ASCENT Zambia Project (Phase 13).²⁰⁴⁶ The project will connect over one million Zambians to electricity by 2030, to provide reliable and affordable power for households and businesses.

On 30 September 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD145 million loan for the Integrated Resilient Development Project in Viet Nam to strengthen flood protection and transport connectivity in Da Nang City and Gia Lai Province.²⁰⁵⁴

On 7 October 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD500 million in financing for the Building Resilient Digital Infrastructure for Growth Project and USD250 million for Phase II of the Health Security Program in Western and Central Africa, Nigeria.²⁰⁵⁵ These projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 22 October 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.²⁰⁵⁶ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.²⁰⁵⁷ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Saeed and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.²⁰⁵⁸ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Saudi Arabia has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Saudi Arabia has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Saudi Arabia has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions for the IFC and the IDA through its 21st replenishment and co-financing for Tajikistan through the Saudi Bank for Development, while maintaining its contributions to the IBRD and MIGA.

²⁰⁵⁸ World Bank Approves New Financing to Enhance Climate Change Mitigation and Adaptation in Sierra Leone, World Bank Group (Washington D.C.) 30 October 2025. Access Date: 16 November 2025. <https://www.worldbank.org/en/news/press-release/2025/10/31/world-bank-approves-new-financing-to-enhance-climate-change-mitigation-and-adaptation-in-sierra-leone>

However, Saudi Arabia has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Saudi Arabia receives a score of 0.

Analyst: Karissa Cruz

South Africa: 0

South Africa has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 26 November 2024, Executive Director for South Africa, Angola and Nigeria Zainab Ahmed and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.²⁰⁵⁹ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Ahmed and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.²⁰⁶⁰ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 11 December 2024, Executive Director Ahmed and the World Bank's Board of Executive Directors approved USD20 million in International Development Association (IDA) credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.²⁰⁶¹ This will support new hydropower projects, early warning systems and increased resilience.

On 12 December 2024, Executive Director Ahmed and the World Bank's Board of Executive Directors approved USD240 million for a second water and sewerage project in Karachi, Pakistan.²⁰⁶² Funded through the IBRD, this project aims to improve water, sanitation and hygiene services in the city.

On 12 December 2024, Executive Director Ahmed and the World Bank's Board of Executive Directors approved USD325.10 million for a project to support climate-resilient agriculture and farmers in Uttar Pradesh, India.²⁰⁶³ Funded through the IBRD, this project aims to improve value chains, access to finance and encourage private investment. France will also financially support this initiative.

On 30 September 2025, Executive Director Ahmed and the World Bank's Board of Executive Directors approved a USD145 million loan for the Integrated Resilient Development Project in Viet Nam to strengthen flood protection and transport connectivity in Da Nang City and Gia Lai Province.²¹⁴³

On 7 October 2025, Executive Director Ahmed and the World Bank's Board of Executive Directors approved USD500 million in financing for the Building Resilient Digital Infrastructure for Growth Project and USD250 million for Phase II of the Health Security Program in Western and Central Africa, Nigeria.²¹⁴⁴ These projects will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 22 October 2025, Executive Director Ahmed and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.²¹⁴⁵ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Ahmed and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.²¹⁴⁶ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Ahmed and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.²¹⁴⁷ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

South Africa has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. South Africa has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. South Africa has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions for IDA21, while maintaining its contributions to the IBRD, IFC and MIGA. South Africa has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through

strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Francken and the World Bank’s Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.²¹⁵⁹ This will support “education, health and social protection services” in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.²¹⁶⁰

On 14 January 2025, Executive Director Francken and the World Bank’s Board of Executive Directors approved USD257.8 million in financing for the “Second Greater Beirut Water Supply Project” in Lebanon.²¹⁶¹ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Francken and the World Bank’s Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.²¹⁶² The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.²¹⁶³

On 28 January 2025, Executive Director Francken and the World Bank’s Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.²¹⁶⁴ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment’s focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 27 February 2025, Director-General of Foreign Economic Relations at the Ministry of Treasury and Finance Kerem Donmez and the Climate Investment Fund (CIF)’s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and USD5 million grants for the India Investment Plan.²¹⁶⁵ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD’s offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the International Financial Corporation (IFC)’s battery storage system project. This approval marks the

mobilization of headroom finance to increase World Bank's capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 28 February 2025, Director-General Donmez and the CIF's Strategic Climate Fund (SCF) Committee approved financing for several climate-related development projects.²¹⁶⁶ This includes USD35.66 million in co-financing for the World Bank and African Development Bank's project for regenerative agriculture and ecosystems in Kenya. The SCF Committee also approved USD60.35 million in co-financing for a land use planning, biodiversity and forest restoration project in Namibia, Malawi, Mozambique, Tanzania, Zambia, with the World Bank and African Development Bank co-financing. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. It is also expected to result in significant private sector investment.

On 14 March 2025, Executive Director Francken and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.²¹⁶⁷ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Francken and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.²¹⁶⁸ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Francken and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.²¹⁶⁹ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Francken and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.²¹⁷⁰ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Francken and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable

aims to develop a climate-resilient health system in Kerala, India.²²³⁷ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Francken and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.²²³⁸ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

Türkiye has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. Türkiye has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. Türkiye has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contribution for the IFC, while maintaining its contributions to the IDA, IBRD, MIGA and World Bank's trust funds. Türkiye has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF and CTF Committees which have supported World Bank, IBRD and IFC projects. However, it has not increased its contributions across at least three of the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, Türkiye receives a score of 0.

Analysts: Ridhima Sinha and Alia Sagermann

United Kingdom: +1

The United Kingdom has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 21 November 2024, Director of International Climate Finance and Strategy at the Department for Energy Security and Net Zero Matt Toombs and Vice-President for Planet at the International Development Association (IDA) and International Bank for Reconstruction and Development (IBRD) Juergen Voegel signed an administration agreement whereby the United Kingdom will provide GBP178,200,000 for the Scaling Climate Action by Lowering Emissions Multi-Donor Trust Fund.²²³⁹ Of this, GBP134,120,000 will be deposited by 31 December 2024, GBP11,205,000 by 31 March 2025 and GBP32,875,000 by 31 December 2025.

sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.²²⁶⁰

On 23 January 2025, Strategy and Evidence Team Leader at the Foreign, Commonwealth and Development Office Eleanor Weavis and Vice President of the Prosperity Vice Presidency at the IBRD and IDA Pablo Saavedra signed an administration agreement whereby the United Kingdom will provide GBP3,500,000 for the Umbrella Facility for Trade Multi-Donor Trust Fund 2.0.²²⁶¹ This funding will be deposited in installments, with GBP1,250,000 to be deposited by 30 June 2025, GBP250,000 to be deposited by 1 December 2025 and the remainder to be deposited between 2026-2029. On 28 January 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.²²⁶² The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 13 February 2025, Deputy Director of the International Climate Finance Portfolio and Strategy at the Department for Energy Security and Net Zero Julia Ellis and Director Das signed an agreement whereby the United Kingdom will provide GBP20 million for the Trust Fund for the Fund for responding to Loss and Damage.²²⁶³ Of this, GBP10 million will be deposited by 31 March 2025 and the remainder will be deposited by 31 August 2025.

On 27 February 2025, Co-Chair of the Clean Technology Fund Trust Fund Committee and Deputy Director at the Department for Energy Security and Net Zero Edward Webber and the Climate Investment Fund (CIF)'s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and USD5 million grants for the India Investment Plan.²²⁶⁴ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD's offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the IFC's battery storage system project. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 28 February 2025, Senior Advisor at the Climate Funds and Institutions Department Jan Wimaladharma and the CIF's Strategic Climate Fund (SCF) Committee approved financing for several climate-related development

projects.²²⁶⁵ This includes USD35.66 million in co-financing for the World Bank and African Development Bank's project for regenerative agriculture and ecosystems in Kenya. The SCF Committee also approved USD60.35 million in co-financing for a land use planning, biodiversity and forest restoration project in Namibia, Malawi, Mozambique, Tanzania, Zambia, with the World Bank and African Development Bank co-financing. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. It is also expected to result in significant private sector investment.

On 14 March 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.²²⁶⁶ This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.²²⁶⁷ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.²²⁶⁸ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.²²⁶⁹ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.²²⁷⁰ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

Access Date: 16 November 2025. <https://www.worldbank.org/en/news/press-release/2025/10/07/world-bank-approves-new-financing-to-enhance-nigeria-digital-infrastructure-and-health-security>

On 10 October 2025, the United Kingdom contributed GBP500,000 for the Financial Management Umbrella Multi-Donor Trust Fund to finance public financial management in Tajikistan through the IBRD and IDA²³⁴⁸

On 22 October 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.²³⁴⁹ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.²³⁵⁰ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Gnanendran and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation in Sierra Leone.²³⁵¹ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

The United Kingdom has fully complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. The United Kingdom has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. The United Kingdom has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has mobilized more headroom finance to support the World Bank's capacity through increased contributions for IDA21, the IFC and the World Bank's trust funds, while maintaining its contributions to the IBRD and MIGA. The United Kingdom has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's SCF and CTF Committees which have supported World Bank, IBRD and IFC projects.

Thus, the United Kingdom receives a score of +1.

Analyst: Soohyun Lee

United States: 0

The United States has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 19 November 2024, President Joe Biden announced that the United States will pledge USD4 billion over the next three years to the International Development Association (IDA)'s 21st replenishment (IDA21).²³⁵² President Biden noted that the US is the largest donor to the IDA and reaffirmed his support for the Association's mandate to support developing countries. This announcement was made prior to the start of the 2025 Rio Cycle compliance period on 20 November 2024 but contains a multiyear contribution that would be partially allocated within the compliance period.

On 26 November 2024, Executive Director for the United States Peter Wisner and the World Bank's Board of Executive Directors approved USD250 million in International Bank for Reconstruction and Development (IBRD) funding for Morocco's solid waste management project.²³⁵³ This will support improved waste management, governance and sustainability including compliance with the Paris Agreement.

On 3 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD188.28 million in funding through the IBRD to support Maharashtra's development.²³⁵⁴ This will help address economic and gender disparities and stimulate growth in the Indian state.

On 5 December 2024, the United States' representative Mark Lloyd and the Gavi, the Vaccine Alliance Board approved changes to support the sustainability of immunization programmes.²³⁵⁵ This includes updating its eligibility and co-financing model to ensure targeted support measures and support lower middle income and IDA-recipient countries.

On 11 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD20 million in IDA credit and USD20 million in for an IDA grant to support Bhutan's disaster and climate preparedness.²³⁵⁶ This will support new hydropower projects, early warning systems and increased resilience.

On 12 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD240 million for a second water and sewerage project in Karachi, Pakistan.²³⁵⁷ Funded through the IBRD, this project aims to improve water, sanitation and hygiene services in the city.

On 12 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD325.10 million for a project to support climate-resilient agriculture and farmers in Uttar Pradesh, India.²³⁵⁸ Funded through the IBRD, this project aims to improve value chains, access to finance and encourage private investment. France will also financially support this initiative.

On 12 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD100 million in IDA credit for Nepal's second development policy operation.²³⁵⁹ This will support environmental resilience, sustainability and development.

On 13 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD110 million IDA credit for Kiribati.²³⁶⁰ This will support sustainable economic development on the island through improving infrastructure, including enhancing climate resilience and emergency preparedness and response.

On 17 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD350 million IDA grant for a hydropower project in Tajikistan.²³⁶¹ The project will support access to reliable and sustainable electricity in the country and Central Asia. The project will be co-financed by several institutions including USD550 million from the European Investment Bank and USD100 million from the Saudi Fund for Development.²³⁶²

On 19 December 2024, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD245 million IDA credit to support the Zambia-Tanzania corridor project which aims to help Tanzania gain regional trade power and "increase power transmission capacity to southern regions of Tanzania."²³⁶³ The European Commission will provide USD30 million in co-financing for this initiative alongside USD17 million from the United Kingdom Foreign Commonwealth and Development Office's Energy Sector Management Assistance Program.

On 8 January 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved changes to the World Bank's Accountability Mechanism which a framework to address complaints and disputes associated with World Bank projects and funding.²³⁶⁴ The changes aim to improve the independence, "effectiveness, efficiency and functioning of the accountability process" through the creation of two separate independent units for complaints and dispute resolution services and a new Executive Secretary position to support the Accountability Mechanism. This action supports the commitment's focus on developing or strengthening frameworks to fairly allocate concessional financing by ensuring that World Bank projects are fair and equitable.

On 9 January 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD20 million IDA credit for Guinea-Bissau.²³⁶⁵ This will support "education, health and social protection services" in the country with a focus on vulnerable individuals including pregnant women, children and disadvantaged groups.²³⁶⁶

On 14 January 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD257.8 million in financing for the "Second Greater Beirut Water Supply Project" in Lebanon.²³⁶⁷ This project will support critical water infrastructure and long-term stability.

On 14 January 2025, Executive Director Wisner and the World Bank's Board of Executive Directors endorsed a new Country Partnership Framework for Pakistan for 2026-2039.²³⁶⁸ The framework will focus on policy and institutional reforms to enable additional financing for developmental projects across a variety of sectors as well as increasing joint financing and private sector investment. The framework aims to enhance credibility and ensure the appropriate allocation of resources through long-term plans for sustainable development.²³⁶⁹

On 28 January 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a Full Mutual Reliance Framework between the World Bank and Asian Development Bank.²³⁷⁰ The co-financing framework is focused on increasing efficiency, leveraging capacities, cost-savings and simplification by designating one institution as the main lender for the project cycle. This action advances the commitment's focus on establishing a clear framework that ensures policy cohesion between both banks for the allocation of scarce concessional resources.

On 27 February 2025, The United States' representative Abigail Demopulos and the Climate Investment Fund (CIF)'s Clean Technology Fund (CTF) Committee approved USD65 million for concessional finance and

USD5 million grants for the India Investment Plan.²³⁷¹ This includes USD23 million in lending and USD1,904,762 in grant co-financing for the IBRD's offshore wind and grid strengthening projects and USD9 million in lending and USD650,000 in grant co-financing for the International Financial Corporation (IFC)'s battery storage system project. This approval marks the mobilization of headroom finance to increase World Bank's capacity to address global challenges. This project is also expected to generate significant private sector investment.

On 14 March 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD31 million IDA project for Djibouti.²³⁷² This project will focus on supporting vulnerable groups, advancing socioeconomic development and increasing social safety nets. USD9 million in funding will be provided through the IDA's Window for Host Communities and Refugees.

On 18 March 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD102 million in IDA credit for a project to increase access to microcredit and resilience of the sector in Pakistan.²³⁷³ This will include the development of risk management frameworks, capacity building and innovative solutions. This project falls under Pakistan's new Country Partnership Framework. It will be co-financed by a USD23 million grant from the Global Shield Financing Facility which is financed by Canada, Germany, Japan, Luxembourg and the United Kingdom.

On 21 March 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD67.34 million in IDA credit for a project to improve the civil service in the Philippines.²³⁷⁴ This project aims to accelerate development by improving public institutions through career development and training, better management and "a human resource certification system."

On 24 March 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD11.45 million for a project to improve the primary healthcare system in the Kyrgyz Republic.²³⁷⁵ This project will support better access, diagnostics and treatment and the inclusion of information technology in healthcare to improve its quality. Of this, USD2.4 million will be provided by the Kyrgyz Republic Primary Health Care Quality Improvement Program Multi-Donor Trust Fund and the Accompanying Measures Single-Donor Trust Fund which is financed by Germany's KfW Development Bank.

On 26 March 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD200 million IDA credit for Bangladesh's project to improve social protection and resilience for vulnerable groups.²³⁷⁶ This includes a focus on strengthening cash transfers, social protection delivery systems, support services including skills training and monitoring and registrations.

²³⁷⁶ Strengthening Social Protection for Improved Resilience, Inclusion and Targeting, World Bank Group (Washington D.C.) 26 March 2025. Access Date: 13 July 2025. <https://projects.worldbank.org/en/projects-operations/project-detail/P508519>

On 28 March 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD300 million IDA credit for Pakistan.²³⁷⁷ This will support a program to improve air quality and address smog and air pollution in the province of Punjab.

On 28 March 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD150 million IDA credit for Nepal's bridge systems project.²³⁷⁸ The project aims to improve bridge infrastructure to ensure resilience and connectivity across the country, given its rough terrain.

On 4 April 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved an IDA credit worth USD200 million for the Guinea Water and Sanitation Project.²³⁷⁹ The European Investment Bank will provide a EUR220 million loan and the European Union will provide a EUR26 million grant to co-finance this initiative which aims to improve water, sanitation, and hygiene in Guinea. The United States' representative at the Global Environmental Facility Abigail Demopulos and the Global Environmental Facility Council also approved USD10.092 million in co-financing for this project.²³⁸⁰

On 15 April 2025, Under Secretary for International Affairs at the Department of the Treasury Michael Kaplan and the IDA's Board of Governors adopted resolution 255, approving a report authorizing additional contributions and guarantees for the IDA's 21st replenishment (IDA21).²³⁸¹ The report was adopted as approved by the World Bank's Board of Executive Directors on 17 March 2025 and notes that the United States will not contribute to IDA21 between 1 July 2025 and 30 June 2028. This marks a decrease from the United States' pledge of USD3,500 million for IDA20, thereby constituting an action that is antithetical to the commitment's objective of mobilizing more headroom finance for the World Bank.²³⁸² This action is also contrary to President Biden's announcement at the 2024 G20 Summit that the US would pledge USD4 billion to IDA21.

On 18 April 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD121 million in IDA for the first phase of the Kyrgyz Republic Water Supply and Sanitation Universal Access Program.²³⁸³ This funding package includes a USD50 million line of credit co-financed by the Asian Infrastructure Investment Bank.

will support the expansion of affordable, high-speed digital connectivity and improve capacities for public health emergencies, respectively.

On 15 October 2025, the Department of Justice provided USD50,000,000 for the Single-Donor Trust Fund to Support the Nigeria Distributed Access through Renewable Energy Scale-up Project.²⁴⁴⁴ The funds will be transferred immediately.

On 22 October 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved USD78 million in funding through the IBRD for a project to expand reliable and secure electricity services in Mongolia.²⁴⁴⁵ The project will support the low-carbon transition and support access to reliable electricity for approximately 200,000 people.

On 23 October 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD280 million loan from the IBRD for the Kerala Health Systems Improvement Program which aims to develop a climate-resilient health system in Kerala, India.²⁴⁴⁶ The project will also improve digital health services and ultimately improve the quality of life for 11 million vulnerable people.

On 30 October 2025, Executive Director Wisner and the World Bank's Board of Executive Directors approved a USD18.34 million grant to advance climate mitigation and adaptation Sierra Leone.²⁴⁴⁷ The grant will go towards enhancing climate resilience, protecting biodiversity and supporting sustainability.

The United States has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. The United States has participated in World Bank meetings to provide concessional finance to low- and middle-income countries including Bangladesh, Eswatini, Benin and Bhutan. This funding, provided as credits and grants, will address several development challenges in these countries. The United States has also advanced a clear framework for the allocation of scarce concessional resources through the World Bank Board of Executive Directors' approval of the Full Mutual Reliance Framework. Additionally, it has partially mobilized more headroom finance to support the World Bank's capacity through increased contributions for the IBRD and World Bank's trust funds, while maintaining its contributions to the IFC and MIGA. The United States has also taken action to mobilize more headroom finance to support the World Bank's capacity through the Global Environmental Facility's co-financing of World Bank initiatives and co-financed initiatives through the CIF's CTF Committee which has supported World Bank, IBRD and IFC projects. However, it has not increased its contributions across at least three of

the five components of the World Bank used to assess compliance: the IDA, the IBRD, the IFC, MIGA and the World Bank's trust funds.

Thus, the United States deserves a score of 0.

Analyst: Ronan Hasan

African Union: Not applicable

The African Union does not contribute to the World Bank and is a recipient institution for the World Bank's development projects. Thus, the African Union is not assessed for compliance with this commitment.

Analyst: Sena Gladza

European Union: 0

The European Union has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries.

On 25 November 2024, the International Finance Corporation (IFC) announced USD605 million in financing for development projects in Egypt, focusing on the climate, sustainable tourism and micro, small, and medium-sized enterprises.²⁴⁴⁸ As part of this investment, the European Bank for Reconstruction and Development (EBRD) will contribute USD100 million towards a USD300 million sustainability bond from the Arab African International Bank aimed at supporting "green financing, including industrial energy-efficiency, small-scale renewable energy projects and green buildings."

On 3 December 2024, Acting Head of Unit for International Partnerships at the European Commission Paz Velsasco Velazquez and Vice President of the Prosperity Practice Group at the International Development Association (IDA) and International Bank for Reconstruction and Development (IBRD) Pablo Saaverda signed an administration agreement whereby the European Commission will contribute EUR8 million for the Umbrella Facility for Trade Multi-Donor Trust Fund 2.0.²⁴⁴⁹ Of this, EUR3.5 million was deposited at the time of signature, with EUR2 million expected to be deposited by 15 October 2025 and the remainder in 2026-2027.

On 13 December 2024, Head of Cooperation at the European Commission Stephane Meert and Director for Strategy and Operations at the IBRD and IDA Elisabeth Huybens signed an administration agreement whereby the European Commission will provide EUR2 million for the Public Expenditure Management Network in Asia Phase III Multi-Donor Trust Fund.²⁴⁵⁰ Of this, EUR1 million was deposited after signing, with the remainder expected during 2026-2027.

On 20 March 2025, the IFC announced three partnerships to support business and women's entrepreneurship and employment in Côte d'Ivoire.²⁴⁵⁷ This includes a risk facility of up to XOF16.3 billion for women-owned and women-led businesses, in partnership with the Société Générale Côte d'Ivoire, a XOF6 billion for small and medium-sized enterprises focused on sanitation, trade, water, transportation, agriculture and other sectors, in partnership with the Société Ivoirienne de Banque and an advisory program to support the Bridge Bank Group Côte d'Ivoire's lending capacity for small and medium-sized enterprises, including those owned by women. These three partnerships will be financed through the IFC's Small Loans Guarantee Program European Commission/Private Sector Window which uses financing from the European Fund for Sustainable Development to provide a first-loss guarantee.

On 4 April 2025, Executive Director Fuentes and the World Bank's Board of Executive Directors approved an IDA credit worth USD200 million for the Guinea Water and Sanitation Project.²⁴⁵⁸ The European Investment Bank will provide a EUR220 million loan and the European Union will provide a EUR26 million grant to co-finance this initiative which aims to improve water, sanitation, and hygiene in Guinea.

On 28 April 2025, the European Commission agreed to provide financial guarantees on up to EUR291 million to support risk management for the IFC, through the European Fund for Sustainable Development Plus.²⁴⁵⁹ This will support headroom finance and enable over USD1 billion in private sector investments for projects to support pressing challenges in LMICs.

On 2 June 2025, the European Commission signed an agreement with the IBRD and the IDA to provide EUR3,000,000 for the Global Program for the Blue Economy Multi-Donor Trust Fund.²⁴⁶⁰ This includes EUR1,500,000 contributed following countersignatures and the remaining EUR1,500,000 by 30 April 2026. The trust fund aims to improve ocean conditions and qualities while promoting sustainable economic development in healthy oceans in LMICs.

On 25 June 2025, the World Bank's Board of Executive Directors approved USD100 million in IDA funds for the Rwanda Urban Mobility Improvement Project with co-financing from the EU and the EIB.²⁴⁶¹ This project aims to increase transportation effectiveness and accessibility in Kigali, Rwanda's capital city, as well as boost gender equality in employment opportunities and generate economic growth with better transportation mobility.

On 30 June 2025, the World Bank Group's Finances One updated its Trust Funds Contribution by Donors visualization, based on the Contributions (Receipts) to Trust Funds dataset.²⁴⁶² The data reveals that the European Union decreased its contribution to the World Bank's trust funds from USD716,477,624 through

²⁴⁶² Trust Funds Contribution by Donors, World Bank Group Finances One (Washington D.C.) 1 August 2025. Access Date: 31 July 2025. <https://financesone.worldbank.org/trust-funds-contribution-by-donors/DS01459>

the European Commission and USD43,502,344 through the EBRD in fiscal year 2024 to USD313,457,586 through the European Commission and USD5,679,082 through the EBRD in fiscal year 2025. This amount includes EUR2.5 million for the Umbrella Facility for Trade Multi-Donor Trust Fund 2.0, EUR500,000 for the Food Systems 2030 Multi-Donor Trust Fund and EUR100,000 for the Development Impact Multi-Donor Trust Fund. This action is antithetical to the commitment's objective of mobilizing more headroom finance for the World Bank.

On 9 July 2025, the European Commission signed an agreement with the IBRD to provide EUR1,100,000 for the Part II Europe 2020 Programmatic Single-Donor Trust Fund.²⁴⁶³ The trust fund will be implemented in Europe and Central Asian Regions to reduce poverty, build sustainable economic practices and job markets and foster greater societal integration.

On 8 August 2025, the European Commission contributed EUR2,875,000 to the Climate Support Facility Multi-Donor Trust Fund through the IBRD and IDA.²⁴⁶⁴ This includes EUR2,300,000 to be paid after countersignatures and the remaining EUR575,000 to be paid by 30 September 2026. This trust fund supports LMICs in accelerating the shift toward low-carbon economies and climate-resilient communities by embedding a comprehensive, cross-sectoral and long-term approach to climate change within their development planning frameworks.

On 19 August 2025, the European Commission signed an administration agreement with the IBRD to provide EUR2,875,000 for the Climate Support Facility Multi Donor Trust Fund.²⁴⁶⁵ The trust fund aims to enhance the transition to low-carbon economies for countries by implementing climate change views into institutional developments.

On 1 September 2025, the European Commission contributed EUR951,768 to the Consortium of International Agricultural Research Centres Trust Fund, effective on the date of the signature.²⁴⁶⁶ The contribution is designated to Window Three with EUR510,604 for Bioversity and EUR441,164 for the International Council for Research in Agroforestry. The cost-sharing portion is EUR19,035.36, bringing the net allocation to EUR932,732.64.

On 8 September 2025, the IFC committed to an investment of up to USD60 million for the Greater Visakhapatnam Municipal Corporation in India with funding from the EU.²⁴⁶⁷ The investment will be used for sanitation improvement initiatives and environmental sustainability practices in Visakhapatnam.

²⁴⁶³ Administration Agreement between the European Commission on behalf of the European Union and the International Bank for Reconstruction and Development concerning the Part II Europe 2020 Programmatic Single-Donor Trust Fund Trust Fund (No. TF074281) (EC Contract No. CN 2025 / 483-898), World Bank Group (Washington D.C.) 9 July 2025. Access Date: 8 October 2025. <https://documents1.worldbank.org/curated/en/099082225102587888/pdf/TF073598-194032ef-cd65-4b1f-995a-76ac5b94848e.pdf>

²⁴⁶⁶ Amendment No. 18 to the Contribution Agreement between the International Fund for Agricultural Development, acting on behalf of the European Commission, and the International Bank for Reconstruction and Development as Trustee of the CGIAR Trust Fund (MTO No. 069033), World Bank Group (Washington D.C.) 1 September 2025. Access Date: 20 October 2025. <https://documents1.worldbank.org/curated/en/099090225120019614/pdf/TF069033-c676667a-cb75-439d-8ed6-f2d03309f382.pdf>

²⁴⁶⁷ Greater Visakhapatnam Municipal Corporation and IFC Partner to Drive Resilient Urban Development, World Bank Group (Mumbai) 8 September 2025. Access Date: 8 October 2025. <https://www.ifc.org/en/pressroom/2025/greater-visakhapatnam-municipal-corporation-and-ifc-partner-to-drive-resilient-urb>

On 15 September 2025, the European Commission and IBRD provided a EUR67,000,000 supplementary contribution to the Consultative Group on International Agricultural Research Trust Fund.²⁴⁶⁸ This includes EUR10,000,000 paid upon signature of the amendment, EUR25,000,000 by 31 October 2025, EUR25,000,000 by 31 March 2026 and EUR7,000,000 by 30 March 2027.

On 30 September 2025, the World Bank's Board of Executive Directors approved a USD25 million IDA financed Saint Lucia Urban Resilient Flood Investment Project to reduce flood risk in vulnerable communities, including support from the European Union's Resilient Caribbean Program.²⁴⁶⁹ The operation will focus on Castries, Anse La Raye and their river basins and will strengthen disaster preparedness and climate resilient infrastructure.

The European Union has partially complied with its commitment to collectively mobilize more headroom and concessional finance to boost World Bank capacity to help low- and middle-income countries that need help in addressing global challenges, with a clear framework for the allocation of scarce concessional resources, and to provide strong support for the poorest countries. The European Union has taken strong action to mobilize more headroom and concessional finance through additional fund guarantees for the International Finance Corporation and co-financing the IDA and IFC's development projects. However, it has not taken strong action for a clear framework on the allocation of scarce concessional resources and has decreased funding for the World Bank's trust funds.

Thus, the European Union receives a score of 0.

Analyst: Christine Huang

Background

The G20 has consistently reinforced its role as an inclusive and effective forum that fosters improved dialogue and cooperation to address global challenges. The inclusion of the African Union in the G20 in 2023 marks a significant step toward amplifying Africa's voice in international decision-making. Ensuring Africa's active participation in global governance is important for tackling shared challenges and promoting equitable development. The integration of the African Union must align with its Agenda 2063, which serves as a strategic framework for achieving inclusive and sustainable socio-economic development over a 50-year period.²⁴⁷⁰

At the 2009 Pittsburgh Summit, G20 leaders reaffirmed their commitment towards investing in official development assistance in pursuit the Millenium Development Goals, particularly in the region of sub-Saharan Africa.²⁴⁷¹

²⁴⁷⁰ Second Continental Report on The Implementation of Agenda 2063, African Union (Addis Ababa) 10 February 2022. Access Date: 5 March 2025. <https://au.int/en/documents/20220210/second-continental-report-implementation-agenda-2063>

At the 2010 Toronto Summit, G20 leaders acknowledged the developmental needs of Africa and ongoing challenges in meeting the Millennium Development Goals.²⁴⁷² They committed to expanding the resources and capabilities of the African Development Bank in supporting Africa's long-term development.

At the 2010 Seoul Summit, G20 leaders committed to supporting regional integration efforts in Africa and to efforts to establish a free trade area.²⁴⁷³ In an effort to better include the global community in consultative efforts, the leaders reached a consensus on summit invitations to non-members, agreeing to issue no more than five invitations, at least two of which will be to African states.

At the 2011 Cannes Summit, G20 leaders declared that it would support efforts to “improve capacities and facilitate the mobilization of resources” for infrastructure and development projects in the developing world, particularly in sub-Saharan Africa.²⁴⁷⁴ G20 leaders also encouraged multilateral development banks to create digital regional information marketplace platforms to improve access to investment information and address challenges in development financing.

At the 2013 St Petersburg Summit, G20 leaders committed to replenishing the African Development Fund.²⁴⁷⁵ Moreover, they welcomed progress made during the cycle on the assessment of Project Preparation Facilities for infrastructure in the region of Africa.

At the 2015 Antalya Summit, G20 leaders pledged to collaborate with African states, particularly in sub-Saharan Africa, along with other relevant parties, to promote regional integration, development, investment and capacity building.²⁴⁷⁶ Their efforts aimed to facilitate greater access to energy worldwide.

At the 2017 Hamburg Summit, G20 leaders committed to supporting African countries in joining the G20 Africa Partnership to promote sustainable and inclusive economic growth and development.²⁴⁷⁷ The G20 encouraged private sector investment to drive economic opportunities, job creation and development. Emphasizing equal partnership, the G20 welcomed African ownership and pledged to align efforts with the African Union's Agenda 2063 and the Programme for Infrastructure Development in Africa.

At the 2019 Osaka Summit, G20 leaders reaffirmed support for the G20 Africa Partnership, including the Compact with Africa (CwA).²⁴⁷⁸ They committed to stronger bilateral engagement and enhanced roles for the World Bank Group, African Development Bank and International Monetary Fund in implementing the CwA, while also supporting Africa's industrialization and other initiatives that contribute to the realization of the African vision under the African Union's Agenda 2063.

At the 2020 Riyadh Summit, G20 leaders committed to exploring sustainable financing options for Africa's development and growth.²⁴⁷⁹ They reaffirmed their support for the G20 Initiative on Industrialization in Africa

and Least Developed Countries, G20 Africa Partnership and the Compact with Africa and other related initiatives.

At the 2021 Rome Summit, G20 leaders reaffirmed their support for African Countries, particularly through the G20 Initiative on Industrialization in Africa and Least Developed Countries, G20 Africa Partnership, the Compact with Africa and other related platforms.²⁴⁸⁰

At the 2023 New Delhi Summit, G20 leaders welcomed the African Union as a permanent member.²⁴⁸¹ They committed to strengthening ties with and supporting the African Union to realize its integration and aspirations under Agenda 2063. G20 leaders reaffirmed strong support to Africa, including through the G20 Compact with Africa and G20 Initiative on supporting industrialization in Africa and Least Developed Countries.

At the 2024 Rio de Janeiro Summit, G20 leaders welcomed the African Union as a full member of the G20.²⁴⁸² Moreover, they reiterated their commitment to aiding the African Union's pursuit Agenda 2063 and reaffirmed their support of initiatives like the G20 Compact with Africa and the G20 Initiative on supporting industrialization in Africa and Least Developed Countries.

Commitment Features

The target of this commitment is to support the trade and economic integration of the African Union under Agenda 2063. This commitment can be broken down into two components: 1) having a world class, integrative infrastructure that criss-crosses the African continent and 2) be a continent of seamless borders, and management of cross-border resources through dialogue, such as by providing support for the free movement of people goods, and services in Africa. Actions undertaken by G20 members should be led by the AU.

Definitions and Concepts

“Support” is understood to mean the provision of aid and assistance to an initiative or entity.²⁴⁸³ In the context of the commitment, it refers to the provision of aid and assistance to the African Union's Agenda 2063 and its and trade and economic integration aspirations.

The “African Union” refers to the intergovernmental organization of the 55 African member states that comprise the African continent.²⁴⁸⁴

“Realize” is understood to mean “to bring into concrete existence.”²⁴⁸⁵ In the context of the commitment is refers to concrete outcomes in support of the African Union's aspirations.

“Trade” refers to the trade goals outlined in the African Union's Agenda 2063. These goals include but are not limited to the strengthening of Africa's global trade, the improvement of infrastructure across Africa to facilitate trade, and the promotion of intra-Africa trade.²⁴⁸⁶

²⁴⁸⁰ G20 Rome Leaders' Declaration, G20 Research Group (Toronto) 31 October 2021. Access Date: 4 March 2025. <https://www.g20.utoronto.ca/2021/211031-declaration.html>

²⁴⁸³ Compliance Coding Manual for International Commitments, G20 Information Centre (Toronto) 12 November 2020. Access Date: 8 March 2025. https://www.g7.utoronto.ca/compliance/Compliance_Coding_Manual_2020.pdf

²⁴⁸⁴ About the African Union, African Union (Addis Ababa) n.d. Access Date: 8 March 2025. <https://au.int/en/overview>

²⁴⁸⁵ Compliance Coding Manual for International Commitments, G20 Information Centre (Toronto) 12 November 2020. Access Date: 8 March 2025. https://www.g7.utoronto.ca/compliance/Compliance_Coding_Manual_2020.pdf

²⁴⁸⁶ Documents Agenda 2063: The Africa we want (Popular version), African Union (Addis Ababa) 10 June 2013. Access Date: 9 March 2025. https://au.int/Agenda2063/popular_version

“Economic integration” refers to the goals of continental unity, culminating in full economic integration across Africa.²⁴⁸⁷

“Agenda 2063” refers to the African Union’s strategic framework to deliver on its goal for inclusive and sustainable development over a 50-year period.²⁴⁸⁸ It has seven “aspirations.” The second is “an integrated continent” and is the focus of this commitment. Aspiration 2 of Agenda 2063, “An Integrated Continent Politically united and based on the ideals of Pan Africanism and the vision of African Renaissance” includes 4 economic and political subgoals: United Africa (Federal or Confederate); established and functional Continental Financial and Monetary Institutions; world class infrastructure criss-crossing Africa; and the entrenchment of democratic values, practices, universal principles of human rights, justice and the rule of law.

General Interpretive Guidelines

Full compliance, or a score of +1, will be given to a G20 member that takes strong economic and trade action in support of the two relevant components outlined in Agenda 2063 under Aspiration 2 of: 1) having a world class, integrative infrastructure that criss-crosses the African continent and 2) be a continent of seamless borders, and management of cross-border resources through dialogue. Strong actions focusing on the integrative infrastructure include the development of high-speed railway networks, roads, shipping lines, sea and air transport and information and communication technology. Strong actions also include providing financial support for the free movement of people, goods and services in Africa.

Partial compliance, or a score of 0, will be assigned to a G20 member that takes strong action in one of the two components or moderate actions in both of components outlined in Agenda 2063 under Aspiration 2 of: 1) having a world class, integrative infrastructure that criss-crosses the African continent or 2) be a continent of seamless borders, and management of cross-border resources through dialogue. Moderate actions in this area include verbal commitments to building infrastructure or the signing of economic integration declarations without implementation strategies.

Non-compliance, or a score of –1, will be assigned if a G20 member takes no action in the two relevant components outlined in Agenda 2063 under Aspiration 2 of: 1) having a world class, integrative infrastructure that criss-crosses the African continent and 2) be a continent of seamless borders, and management of cross-border resources through dialogue. It will also be assigned to a G20 member that takes actions that are directly and explicitly antithetical to the commitment, such as halting investment into African infrastructure projects, implementing trade barriers, terminating trade agreements and suspending trade summits and conferences.

²⁴⁸⁷ Documents Agenda 2063: The Africa we want (Popular version), African Union (Addis Ababa) 10 June 2013. Access Date: 9 March 2025. https://au.int/Agenda2063/popular_version

²⁴⁸⁸ Agenda 2063: The Africa we want, African Union (Addis Ababa) n.d. Access Date: 9 March 2025 <https://au.int/en/agenda2063/overview>

Scoring Guidelines

-1	The G20 member 1) takes zero actions to a) having a world class, integrative infrastructure that criss-crosses the African continent or b) be a continent of seamless borders, and management of cross-border resources through dialogue; or 2) takes actions directly and explicitly antithetical to the commitment.
0	The G20 member takes strong action in one of the following areas or moderate actions in both of the following areas: 1) having a world class, integrative infrastructure that criss-crosses the African continent or 2) be a continent of seamless borders, and management of cross-border resources through dialogue
+1	The G20 member has taken strong action in both 1) having a world class, integrative infrastructure that criss-crosses the African continent and 2) be a continent of seamless borders, and management of cross-border resources through dialogue.

Argentina: 0

Argentina has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 5 December 2024, Ambassador to South Africa Alberto D'Alotto reaffirmed Argentina's commitment to increase international trade with South Africa following a visit to San Miguel Global's factory in Port Elizabeth.²⁴⁸⁹

On 11 December 2024, Argentina announced the opening of new markets in Morocco, following coordinated efforts by the Foreign Ministry, the Secretariat of Agriculture and the National Agri-Food Health and Quality Service.²⁴⁹⁰ The Government of Argentina emphasized its continued commitment to expanding and diversifying Argentina's exports and global market reach.

On 21 February 2025, Undersecretary of Trade and Investment Promotion Pablo Sivori participated in a high-level Africa–Latin America dialogue co-hosted by the African Union at Expo 2025 Dubai.²⁴⁹¹ The AU-led event focused on enhancing South–South cooperation in agriculture, food security, climate adaptation and Agenda 2063, with Argentina contributing to discussions on shared frameworks for sustainable development, trade and climate change resilience.

Argentina has partially complied with its commitment to support the African Union in realizing the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Through its participation in multilateral events, Argentina has taken moderate action to support integrative infrastructure, seamless borders, and cross-border dialogue. However, it has not taken strong action in both key components of the commitment.

Thus, Argentina receives a score of 0.

Australia: 0

Australia has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 12 December 2024, the Australian Centre for International Agricultural Research (ACRIAR) hosted a workshop in Nairobi, Kenya under the Africa-Australia Partnership for Climate Responsive Agriculture (AAPCRA) to improve the capacity of Africa's agricultural systems.²⁴⁹² This initiative aims to support research on improving sustainable crop and livestock systems, bolstering agricultural partnerships.

On 28 March 2025, Australia Awards (the Australian Government's African assistance program) announced a course delivered by the Institute for International Trade (IIT) on "Enhancing Trade Facilitation in Africa."²⁴⁹³ The course brought participants from the public and private sector to develop tools and strategies to improve trade facilitation and regional integration in Africa. It addressed topics including digital trade systems, addressing non-tariff barriers, empowering women and youth and reducing trade barriers across borders.

On 16 July 2025, Assistant Minister for Immigration and the Assistant Minister for Foreign Affairs, Matt Thistlethwaite, announced the Australian delegation's participation in the Commonwealth Trade Ministers' Meeting.²⁴⁹⁴ The meeting aimed to strengthen free trade across Commonwealth countries, including 21 African countries.

On 29 July 2025, Export Finance Australia issued a USD100 million loan to the Emerging Africa & Asia Infrastructure Fund.²⁴⁹⁵ These funds will support the development of sustainable infrastructure and renewable energy across Africa and the Asia-Pacific.

On 3 September 2025, representatives from Australia and the African Union (AU) participated in the 23rd Africa Down Under (ADU) conference in Perth to engage in discussions on African mining and energy opportunities.²⁴⁹⁶ The ADU serves as a forum for Africa-Australia business relations.

On 17 October 2025, the House of Representatives adopted a new inquiry into the expansion of Australia's trade and investment into Africa.²⁴⁹⁷ In particular, the inquiry highlighted enhancing engagement with the African Continental Free Trade Area recognizing the diversity of the African market.

Australia has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

While Australia has invested funds towards developing Africa's world-class integrative infrastructure, it has taken no action to help relevant parties achieve seamless borders and the management of cross-border resources through dialogue.

Thus, Australia receives a score of 0.

Analyst: Bryn Walton Williams

Brazil: +1

Brazil has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 21 November 2024, Brazil, alongside China, South Africa and the African Union, jointly launched the Initiative on International Cooperation in Open Science.²⁴⁹⁸ The initiative aims to promote the free flow of science and technology resources among the Global South. With explicit calls to support joint scientific infrastructure and open-access research, it advances Agenda 2063 and the goal of establishing seamless cross-border cooperation and integrative infrastructure across Africa.

On 8 January 2025, Minister of Culture Margareth Menezes traveled to Benin to inaugurate a Brazil-Benin Cultural Cooperation Committee and attend the Festival of Ancestral Cultures in Ouidah.²⁴⁹⁹ During the visit, Brazil and Benin agreed to implement new collaborative projects in culture, infrastructure and sports, building on a 2024 agreement between President Luiz Inácio Lula da Silva and Benin President Patrice Talon.

On 27 January 2025, Brazil expanded its economic and technical cooperation with African nations by launching a business mission to West Africa through the Brazilian Trade and Investment Promotion Agency (ApexBrasil).²⁵⁰⁰ This mission brought over 40 Brazilian companies to Nigeria, Ghana, Côte d'Ivoire and Senegal to pursue investment opportunities and partnerships. ApexBrasil stated that President Lula's decision to re-engage with Africa has made the continent a priority and aims to reverse the trade decline in the previous decade. The West Africa mission was part of a broader strategy to strengthen Brazil's trade and investment ties and presence across Southern, West, East and North Africa through trade fairs and business delegations.

On 10 April 2025, the Brazil Africa Institute (IBRAF) partnered with the United Arab Emirates to train young African agricultural professionals in Angola and Guinea-Bissau through the Youth Technical Training Program (YTTP) with specialized expertise in the cocoa and cashew industries.²⁵⁰¹

On 20 May 2025, as part of the Brazil-Africa Dialogue on Food Security, Fight Against Hunger and Rural Development, President Lula highlighted the role he saw Brazil playing in Africa.²⁵⁰² Addressing the audience at the opening, President Lula pledged "solidarity, technological exchange and assistance for the development of local agriculture." This reaffirms Brazil's commitment to strengthening cooperation on the African continent.

On 23 May 2025, President Lula and President of Angola held a meeting to strengthen political-diplomatic relations and cooperation in the African continent.²⁵⁰³ President Lula stated the importance of facilitating intra-continental trade to bridge the physical connectivity between African countries and support the economic development of the region.

On 29 May 2025, the Ministry of Foreign Affairs and Agriculture and the Ministry of Agriculture concluded an agricultural export negotiation with Cameroon to strengthen the livestock industry and expand business to the rest of the African continent.²⁵⁰⁴

On 27 June 2025, Vice President Geraldo Alckmin and Vice President of Nigeria Kashim Shettima reaffirmed an agricultural mechanisation partnership worth USD1 billion at the Second Nigeria–Brazil Strategic Dialogue Mechanism in Abuja.²⁵⁰⁵ The “Green Imperative” project deploys Brazilian farming equipment, training and service centres across Nigeria.

On 4 November 2025, Brazilian government representatives participated in the Brazil African Forum 2025 where government officials, business leaders, academia and civil society representatives engage in discussions on initiatives to drive sustainable agriculture and food security.²⁵⁰⁶ Focus sectors of the forum include climate-smart agriculture, investment and financing, renewable energy, logistics and infrastructure and research and development. The initiative reflects Brazil’s commitment to expanding commercial initiatives spanning trade and agriculture, facilitating the management of cross-border resources.

Brazil has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Brazil has pursued substantial diplomacy with African Union members, from cultural missions to economic and technical cooperation. These actions constitute strong support for African involvement in global trade and infrastructural development. Brazil has taken strong action to achieve the criteria of having a world-class integrative infrastructure that criss-crosses the African continent and be a continent of seamless borders and the management of cross-border resources through dialogue through the series of initiatives pioneered by the Brazil Africa Forum.

Thus, Brazil receives a score of +1.

China: +1

China has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 21 November 2024, the Ministry of Science and Technology announced that China, Brazil, South Africa and the African Union jointly launched the Initiative on International Cooperation in Open Science.²⁵¹⁴ The initiative aims to promote the free flow of science and technology resources among the Global South. With explicit calls to support joint scientific infrastructure and open-access research, it advances Agenda 2063 and the goal of establishing seamless cross-border cooperation and integrative infrastructure across Africa.

On 1 December 2024, China granted zero tariff treatment to all items previously subject to a 100 per cent tariff for least developed countries that have established diplomatic relations with China, including 33 African countries.²⁵¹⁵ This initiative aims to support the needs of and share development opportunities with countries in the Global South, helping the African Union to realize trade and economic integration.

On 5 January 2025, Foreign Minister Wang Yi visited Namibia, Congo, Chad and Nigeria to promote bilateral relations with African countries.²⁵¹⁶ During his visit to Namibia, Minister Wang expressed China's willingness to support Namibia's modernization efforts by expanding collaboration in infrastructure, digital economy and energy.²⁵¹⁷ In Chad, Prime Minister Allamaye Halina welcomed increased Chinese business investment and expressed the willingness to strengthen bilateral economic relations.

On 15 February 2025, President Xi Jinping sent a congratulatory message to the 38th African Union Summit, reaffirming China's commitment to deepening China-Africa relations and supporting Africa's development.²⁵¹⁸ President Xi emphasized the importance of implementing the "six proposals for modernization" and the Ten Partnership Initiatives. These actions "cover many key areas of Africa's modernization, including... trade and financial inclusion and are of great significance to the development transformation of the African continent."

On 20 March 2025, the China Civil Engineering Construction Corporation, a state enterprise, announced a USD1.4 billion investment in the rehabilitation of the Tanzania-Zambia Railway Authority railway.²⁵¹⁹ This investment allocates USD1 billion for track repair, safety enhancements and efficiency improvements and USD400 million for the purchase of new locomotives and wagons. The refurbishment aims to modernize this critical transportation corridor, enhancing regional connectivity and trade between Tanzania and Zambia. This initiative aligns with the African Union's Agenda 2063 objectives by promoting integrative infrastructure, facilitating seamless cross-border movement and economic integration.

On 29 April 2025, the China Chamber of Commerce to Africa (CCCA) was officially launched in Addis Ababa under the guidance of the Chinese Mission to the African Union.²⁵²⁰ Spanning sectors such as energy, telecom, agriculture and construction, the CCCA aims to foster economic integration and facilitate partnerships that directly support Agenda 2063 objectives. Chinese officials highlighted that the chamber will strengthen cooperation and trade between China and Africa, helping to enhance regional value chains, attract investment and improve logistics infrastructure.

On 6 May 2025, the Export-Import Bank of China provided Nigeria with a USD652 million funding package to construct a vital road corridor.²⁵²¹ This road will serve as a key evacuation corridor, facilitating the movement of goods from the Lekki Deep Sea Port and the Dangote Petroleum Refinery to other parts of the country. This project highlights China's continued commitment to investing in infrastructure across Africa.

On 11 June 2025, China hosted the Follow-up Actions of the Forum on China–Africa Cooperation (FOCAC) Coordinators' Ministerial Meeting in Changsha with participation from over 100 African officials and AU Commission representatives.²⁵²² Foreign Minister Wang Yi reaffirmed China's commitment to implementing the Ten Partnership Actions from the 2024 FOCAC Beijing Summit, with a focus on trade, infrastructure and digital cooperation. The meeting also produced the China–Africa Changsha Declaration on Global South Solidarity. This high-level engagement reflects strong action toward both integrative infrastructure and cross-border cooperation under Agenda 2063.

On 23 September 2025, the Chinese Embassy in South Africa alongside the South African Department of Trade, Industry and Competition hosted the South Africa-China Trade and Investment Promotion Conference.²⁵²³ During the conference, Ambassador Wu Peng highlighted China's openness to signing an Agreement on a China-Africa Economic Partnership for Shared Development which would implement zero-tariff trading across 53 African countries.

On 26 September 2025, China and the AU signed a memorandum of understanding (MoU) on a cooperative framework in the fields of science and technology.²⁵²⁴ The MoU aims to strengthen ongoing cooperation by co-establishing science and technology platforms including research centres, institutes and laboratories. This initiative also contributes towards the implementation of the ten-year Science, Technology and Innovation Strategy for Africa (STISA 2025-2034) and Agenda 2063, advancing action towards developing integrative infrastructure and cross-border cooperation.

On 20 October 2025, Ambassador Jiang Feng met with AUC Chairperson Mahmoud Ali Youssouf to discuss China-Africa partnerships and reflections the proposed “Cooperation Supporting Africa's Modernisation” initiative that emerged from the 2024 FOCAC Beijing Summit.²⁵²⁵ The pair reaffirmed their commitment to strengthen AU-China relations.

China has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. By investing in logistical infrastructure across various African countries, China has demonstrated strong support for cross-continental connectivity and logistical development. Simultaneously, tariff reductions and high-level diplomatic engagements constitute strong support for seamless borders and dialogue.

Thus, China receives a score of +1.

Analyst: Jasmin Simopoulos

France: 0

France has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 29 November 2024, Minister for Europe and Foreign Affairs Jean-Noël Barrot met with the chairperson of the African Union.²⁵²⁶ They discussed the progress of the African Continental Free Trade Area and opportunities for France to support innovation, climate, communication, cybersecurity and space.

On 16 April 2025, France held the Ancrages Forum in Marseille aimed at revitalizing France-Africa relations.²⁵²⁷ The Government of France announced several initiatives including pledging to support entrepreneurs in Africa.

On 17 April 2025, Minister Barrot reaffirmed France's commitment to African diasporas by announcing the African Diaspora Action Plan.² This action plan provides an integrated framework linking several programs that support Africa's financial money transfer infrastructure, private sector and entrepreneurs.

On 15 May 2025, Minister Barrot and Minister Delegate for Europe Benjamin Haddad passed a bill that approved amendment No. F/BG/2023/04 to the African Development Fund.²⁵²⁸ This amendment enables the African Development Fund to access international financial markets, allowing it to finance investment and better foster development.

On 30 October 2025, France held a conference in Paris on peace and prosperity in the Great Lakes region.²⁵²⁹ The conference aims to facilitate discussion on advancing regional economic integration, engaging the international community in securing peace and prosperity, securing tangible support for local communities.

France has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. France has made diplomatic efforts to meet with African leaders and reiterated its commitments to development and free trade in the region, thus constituting moderate action to support seamless borders and dialogue. Moreover, France has demonstrated a moderate commitment to integrative infrastructure through its actions regarding the African Development Fund and the creation of the African Diaspora Action Plan.

Germany: +1

Germany has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 28 November 2024, Germany announced that it would work with South Africa to promote renewable energy and facilitate a socially just and sustainable green transition.²⁵³⁰ As part of the Just Energy Transition Partnership, Germany pledged EUR276 million to support South Africa's shift to renewable power, with the majority of funds being a loan to advance energy transition.

On 9 December 2024, the Kreditanstalt für Wiederaufbau (KfW), a state-owned development bank, and the African Trade & Investment Development Insurance (ATIDI) announced a strategic partnership to improve access to finance for Small and Medium Enterprises (SMEs).²⁵³¹ The initiative aims to facilitate cross border trade across the African continent by providing risk mitigation strategies for financial institutions through the Portfolio Risk Sharing Agreement (PoRSA) program and streamline the transportation of goods across borders through the Common Market for Eastern and Southern Africa (COMESA) scheme.

On 8 January 2025, the Federal Government published its Africa Policy Guidelines, which set out four priorities for cooperation with African countries, including a focus on sustainable growth and better economic trade between companies.²⁵³² The government aims to actively boost trade with Africa. Priorities include implementing the African Continental Free Trade Area with European Union partners, expanding the EU's economic partnership agreements with African nations and supporting the involvement of German small and medium-sized businesses in Africa.

On 12 February 2025, Germany and the African Development Bank committed to joint initiatives that would boost energy access and private sector growth in Africa.²⁵³³ The two parties signed significant agreements for the Alliance for Green Infrastructure in Africa (AGIA), specifically the AGIA Project Development Fund.

On 18 March 2025, KfW and the African Development Bank signed a EUR18.4 million financing agreement for the New Partnership for Africa's Development's Infrastructure Project Preparation Facility Special Fund.²⁵³⁴ This contribution supports the deployment of financing towards infrastructure development in the continent, in alignment with the UN SDG goals and Agenda 2063.

On 11 April 2025, Parliamentary State Secretary to the German Federal Minister for Economic Cooperation and Development Niels Annen met with the Chairperson of the AU Commission Mahmoud Ali Youssouf to

advance strategic partnerships between the AU and Germany.²⁵³⁵ State Secretary Annen reaffirmed Germany's commitment to the "further implementation of the Agenda 2063."

On 5 May 2025, the Christian Democratic Union of Germany (CDU), the Christian Social Union in Bavaria (CSU) and the Social Democratic Party of Germany (SPD) signed a coalition agreement reiterating Germany's commitment to supporting the African Continental Free-Trade Area (AfCFTA) through enhancing trade relations with African countries and economic partnerships with Cameroon, Côte d'Ivoire, and Ghana.²⁵³⁶

On 14 May 2025, the AfDB and the German Investment and Development Company (DEG), a state-owned development institution, hosted a strategic meeting deepen their partnership in supporting Africa's private sector development.²⁵³⁷ The two parties discussed collaborative efforts to bolster private equity funds, small and medium enterprises, renewable energy, infrastructure development and industrial development across Africa.

On 21 May 2025, Minister for Foreign Affairs Johann Wadephul met with the African Union Commission (AUC) Chairperson Mahmoud Ali Youssouf, committing to strengthen collaborative efforts in economic development of the continent.²⁵³⁸

On 26 May 2025, Parliamentary State Secretary of the Federal Ministry for Economic Cooperation and Development (BMZ) Bärbel Kofler attended the 60th Annual Meeting of the AfDB in Abidjan.²⁵³⁹ In the meeting, Germany emphasized that it would continue to be a partner of the AfDB through participating in the development of energy supply, climate action and better financial management across Africa.

On 18 June 2025, the Federal Ministry for Economic Cooperation and Development alongside the EU and the Ministry of Health of Malawi jointly launched the "Support to the Public Health Institute of Malawi" project under the Global Gateway platform.²⁵⁴⁰ This package offers EUR4.6 million of funding over four years to strengthen Malawi's health infrastructure and capability.

On 25 June 2025, officials from the BMZ invited a delegation from the African Development Bank Group to Berlin for a presentation on the 2025 African Economic Outlook Report (AEO).²⁵⁴¹ During the meeting, officials emphasized that the policy recommendations in the AEO will collaboratively shape strategies for future collaboration, investment and infrastructure development with African partners.

On 14 August 2025, KfW committed to providing EUR26 million towards the Alliance for Green Infrastructure in Africa – Project Development Fund (AGIA-PD).²⁵⁴² The AGIA-PD is a financing initiative to provide capital for green infrastructure in Africa, such as renewable energy and sustainable transport and water. The investment will help promote private investments in infrastructure and economic growth across the African continent.

On 8 September 2025, the BMZ launched the Engaging for Africa's Green Energy Transition (ENGAGE) initiative which is to be funded by the BMZ.²⁵⁴³ ENGAGE will expedite and support the implementation of projects including the African Single Electricity Market and the Continental Power Systems that will build electricity infrastructure across the continent as part of African Union's Agenda 2063.

On 9 October 2025, Germany and the Intergovernmental Authority on Development (IGAD) met to discuss their ongoing partnership in the Horn of Africa.²⁵⁴⁴ Germany affirmed its commitment to provide an addition EUR16 million to the Regional Migration Policy Framework and Protocol on the Free Movement of Persons, EUR2.5 million in funding to the Strengthening IGAD's Capacity for Implementation of the Development Agenda (SCIDA), and EUR22.5 million for Regional Risk Finance Programme. These programs aim to promote the free movement of people, strengthen institutional capacity, and enhance regional policy coordination.

Germany has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters the second decade of implementation. Germany has provided strong economic support to various initiatives to further infrastructural development across the continent. Moreover, Germany has also taken strong action through its support of the Regional Migration Policy Framework and Protocol to advance the goal of Africa being a continent of seamless borders that manages cross-border resources through dialogue.

Thus, Germany receives a score of +1.

This demonstrates Italy's support for the Mattei Plan and its focus on sustainable development in African countries.

On 21 May 2025, Undersecretary of State for Foreign Affairs Maria Tripodi participated in the EU-African Union Ministerial Meeting in Brussels where she highlighted Italy's efforts to advance socio-economic development in the African continent within the framework of the Mattei Plan.²⁵⁷¹

On 28 May 2025, the MASE and UN-Habitat co-organized the Special Event "Multilevel Governance for the Sustainable Development Goals (SDG) Localization" in Nairobi.²⁵⁷² This forum brought together UN member states to foster dialogue and strengthen collaboration on implementing SDGs at local and national levels. This underlines Italy's commitment to the Mattei Plan and to advancing multilevel governance as a pillar of sustainable development in Africa.

On 20 June 2025, the Ministry of Enterprises and Made in Italy alongside the UNDP officially launched the AI Hub.²⁵⁷³ The AI Hub aims to channel global AI partnerships to strengthen the local AI infrastructure ecosystem in Africa.

On 20 June 2025, Prime Minister Meloni hosted the Mattei Plan Summit in Rome.²⁵⁷⁴ Discussions centered around coordinating investment and development in the Lobito Corridor. The summit resulted in EUR1.2 billion of new EU-Italy led strategic investments.

On 2 July 2025, Minister Pichetto launched the Platform for Investment Support and Technical Assistance at the UNDP Rome Centre to support investment and technical assistance in developing countries, with particular focus on Africa.²⁵⁷⁵ This is in accordance with the Mattei Plan and helps promote development as well as sustainable energy infrastructure in Africa.

On 8 July 2025, the MASE participated in the Climate Leadership and Innovation Conference in Rabat.²⁵⁷⁶ This demonstrates Italy's commitment to the Mattei Plan and its support for youth leadership and climate innovation in Africa.

On 23 July 2025, Italy hosted the fifth Italy-Algeria Intergovernmental Summit during which Italy signed various agreements with Algeria promoting bilateral cooperation.²⁵⁷⁷ Moreover, the events also included an

Italy-Algeria Business Forum. As part of this, the state export credit and insurance company SACE signed a memorandum of understanding with BF International to support the development of model farms and agro-industrial value chains by Italian investors across Africa.²⁵⁷⁸

On 28 July 2025, Prime Minister Meloni co-hosted the United Nations Food Systems Summit alongside Ethiopian Prime Minister Abiy Ahmed in Addis Ababa.²⁵⁷⁹ This demonstrates Italy's commitment to infrastructural development in Africa, to the advancement of food system transformation and to supporting cross-border cooperation in food security and supply chains.

On 31 July 2025, Prime Minister Meloni met with Tunisian President Kais Saied.²⁵⁸⁰ During the meeting, the two leaders discussed the implementation of infrastructural projects under the Mattei plan. Prime Minister Meloni reaffirmed Italy's commitment to supporting the ELMED power line project.

On 30 September 2024, Ambassador of Italy to Uganda, Mauro Massoni signed the agreement for the “strengthening the private sector through capacity building and international partnerships in Uganda.”²⁵⁸¹ The agreement, funded by the Italian Agency for Development Cooperation, provides EUR1.7 million to strengthen the local private sector in Uganda through the Mattei Plan.

Italy has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Italy has reaffirmed its commitment to development in Africa, notably through the Mattei Plan. It has taken strong action to advance Africa having world-class integrative infrastructure through the launch of the AI Hub, the Platform for Investment Support and Technical Assistance and other substantive initiatives. It has taken strong action to facilitate the management of cross-border resources through dialogue by hosting the United Nations Food Systems Summit with a focus on cross-border cooperation and food supply chains.

Thus, Italy receives a score of +1.

On 13 February 2025, Parliamentary Vice-Minister for Foreign Affairs Eri Arfiya participated in bilateral meetings with representatives of various African countries and organizations at the Ordinary Session of the Assembly of the African Union.²⁵⁸³ Meetings included ministers of the Republic of Seychelles, Mozambique, Botswana, Ghana and Ethiopia, as well as representatives of the United Nations Economic Commission for Africa and AUDA-NEPAD. During these talks, Vice-Minister Eri requested each country's participation at the upcoming 9th Tokyo International Conference on African Development and reaffirmed the importance of bilateral relations.

On 21 February 2025, Minister of Foreign Affairs Iwaya Takeshi attended the G20 Foreign Ministers' Meeting where he reiterated Japan's commitment to strengthening cooperation with Africa through collaboratively addressing challenges through the Tokyo International Conference on African Development (TICAD) in August.²⁵⁸⁴ By aligning TICAD outcomes with G20 priorities, Japan aims to support and promote Africa's development under "the principles of African 'ownership' and international 'partnership.'"²⁵⁸⁵

On 26 March 2025, JICA signed a loan agreement with the Banque Ouest Africaine de Développement (BOAD).²⁵⁸⁶ The BOAD is a development bank that works to support major infrastructural projects in West Africa and this funding will help the organization continue its long-term financing of projects such as the West Africa Growth Ring Corridor Development Master Plan.

On 29 March 2025, Minister Iwaya met with representatives from the African Diplomatic Corps (ADC) where Minister Iwaya underscored development efforts and reiterated Japan's commitment to facilitating dialogue and partnerships with the African continent.²⁵⁸⁷ Minister Iwaya committed to supporting Agenda 2063 and working "both bilaterally and internationally, including at TICAD."

On 11 April 2025, the Ambassador to the African Union Nakagawa Tsutomu met with Chairperson of the African Union Commission Mahamoud Ali Youssouf.²⁵⁸⁸ They discussed strengthening AU-Japan relations, including deepening bilateral cooperation, Japan's support in peace and security efforts and preparations for the upcoming Ninth Tokyo International Conference on African Development Summit. They agreed to establish a high-level policy dialogue mechanism to align Japan's support with the AU's strategic priorities and identify concrete areas for collaboration.

On 12 June 2025, the Japan External Trade Organization (JETRO) attended the African Green Hydrogen Summit hosted by South Africa.²⁵⁸⁹ The summit's key objectives were to discuss industrialization in Africa and promote green hydrogen as the future of energy infrastructure on the continent.

On 20 August 2025, Japan co-hosted the 9th TICAD conference alongside the AU, UN and UNDP.²⁵⁹⁰ The conference brought together representatives from 49 African countries alongside delegations from numerous other parties across the world to promote development in Africa. At this conference, over 300 cooperation documents were signed.²⁵⁹¹

On 20 August 2025, Prime Minister Ishiba Shigeru announced the creation of a common agenda initiative for Mozambique, Malawi and Zambia called the “Strengthening the Global Supply Chain through Nacala Corridor Development.”²⁵⁹² This initiative aims to promote cross border transportation infrastructure and industrial development in the Nacala Corridor region in cooperation with Mozambique, Malawi, Zambia and various private and public partners.

Japan has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Japan has demonstrated strong support for integrative infrastructure in Africa by providing material support and facilitating multilateral cooperation. Japan has also demonstrated strong support for seamless cross-border integration through its efforts to establish the OSBP Status Report.

Thus, Japan receives a score of +1.

Analyst: Rie Aiyama

Korea: 0

Korea has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 27 November 2024, the Ministry of Economy and Finance hosted the “Africa-EDCF Symposium” to facilitate economic cooperation between Korea and 21 African countries.²⁵⁹³ This initiative introduced future partnership plans through the Economic Development Cooperation Fund (EDCF) and presented various cooperation strategies put in place to advance large-scale development projects between Korea and Africa.

On 27 November 2024, Minister for Trade Cheong In-Kyo met with Moroccan Minister Karim Zidane to discuss expanding bilateral cooperation through an Economic Partnership Agreement.²⁵⁹⁴ This partnership would allow Korean firms to participate in projects within Morocco’s technology markets such as the renewable energy sector, boosting opportunities for investment and economic growth in Morocco.

On 5 February 2025, Second Vice Foreign Affairs Minister Kang In-sun participated in the inaugural Korea-Africa dialogue on critical minerals cooperation and expressed Korea’s commitment to “fostering long-term, mutually beneficial partnerships” with African nations.²⁵⁹⁵ This action demonstrates Korea’s intention to

further investment and economic cooperation with African countries through bilateral partnerships, particularly in the critical minerals sector and other related fields.

On 5 February 2025, Second Vice Minister Kang had meetings with Tanzania's Deputy Minister of Minerals Steven Kiruswa, South Africa Deputy Minister of Mineral and Petroleum Resources Phumzile Mgcina and Zimbabwe Minister of Mines and Mining Development Winston Chitando during the Korea-Africa dialogue on critical minerals cooperation.²⁵⁹⁶ They discussed the expansion of partnerships reached at the 2024 South Korea-Africa summit. This reflects Korea's commitment to advancing cooperative efforts with Tanzania, South Africa, and Zimbabwe through the discussion of initiatives such as the Mahenge Liandu Graphite Project from the Minerals Security Partnership.²⁵⁹⁷

On 27 February 2025, the Ministry of Economy and Finance held 152nd EDCF Management Committee to discuss the operational direction for the fund's 2025-2027 implementation. The committee planned to approve funding for global development projects for the next three years and will focus on supply chain cooperation through initiatives such as the K-Finance package, an initiative launched in 2024 utilizing collaboration with multilateral development banks to finance large-scale projects in developing countries. The committee also agreed to increase the proportion of funding allocated to large-scale projects in Africa through the K-Finance package scheme.

On 11 March 2025, the Ministry of Agriculture, Food and Rural Affairs announced the expansion of the International Agriculture Cooperation Project by declaring the First Comprehensive Plan for its 2025-2029 run.²⁵⁹⁸ The project's plan includes developments for the K-Ricebelt project, which aims to provide assistance to approximately 14 African countries in rice farming.²⁵⁹⁹ This undertaking demonstrates Korea's commitment to supporting the advancement of agricultural infrastructure in African countries.²⁶⁰⁰

On 8 April 2025, Minister of Trade, Industry and Energy Dukgeun Ahn met with Moroccan Minister of Industry and Trade Ryad Mezzour to discuss bilateral cooperation initiatives regarding industry and trade.²⁶⁰¹ During the meeting, the ministers discussed launching negotiations for an Economic Partnership Agreement by initiating a trade and investment promotion framework.²⁶⁰² This action seeks to promote mutual economic growth through a partnership leveraging Korea's technology and Morocco's power as a regional hub for industrial trade.²⁶⁰³

²⁶⁰⁴ Mission to promote digital gov't cooperation in 2 African states, Korea.net (Sejong City) 7 May 2025. Access Date: 10 May 2025. <https://www.korea.net/NewsFocus/Sci-Tech/view?articleId=270915>

expertise on digital governance and engage in discussions supporting the expansion of bilateral cooperation in the sector. This initiative reflects Korea's commitment to strengthening public sector infrastructure for information and communication technology across Africa.

On 27 May 2025, Minister of Foreign Affairs Cho Tae-Yul met with Secretary-General of the AfCFTA Wamkele Keabetswe Mene to discuss efforts to promote economic cooperation between Korea and Africa, as well as support for capacity-building initiatives for the AfCFTA Secretariat.²⁶⁰⁵ The two officials also signed a memorandum of understanding for the newly established ROK-AfCFTA Cooperation Fund, which will put KRW6.5 billion towards projects expanding trade and commercial activity between Korea and Africa.

On 25 September 2025, the Embassy of the Republic of Korea and the Korea-Africa Foundation co-hosted the 2025 Korea-South Africa Future Dialogue featuring government leaders, as well as representatives from academia and industry.²⁶⁰⁶ Both countries aligned in priority goals, developed cooperation networks and reaffirmed their commitment to advancing action in education, technology, health and women's empowerment across the continent.

Korea has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Korea has demonstrated moderate support through a series of bilateral initiatives that promote economic development in Africa through expanding trade and investment in Africa relating to agriculture, digital governance and critical minerals. However, it has not taken strong action to advance having a world-class, integrative infrastructure that criss-crosses the African continent and be a continent of seamless borders and the management of cross-border resources through dialogue.

Thus, Korea receives a score of 0.

relations, focusing on trade.²⁶¹⁵ This action indicates Russia's interest in advancing a cooperative partnership with South Africa on political and economic affairs.

On 6 March 2025, Minister Lavrov met with Zimbabwe's Minister of Foreign Affairs and International Trade Amon Murwira to discuss bilateral relations.²⁶¹⁶ The meeting concerned expanding cooperative initiatives for trade, economic, and investment cooperation in minerals, energy, infrastructure and technology sectors.

On 1 April 2025, Deputy Prime Minister Yury Trutnev met with Namibia's Minister of International Relations and Trade, Selma Ashipala-Musavyi, to discuss bilateral relations and trade.²⁶¹⁷ The discussion highlighted "an almost twofold increase in bilateral trade" due to provisions set up as part of the Intergovernmental Russian Namibian Commission on Trade and Economic Cooperation and resulted in plans for further cooperation.

On 3 April 2025, Minister Lavrov met with a delegation from the Alliance of Sahel States featuring delegations from Mali, Burkina Faso and Niger.²⁶¹⁸ During these talks, Minister Lavrov highlighted the importance of the Alliance as a new multi-lateral organization promoting integration on the African continent. Moreover, he reiterated Russia's commitment to providing the Alliance with all-around assistance and announced plans to continue meeting with them regularly.

On 16 April 2025, Affairs Minister Lavrov met with South Africa's Minister of International Relations and Cooperation Ronald Lamola during the 18th meeting for the Mixed Intergovernmental Committee on Trade and Economic Cooperation.²⁶¹⁹ The officials discussed cooperation in trade and the economy and reaffirmed their mutual commitment to coordinating actions in multilateral forums such as BRICS, the G20 and the United Nations.

On 1 May 2025, Minister Lavrov met with Minister of Foreign Affairs, Cooperation, African Integration and Togolese Abroad of Togo Robert Dussey where Minister Lavrov reiterated Russia's commitment to bolstering bilateral partnerships and strengthening sustainable development in Africa.²⁶²⁰

On 26 May 2025, Minister Lavrov delivered remarks at the reception of Africa Day where he reiterated joint efforts to advance Russia-Africa relations and highlighted the establishment of the Department of Partnership with Africa in the Russian Foreign Ministry to advance economic and social development in the African continent.²⁶²¹

On 2 June 2025, Deputy Prime Minister Dmitry Chernyshenko announced that Russia will continue supporting international scientific and technical development initiatives through multilateral scientific research projects with key regional associations such as BRICS and the African Union.²⁶²² The minister also stated Russia's intention to provide funding for these cooperative projects, noting that the government has allocated an annual budget of RUB40 billion for this purpose.

Russia has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. While Russia has engaged in bilateral discussions with African countries, affirmed its commitment to the African Union and voiced support for the Alliance of Sahel States, a new regional multi-lateral initiative, it has not taken strong action to advance a world-class, integrative infrastructure that criss-crosses the African continent and be a continent of seamless borders and the management of cross-border resources through dialogue.

Thus, Russia receives a score of 0.

Analyst: CharliZe Medina

Saudi Arabia: -1

Saudi Arabia has not complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 1 March 2025, Saudi Arabia delivered 330 housing units to Tunisia.²⁶²³ This handover under the Saudi Fund for Development (SFD) underscores the SFD's USD150 million initiative to provide social housing across several regions of Tunisia. These actions promote Agenda 2063 Goal 10: "access to affordable and decent housing" and mark part of a wider commitment from Saudi Arabia to promote housing development in Africa.

On 11 September 2025, the Minister of Industry and Mineral Resources Bandar Alkhorayef participated in the Saudi-South Africa Joint Committee.²⁶²⁴ He expressed Saudi Arabia looked forward to expanding trade and investment relations with South Africa as well as the broader African continent.

Saudi Arabia has not complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Saudi Arabia has not taken substantive action to promote African economic integration or prominence in global trade. Saudi Arabia has only taken action to improve social housing within one country instead of the African Union as a whole. In addition, it has not taken steps to advance having a world-class, integrative infrastructure that criss-crosses the African continent and be a continent of seamless borders and the management of cross-border resources through dialogue.

Thus, Saudi Arabia receives a score of -1.²⁶²⁵

South Africa: +1

South Africa has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 21 November 2024, South Africa in partnership with China, Brazil and the African Union, jointly launched the Initiative on International Cooperation in Open Science.²⁶²⁶ The initiative aims to promote the free flow of science and technology resources among the Global South. With explicit calls to support joint scientific infrastructure and open-access research, it advances the African Union's Agenda 2063 goals of seamless cross-border cooperation and integrative infrastructure, particularly in the digital and research domains.

On 9 December 2024, International Relations Minister Ronald Lamola affirmed that South Africa will use the G20 Presidency to advance Agenda 2063.²⁶²⁷ South Africa aims to achieve this by prioritizing Africa's challenges on the agenda, especially on issues such as development, poverty, food security and high debt burden.

On 12 December 2024, President Cyril Ramaphosa addressed the inaugural South Africa-Angola Business Forum, where he emphasized deeper trade and investment ties between the two countries.²⁶²⁸ President Ramaphosa noted the importance of regional integration through the African Continental Free Trade Area (AfCFTA) and the Southern African Development Community Free Trade Agreement. He urged businesses to address challenges to promote economic growth and sustainable development across the region.

On 1 March 2025, Minister of Finance Enoch Godongwana led the Finance in Common Summit in Cape Town which called for global development institutions to collaborate in addressing development and poverty.²⁶²⁹ Minister Godongwana along with leaders of the African Development Bank urged other G20 members to strengthen financial commitments, especially for Africa's green transition and infrastructure. The summit also introduced Mission 300 which aims to deliver electricity to 300 million Africans by 2030.

On 18 March 2025, Deputy Minister of Trade and Competition Andrew Whitfield highlighted at the G20 Trade and Investment Group Working Session that South Africa will use the G20 presidency as an opportunity to promote African development.²⁶³⁰ South Africa aims to prioritize advocating for African integration through investments in infrastructure, productive sectors and the implementation of the AfCFTA as well as inclusive growth, green industrialization, WTO reform and global trade challenges.

On 29 April 2025, Deputy President Shipokosa Paulus Mashatile spoke at the Think20 Africa High-Level Dialogue.²⁶³¹ He reiterated Africa's commitment to leveraging its G20 presidency to promote African agency in global affairs and achieve key continent-wide priorities for development and industrialization, such as

strengthening disaster resilience, fostering debt sustainability, facilitating green energy transition, and harnessing critical minerals for development.

On 12 May 2025, President Ramaphosa attended the Africa CEO Forum in Abidjan, which aimed to strengthen trade and investment relationships across Africa.²⁶³² The South African government strongly supported domestic firms exploring new opportunities in African markets. South Africa's high-level engagement underscored its commitment to advancing Africa's economic integration. Additionally, President Ramaphosa reemphasized South Africa's dedication to fostering inclusive global cooperation, promoting a fair economic recovery and ensuring long-term environmental sustainability.

On 27 May 2025, Water and Sanitation Minister Pemmy Majodina attended the third Pan-African Implementation and Partnership Conference on Water in Zambia.²⁶³³ This demonstrates dedication to multilateral cooperation on improving and governing Africa's water infrastructure.

On 12 June 2025, South Africa adopted a new digital platform to facilitate coordination and implementation of the AfDB's operations at the country level.²⁶³⁴ This action will enable improved collaboration, exchange and information sharing amongst the African Development Bank Group's Regional Member Countries and ensure the overall effective delivery of the organization's development operations in Africa.

On 12 June 2025, the Ministry of Electricity and Energy hosted the African Green Hydrogen Summit to lead Africa's growth, industrialization and development in accordance with Agenda 2063.²⁶³⁵ The summit's key objectives were to discuss how green hydrogen infrastructure could shape the future energy industrialization of Africa. South Africa is leading this effort by engaging with the Southern African Development Community, the AU Commission on Infrastructure and Energy and the Programme for Infrastructure Development in Africa to develop shared infrastructure, common regulatory frameworks and regional value chains for continental growth and regional integration.

On 8 July 2025, the Development Bank of Southern Africa and the China Development Bank signed a CNY2.1 billion joint loan for financing projects in Africa.²⁶³⁶ The loan will be used to support infrastructure, energy, information and communication, water and sanitation and manufacturing projects across Africa.

Africa: The Ubuntu Approach.²⁶³⁷ This meeting aims to help countries overcome barriers to managing cross-border infrastructure.

On 13 August 2025, the Department of Water and Sanitation, along with the African Union Commission, the Continental African Water Investment Program, the African Union-African Investment Program (AU-AIP), the High-Level Panel on Water Investments for Africa and the African Union Development Agency, hosted the inaugural two-day Investment Summit in Western Cape.²⁶³⁸ The summit promoted continental water and sanitation projects for future investment and strengthened partnerships amongst public, private and development partners.

On 20 August 2025, President Ramaphosa participated in the 9th Tokyo International Conference on African Development (TICAD) Summit.²⁶³⁹ The summit focuses on three areas of cooperation between Japan and the African Union including realizing a sustainable future, promoting trade and investment and ensuring dignity and human security. As a member of the African Union, South Africa will engage with and work with Japan notably in the areas of infrastructure development to advance Agenda 2063 into its second decade of implementation.

On 25 September 2025, representatives from South Africa participated in the 2025 Korea-South Africa Future Dialogue featuring government leaders, as well as representatives from academia and industry.²⁶⁴⁰ Both countries aligned in priority goals, developed cooperation networks and reaffirmed their commitment to advancing action in education, technology, health and women's empowerment across the continent.

On 7 October 2025, Deputy Minister for Electricity and Energy Samantha Graham-Maré announced the launch of the Africa Energy Efficiency Facility (AfEEEF).²⁶⁴¹ AfEEEF is an initiative as part of the South Africa G20 presidency which dedicates US\$3 billion to address infrastructural energy inefficiencies across Africa. The partnership that spans across the continent and engages the African Energy Commission and the United Nations Environment Programme aims to improve energy efficiency, create green jobs, conserve energy and reduce emissions.

On 14 October 2025, South Africa participated in the African Circular Economy Alliance (ACEA) 2025 Annual Meeting on “Continental Alignment for Circular Economy Transformation in Africa.”²⁶⁴² ACEA aims to engage governments, regional bodies and stakeholders to harmonize frameworks, align on policies, coordinate action and foster investment into “Africa’s industrial and economic transformation.”²⁶⁴³ Representatives from South Africa participated in a panel discussion on best practices and renewed commitments towards inclusive

Türkiye: 0

Türkiye has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 15 February 2025, the Ministry of Foreign Affairs congratulated the newly elected members of the African Union Commission, particularly the new Chairperson, the Minister of Foreign Affairs and International Cooperation of Djibouti Mahamoud Ali Youssouf.²⁶⁴⁴ The Ministry also reiterated Türkiye's ongoing commitment to cooperation with the African Union, especially in support of the realization of Agenda 2063.

On 28 February 2025, Türkiye accredited an ambassador as a representative to the Common Market for Eastern and Southern Africa (COMESA), a regional economic community in Africa.²⁶⁴⁵ This enables greater economic cooperation and dialogue with COMESA. The newly appointed Ambassador Hüseyin Barbaros Dicle highlighted Türkiye's commitment to supporting capacity building in the region, advancing regional integration. Türkiye plays the key role of a strategic partner to COMESA in sectors such as agriculture, health and tourism.

On 13 April 2025, Türkiye reaffirmed its commitment to deepening partnership with Africa and supporting initiatives that align with Agenda 2063.²⁶⁴⁶ The Foreign Ministry issued a statement emphasizing the upcoming fourth Türkiye-Africa Partnership Summit in 2026 as an opportunity to strengthen cooperation in key areas such as trade and infrastructure.

On 25 May 2025, Türkiye issued an Africa Day statement reaffirming its commitment to furthering cooperation with Africa.²⁶⁴⁷

Türkiye has partially complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Türkiye took moderate actions to support an integrative infrastructure that criss-crosses the African continent, such as strengthening infrastructure cooperation with Africa and building relationships with regional economic communities. However, it has not taken strong actions to help Africa become a continent of seamless borders and manage cross-border resources through dialogue, aside from issuing verbal affirmations.

Thus, Türkiye receives a score of 0.

United Kingdom: +1

The United Kingdom has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 27 January 2025, British International Investment, a government development finance agency, announced a GBP5.3 million deal with UK energy firm MOPO.²⁶⁴⁸ This investment allows MOPO to expand its battery rental operations in the Democratic Republic of Congo, helping to bridge infrastructure gaps and provide vital access to electricity.

On 27 January 2025, Minister for Africa Ray Collins announced GBP8 million in contribution to the African Development Bank's Sustainable Energy Fund for Africa.²⁶⁴⁹ This helps support African partners in ongoing efforts to expand electricity access across the continent.

On 5 March 2025, British International Investment (BII) in conjunction with the Ghana International Bank in a USD50 million trade finance deal to support businesses across seven African countries.²⁶⁵⁰ This initiative aims to provide necessary capital and equipment for small and medium-sized enterprises across Sierra Leone, Liberia, Gambia, Benin, the Democratic Republic of Congo, Rwanda and Tanzania. This deal helps progress the economic aspirations of the African Union on the path to financial independence and self-funding.

On 24 March 2025, UK Export Finance (UKEF) facilitated a GBP12.5 million deal between British firm Dints and the MCA Group's infrastructure and renewable energy operations in Angola.²⁶⁵¹ The deal secures a substantial export opportunity for British suppliers and helps to transform lives in Angola through improving access to critical infrastructure and renewable electricity. The deal helps progress Agenda 2063's vision 72: achieving reliable cost-effective renewable and environmentally friendly energy to African households' business industries and institutions.

On 9 April 2025, Foreign Secretary David Lammy co-hosted the Clean Power for Growth Roundtable in Rome alongside Italian Deputy Prime Minister Antonio Tajani.²⁶⁵² The event aimed to promote international cooperation and supply chains to support clean energy transition, with key focus on the theme of promoting ‘growth and jobs particularly for young people in Africa’. This theme aligns with Agenda 2063 and aims to develop world-class, integrative African infrastructure.

On 15 April 2025, the UK co-hosted a conference alongside the African Union in London to facilitate efforts to end the two-year conflict in Sudan.²⁶⁵³ As well as supporting the African Union in its role as arbiter and its ability to resolve disputes on the continent, the UK pledged to an additional GBP120 million of aid to people impacted by the conflict. Through its collaboration with the African Union in this event, the UK has helped promote the African Union on the global stage.

On 21 May 2025, the UK announced a total of GBP105 million in investments across two projects at the first-ever East Africa Trade and Investment Forum, featuring representatives from Tanzania, Uganda, and Kenya. BII and Standard Chartered Bank pledged GBP100 million in support of a cross-border facility to lower the risks of trade and cross-border business between Tanzania and Kenya. Moreover, BII announced a GBP5 million investment in rolling out electric bicycles and battery infrastructure across Kenya.

On 2 June 2025, the UK published a policy paper outlining a new approach to Africa.²⁶⁵⁴ Developed in consultation with numerous African partners, the report aims to strengthen the UK's relationships with countries across the continent and to improve coordinated efforts toward shared priorities, such as Agenda 2063.

On 2 June 2025, the UK and Morocco announced a series of new trade agreements.²⁶⁵⁵ This expanded cooperation entails a GBP200 million project on maritime infrastructure as well as a GBP150 million project to build a new hospital in Casablanca.

On 1 July 2025, the UK and Kenya signed several new trade and development agreements.²⁶⁵⁶ These measures include support for an urban redevelopment project in Nairobi, enhanced security cooperation to combat human smuggling and strengthen border security and a deeper partnership between UK financial institutions and Nairobi's financial sector.

On 8 September 2025, BII announced USD7.5 million to support mini-grid developers and Nigeria's Distributed Access through Renewable Energy Scale-up (DARES) project. The DARE project aims to improve infrastructure and energy access for 17.5 million Nigerians.²⁶⁵⁷

On 25 September 2025 the United Kingdom and Ghana announced a USD256 million debt relief deal set to unlock major infrastructure projects in Ghana.²⁶⁵⁸ The agreement aims to facilitate greater infrastructure projects within the country, alongside promoting debt sustainability and developing economic growth.

On 7 October 2025, Ambassador to the UN General Assembly Archie Young issued a statement at the UNSC meeting on Cooperation between the UN and the AU in promoting multilateralism, prosperity and good governance across the continent.²⁶⁵⁹

The United Kingdom has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. The UK has taken strong action toward promoting a continent of seamless borders through border focused projects in Tanzania and Kenya. Moreover, it has demonstrated strong support for Africa's world-class integrative infrastructure by investing in key projects across the continent

Thus, the United Kingdom receives a score of +1.

Analyst: Bryn Walton Williams

United States: –1

The United States has not complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 3 December 2024, the US and Angola co-hosted a Partnership for Global Infrastructure and Investment Lobito Trans-Africa Corridor Summit where they affirmed commitments to continue developing the Corridor and invest in infrastructure to connect the Atlantic and Indian Oceans and pledged to accelerate the new Zambia-Lobito rail project.²⁶⁶⁰ The successful development of the corridor aims to boost trade and support economic diversification and development on the African continent.

On 5 December 2024, Secretary of Commerce Gina Raimondo and Angola Minister of Commerce and Industry Rui Miguens de Oliveira signed the Memorandum of Understanding, launching the US-Angola Commercial and Investment Partnership (CIP).²⁶⁶¹ The CIP promotes private-sector-led economic development, specifically in priority sectors, such as agricultural technology and infrastructure.

On 20 January 2025, after being inaugurated President Donald Trump ordered a freeze on all US foreign aid and the effective closure of the United States Agency for International Development.²⁶⁶² This suspension represents a disruption to US programs and development initiatives across Africa.

²⁶⁶² Implementing the President's Executive Order on Reevaluating and Realigning United States Foreign Aid, United States Department of State (Washington D.C.) 26 January 2025. Access Date: 11 April 2025. <https://www.state.gov/implementing-the-presidents-executive-order-on-reevaluating-and-realigning-united-states-foreign-aid/>

On 7 February 2025, President Trump signed an executive order suspending US aid and assistance to South Africa.²⁶⁶³ This includes the halting of aid and assistance programs supporting development, trade and infrastructural improvement in South Africa.

On 19 February 2025, President Trump signed an executive order for the elimination of the United States African Development Foundation.²⁶⁶⁴ The African Development Foundation's mandate involved investing in initiatives to promote development, trade and infrastructural improvement on the continent.

On 5 April 2025, President Donald Trump placed a 10 per cent tariff on all countries.²⁶⁶⁵ This tariff applies to the countries of Africa.

On 25 April 2025, Secretary of State Marco Rubio hosted the Signing of a Declaration of Principles between the Government of the Democratic Republic of the Congo (DRC) and the Government of the Republic of Rwanda to facilitate a pathway to an “integrated economic development in the eastern DRC region.”²⁶⁶⁶ The regional economic integration framework outlines expanded foreign trade and investment from the U.S. government and private sector.²⁶⁶⁷ This initiative does not “support” or facilitate the provision of aid and assistance to the African Union's Agenda 2063 and its trade and economic integration aspirations as the framework prioritizes U.S. commercial interests.

On 14 May 2025, Senior Bureau Official Bureau of African Affairs Troy Fitrell shared remarks on the launch of the Bureau of African Affairs' Commercial Diplomacy Strategy.²⁶⁶⁸ Ambassador Fitrell stated the shift in US engagement with Africa from development assistance to “commercial engagement” done through “expanded trade and private investment, because it is the private sector.” This shift to the private sector undermines longstanding public sector institutions and policies supporting the creation of infrastructure and the management of cross-border resources.

On 29 May 2025, Ambassador Fitrell participated in the Carnegie Africa Program – Fireside Chat on Commercial Diplomacy.²⁶⁶⁹ Ambassador Fitrell shared a shift in the U.S. Department of State's economic engagement with African countries from a development assistance based approach to basing the focus of their diplomatic engagement in “commercial diplomacy.” This shift in policy approach is antithetical to the commitment as it targets institutions and development programmes directly supporting the creation of infrastructure and the management of cross-border resources, ultimately hindering efforts to reach Agenda 2063.

²⁶⁶⁸ Remarks for Launch of Bureau of African Affairs Commercial Diplomacy Strategy, United States Department of State (Washington D.C.) 14 May 2025. Access Date: 20 June 2025. <https://www.state.gov/remarks-for-launch-of-bureau-of-african-affairs-commercial-diplomacy-strategy/>

²⁶⁶⁹ Remarks by for the Carnegie Africa Program – Fireside Chat on Commercial Diplomacy, United Nations Department of State (Washington D.C.) 29 May 2025. Access Date: 20 June 2025. <https://www.state.gov/remarks-by-for-the-carnegie-africa-program-fireside-chat-on-commercial-diplomacy/>

On 22 June 2025, Ambassador Fitrell led a delegation to the 17th US-Africa Business Summit.²⁶⁷⁰ The State Department highlighted the United State's prioritization of "trade over aid" with the delegation aiming to advance commercial diplomacy and secure trade commitments in exchange for investment in Africa. During the conference, USD2.5 billion in deals were announced between the US private sector and African governments. This further underscores the policy shift toward a transactional, private sector-led approach, moving away from one centered on aid and broader development."

On 30 June 2025, Senior Bureau Official for African Affairs Troy Fitrell led the American delegation to 17th U.S.-Africa Business Summit in Angola.²⁶⁷¹ At the summit, American and Africa public and private sector leaders reached a total of USD2.5 billion in trade and business deals across the African continent.

On 9 July 2025, President Donald Trump welcomed the leaders of Gabon, Guinea-Bissau, Liberia, Mauritania and Senegal to the White House.²⁶⁷² During the meeting, he emphasized the US's focus on commercial diplomacy and negotiating deals with African countries to expand access to critical minerals. This further reinforces the shift toward a model of development driven by transactional commercial diplomacy, in contrast to previous approaches centered on equitable aid and development.

The United States has not complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Recent actions stand in direct contradiction to the commitment, such as the closure of development agencies, the effective suspension of aid to Africa and the shift to transactional commercial diplomacy. The US has removed funding to South Africa and imposed a 10% tariff across all African countries, harming development and trade. These reflect actions directly and explicitly antithetical to the goal of having a world-class, integrative infrastructure that criss-crosses the African continent and be a continent of seamless borders and the management of cross-border resources through dialogue.

Thus, the United States receives a score of -1.²⁶⁷³

On 21 November 2024, the African Union alongside Brazil, South Africa and China jointly launched the Initiative on International Cooperation in Open Science.²⁶⁷⁴ The initiative aims to promote the free flow of science and technology resources among the Global South. With explicit calls to support joint scientific infrastructure and open-access research, it advances Agenda 2063 and the goal of establishing seamless cross-border cooperation and integrative infrastructure across Africa.

On 11 December 2024, the Economic, Social and Cultural Council (ECOSOCC) held its 2nd Ordinary Session of the 4th Permanent General Assembly in Nairobi, Kenya.²⁶⁷⁵ The session was attended by senior government officials from the Republic of Kenya, high-level AU officials and ECOSOCC representatives, leaders of civil society organizations, regional and international development partners and members of media and stakeholders invested in African development. The session featured elections for the ECOSOCC Standing Committee, discussions on the progress and challenges of civil society engagement and the launch of the Call for Applications for National ECOSOCC Chapters.

On 20 January 2025, AU Commissioner Amani Abou-Zeid participated in the World Economic Forum at Davos, Switzerland.²⁶⁷⁶ Commissioner Abou-Zeid emphasized Africa's role in the global energy transition, clean tech and industrialization, demonstrating Africa's emerging participation in global governance. Key initiatives discussed included the African Continental Free Trade Area (AfCFTA), Program Infrastructure Development for Africa, the African Single Electricity Market and strategies for green hydrogen, clean cooking and sustainable aviation fuels.

On 15 February 2025, the AU hosted the 38th AU Summit in Addis Ababa, Ethiopia, bringing together heads of state, policymakers and key stakeholders of the AU to address pressing challenges and opportunities for the continent.²⁶⁷⁷ The summit launched the African Union's Theme of the Year 2025: "Justice for Africans and People of African Descent Through Reparations." Discussion areas at the summit included accelerating the implementation of Agenda 2063, prioritizing health and well-being, harnessing Africa's youth, fostering innovation, promoting peace and security and enhancing climate resilience.²⁶⁷⁸

On 25 February 2025, the Pan-African Parliament held a joint session with the Committee on Rural Economy, Agriculture, Environment and Natural Resources; the Committee on Gender, Family, Youth and People with Disabilities; and the Committee on Justice and Human Rights.²⁶⁷⁹ The session featured updates on the proposed Pan-African Parliament Model Law on Climate Change and a presentation on the CAADP Strategy and Action Plan (2025-2035). This session strengthened African Union cooperation on climate action, advancing Agenda 2063.

On 4 March 2025, the African Union Institute of Statistics attended the 56th Session of the United Nations Statistics Commission in New York.²⁶⁸⁰ The agenda covered critical topics including national accounts,

population and housing censuses, environmental-economic accounting and climate change statistics. The representatives demonstrated a continent-wide commitment to proactive statistical development by collaborating with key organizations such as the United Nations Economic Commission for Africa and the African Development Bank.

On 19 March 2025, the African Minerals Development Centre, an organ of the African Union, hosted the 3rd African Forum on Mining in Addis Ababa, Ethiopia.²⁶⁸¹ The forum reaffirmed the Africa Mining Vision as the continent's framework for mineral resource governance and launched the African Green Mineral Strategy promoting continent-wide green industrialization. Key outcomes included calls for a unified digital geological data platform and the establishment of a High-Level African Critical Minerals Diplomacy. These efforts directly advance Agenda 2063's goals for inclusive economic transformation and regional integration.

On 15 April 2025, the AU convened its 24th Extraordinary Session of the Executive Council in Addis Ababa, Ethiopia.²⁶⁸² The session underscored the urgency of African-led solutions in trade, health and peacebuilding, emphasizing the reduction of external dependence by strengthening AfCFTA, promoting intra-African trade and financing Peace Support Operations through domestic resources.

On 21 April 2025, the African Union attended the 2025 Spring Meetings of the World Bank Group and International Monetary Fund in Washington D.C.²⁶⁸³ The AU convened a series of strategic side events, focused on reforming global financial frameworks, mobilizing investments for job creation and sustainable growth, advancing climate finance and debt relief to enhance resilience and strengthening Africa's role in global governance.

On 5 May 2025, the African Union launched the Kampala Comprehensive African Agricultural Development Programme Strategy and Action Plan (2026-2035).²⁶⁸⁴ As part of Agenda 2063, the initiative aims to eliminate hunger and reduce poverty by mobilizing USD100 billion to increase agri-food output by 45 per cent, triple intra-African agricultural trade and cut post-harvest losses by half. The Kampala Declaration envisions integrated, climate-resilient food systems across Africa, emphasizing regional cooperation, private sector engagement and the engagement of youth and women in agricultural transformation.

On 8 May 2025, ECOSOCC, in partnership with the Chinese NGO Network for International Exchange, hosted the inaugural Africa-China People-to-People Dialogue in Lusaka, Zambia.²⁶⁸⁵ The forum brought together civil society organizations, entrepreneurs, and policymakers to advance citizen-led collaboration between the two countries. The Dialogue reaffirmed ECOSOCC's goal of bridging African and Chinese civil societies, building trust, inclusion, and shared solutions in areas like trade, education and policy implementation.

On 21 May 2025, [Minister of External Relations of Angola and Chair of the AU Executive Council Tete António and High Representative of the European Union for Foreign Affairs and Security Policy Kaja Kallas participated in the 3rd EU-AU Ministerial Meeting to strengthen partnerships in the areas of peace, security

from numerous other parties across the world to promote development in Africa. At this conference, over 300 cooperation documents were signed.²⁶⁹⁵

On 3 September 2025, representatives from Australia and the African Union (AU) participated in the 23rd Africa Down Under (ADU) conference in Perth to engage in discussions on African mining and energy opportunities.²⁶⁹⁶ The ADU serves as a forum for Africa-Australia business relations.

On 8 September 2025, government representatives from across the AU participated at the Accelerating 2025 hosted by the Canada-Africa Chamber of Business the Africa in Toronto and Hamilton, Canada.²⁶⁹⁷ Participants included CEOs, ministers, academics and other key stakeholders advancing trade and investment between Canadian and African markets.

On 11 September 2025, the AU participated in the India-Africa Seed Summit 2025 featuring government representatives from India and AU countries, academics and business leaders.²⁶⁹⁸ Discussions include opportunities for collaboration on seed sector growth, leveraging AI and digital technologies in seed innovation and plant breeding, public-private partnerships in seed research and innovation, South-South cooperation on food security and fostering India-Africa collaboration on policy and regulation in seed trade.²⁶⁹⁹

On 21 September 2025, President Ursula von der Leyen, Chairperson of the AU Mahmoud Ali Youssouf, President of the EU António Costa and the Secretary-General of the UN António Guterres participated in the 6th trilateral meeting of the AU, EU and UN at the sidelines of the 80th Session of the UNGA.²⁷⁰⁰ Representatives reiterated their support for multilateralism, sustainable development in Africa and the implementation of the Sevilla Commitment to streamline development financing, investments and address debt challenges affecting developing nations.

On 3 October 2025, the AU launched the 2025 Africa Integration Report on the margins of the 8th Session of the Specialized Technical Committee on Finance, Monetary Affairs, Economic Planning and Integration to accelerate the implementation of Agenda 2063.²⁷⁰¹ The report highlights Africa's progress through initiatives such as the African Continental Free Trade Area (AfCFTA) and underscores the need to strengthen governance as the foundation of AfCFTA implementation. The report reaffirms the AU's vision for "building an integrated, prosperous, and peaceful continent, and provides actionable recommendations."

On 14 October 2025, the AU participated in the African Circular Economy Alliance (ACEA) 2025 Annual Meeting on “Continental Alignment for Circular Economy Transformation in Africa.”²⁷⁰² ACEA aims to engage governments, regional bodies and stakeholders to harmonize frameworks, align on policies, coordinate action and foster investment into “Africa’s industrial and economic transformation.”²⁷⁰³

On 22 October 2025, the AU participated in the AU-EU Dialogue on Science Diplomacy to underscore a shared commitment to facilitating dialogue and collaborating on science diplomacy initiatives between the two continents.²⁷⁰⁴

On 28 October 2025, Chairperson of the African Union Commission, Mahmoud Ali Youssouf reaffirmed the African Unions commitment to infrastructure development at the he 3rd Summit on Financing for Infrastructure Development in Africa.²⁷⁰⁵

The African Union has fully complied its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. It has taken strong actions, including holding meetings and summits, to facilitate greater regional integration and development. Overall, the African Union has taken strong action to advance a world-class, integrative infrastructure that spans the African continent and is a continent of seamless borders and the management of cross-border resources through dialogue.

Thus, the African Union receives a score of +1.

Analyst: Rie Aiyama

European Union: +1

The European Union has fully complied with its commitment to support the African Union to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation.

On 5 December 2024, the European Investment Bank (EIB) committed USD80 million of equity investment into the Pembani Remgro Infrastructure Fund II.²⁷⁰⁶ This fund is African-led and supports renewable energy, digital infrastructure and transportation projects across sub-Saharan Africa. By working towards bridging Africa’s infrastructure financing gap, this investment supports Agenda 2063’s goals of continent-wide infrastructure and connectivity, promoting sustainable development and economic integration.

On 16 December 2024, the Council of the EU reaffirmed support for the roll out of the African Continental Free Trade Area, highlighting the strategic importance of transport corridors for its success.²⁷⁰⁷ The Council also adopted conclusions to enhance Team Europe’s support for global food security and nutrition, explicitly

On 20 June 2025, President Ursula von der Leyen attended the Mattei Plan Summit in Rome.²⁷¹⁴ Discussions centered around coordinating investment and development in the Lobito Corridor. The summit resulted in EUR1.2 billion of new strategic investments jointly led by the EU and Italy.

On 17 July 2025, AU Commissioner Moses Vilakati and EU Commissioner Jessika Roswall introduced the Continental Circular Economy Action Plan for Africa (2024–2034) to promote circularity, resource efficiency and green economic growth across the African continent.²⁷¹⁵ The initiative, developed with EU co-financing and technical support, aims to reduce waste, create green jobs and promote regional collaboration towards sustainable development.

On 21 September 2025, President Ursula von der Leyen, Chairperson of the AU Mahmoud Ali Youssouf, President of the EU António Costa and the Secretary-General of the UN António Guterres participated in the 6th trilateral meeting of the AU, EU and UN at the sidelines of the 80th Session of the UNGA.²⁷¹⁶ Representatives reiterated their support for multilateralism, sustainable development in Africa and the implementation of the Sevilla Commitment to streamline development financing, investments and address debt challenges affecting developing nations.

On 30 September 2025, EU leaders confirmed an additional EUR545 million in new clean-energy funding for Africa.²⁷¹⁷ This package includes funding to several projects aiming to accelerate cross-border electrification and transmission as well as regional energy trade.

On 22 October 2025, the EU participated in the AU-EU Dialogue on Science Diplomacy to underscore a shared commitment to facilitating dialogue and collaborating on science diplomacy initiatives between the two continents.²⁷¹⁸

The EU has fully complied with its commitment to support the AU to realize the trade and economic integration and aspirations under its Agenda 2063 as it enters its second decade of implementation. Through its initiatives, the EU addressed multiple dimensions of development, including having a world-class, integrative infrastructure that criss-crosses the African continent and be a continent of seamless borders and the management of cross-border resources through dialogue. These measures illustrate the EU's commitment to facilitating Africa's integration and sustainable development goals, as articulated at the G20 Rio de Janeiro Summit.

Thus, the European Union receives a score of +1.

Background

The G20's commitment to institutional reform has evolved significantly since the leaders' first summit in 2008, which began with a focus on international financial institutions in response to the 2008 global financial crisis, after it caused massive and worldwide financial and economic collapse.²⁷¹⁹ At the 2008 Washington Summit, the G20 prioritized the International Monetary Fund (IMF) and the World Bank, expanding financial oversight bodies improving regulatory frameworks to prevent future crises. Over subsequent summits, the G20 broadened the agenda of institutional reform, pushing for greater inclusivity, representation, and accountability in global financial governance. Reforms gradually expanded beyond financial institutions to include multilateral development banks (MDBs), debt transparency and broader governance structures. At New Delhi in 2023 and Rio de Janeiro in 2024, G20 leaders emphasized making international institutions better, bigger, and more effective, advocating for a more representative global order that aligns with 21st century challenges.

²⁷¹⁹ The Great Recession and Its Aftermath, Federal Reserve History (Missouri) 22 November 2013. Access Date: 5 March 2025. <https://www.federalreservehistory.org/essays/great-recession-and-its-aftermath>

At the 2008 Washington Summit, G20 leaders acknowledged and listed “Reforming International Financial Institutions.”²⁷²⁰ The members outlined immediate actions such as expanding the Financial Stability Forum (FSF) to include emerging economies and reforming the IMF and World Bank Group, as well as medium-term actions such as underscoring the necessity of reforming the Bretton Woods institutions and conducting surveillance reviews.

At the 2009 London Summit, G20 leaders pledged to fund and reform international financial institutions to overcome financial crises and prevent future ones.²⁷²¹ G20 members also published a progress report about the 47 actions set out previously in the Washington Action Plan and agreed on major reforms such as expanding the FSF, strengthening international cooperation, implementing prudential regulation, ensuring compensation, protecting public finances and international standards from non-cooperative jurisdictions, improving accounting standards and increasing oversight of the Credit Rating Agencies’ activities.²⁷²²

At the 2009 Pittsburgh Summit, G20 leaders expressed the need to reform the “global architecture” to align with the needs of the 21st century.²⁷²³ The G20 members acknowledged their implementation of reforms to tackle the causes of the financial crisis and make the existing system suited for global financial regulation.

At the 2010 Toronto Summit, G20 leaders expressed their ongoing efforts to ensure effectiveness, efficiency and accountability for MBDs such as committing financial support to the poorest countries, increasing transparency and accountability for improved institutional governance as well as recommitting these institutions to lead in the provision of global solutions to global problems such as climate change and food security.²⁷²⁴ The G20 members also welcomed the World Bank’s voice reform to increase voting power for developing and transitioning countries by 3.13 per cent, as mentioned at Pittsburgh.

At the 2010 Seoul Summit, G20 leaders addressed the need to reform and modernize the IMF with more representation from developing countries and newly emerging markets, to better reflect the current situation of the global economy.²⁷²⁵

At the 2011 Cannes Summit, G20 leaders reaffirmed the importance of bringing countries together on equal footing to catalyze action and agreed to put their collective political will towards reforming international institutions.²⁷²⁶ For the first time, G20 leaders addressed reforms to the G20, announcing that after 2015, the annual presidencies of the G20 would be chosen from rotating regional groups, starting with the Asian grouping.

At the 2012 Los Cabos Summit, G20 leaders reaffirmed their commitment to implementing the 2010 Quota and Governance Reform by the date agreed upon by the 2012 IMF/World Bank Annual Meetings.²⁷²⁷

At the 2013 St. Petersburg Summit, G20 leaders reiterated the importance of completing the ongoing IMF governance reforms to strengthen the IMF's "credibility, legitimacy and effectiveness."²⁷²⁸ Additionally, G20 members called for the urgent ratification of the 2010 IMF Quota and Governance Reform. G20 leaders also stressed that quota distribution should reflect shifts in the global economy while ensuring representation for developing nations and emerging economies.

At the 2014 Brisbane Summit, G20 leaders stressed their role in ensuring effectiveness and better reflection of the changing world economy within global economic institutions.²⁷²⁹ The G20 members also reaffirmed their commitment to maintaining a strong and quota-based IMF and spoke about their disappointment towards the delay in the progress for governance reforms as agreed in 2010 and the 15th General Review of Quotas.

At the 2015 Antalya Summit, G20 leaders announced their completion of core pillars in the financial reform agenda intended to enhance the resilience of the global financial system.²⁷³⁰ G20 leaders also reaffirmed the high priority of the 2010 reforms and urged the US again to ratify them to further strengthen the IMF as an international institution.

At the 2016 Hangzhou Summit, G20 leaders stressed the need for an efficient international financial governance system and supported the Global Financial Safety Net centered on a well-equipped IMF.²⁷³¹ G20 members backed stronger cooperation between the IMF and regional financing arrangements. The G20 reaffirmed its support for the World Bank Group's efforts to achieve equitable voting power over time so that the voices of the poorest members are represented. Additionally, G20 members committed to supporting the Paris Club's efforts to include emerging creditors in bilateral debt restructuring forums.

At the 2017 Hamburg Summit, G20 leaders reaffirmed their commitment from the 2016 Hangzhou Summit to maintain a Global Financial Safety Net that is centered around a strong, well-equipped IMF.²⁷³² On strengthening health governance, G20 members called for increased funding for the World Health Organization's Health Emergencies Programme.

At the 2018 Buenos Aires Summit, G20 leaders reaffirmed their commitment to maintain a Global Financial Safety Net, as well as its commitment from Hangzhou to support the Paris Club in its efforts to include emerging creditors into bilateral debt restructure forums.²⁷³³ G20 leaders also called on the IMF and World Bank to cooperate with borrowers and creditors to improve transparency and sustainability in their reporting of public and private debt obligations. Additionally, G20 members expressed support for efforts by the IMF, World Bank Group and Paris Club on Low-Income Country debt and welcomed the G20 Eminent Persons Group's final report on Global Financial Governance, remaining committed to maintaining a resilient global financial system.

At the 2019 Osaka Summit, G20 leaders reaffirmed their commitment to maintain a Global Financial Safety Net that is centered on a strong, well-equipped IMF, as well as its commitment to support the Paris Club in its

²⁷³³ G20 Leaders' Declaration: Building Consensus for Fair and Sustainable Development, G20 Information Centre (Toronto) 1 December 2018. Access Date: 3 March 2025. <https://www.g20.utoronto.ca/2018/2018-leaders-declaration.html>

efforts to include emerging creditors into bilateral debt restructure forums.²⁷³⁴ The G20 called on the IMF and World Bank Group to continue their efforts in strengthening borrowers' capacity.

At the 2020 Riyadh Summit, G20 leaders acknowledged the need for a resilient “international financial architecture.”²⁷³⁵ In light of the Covid-19 crisis, G20 members called on the IMF to continue exploring tools that cater to members' needs and affirmed its support for the IMF's assistance efforts towards developing states that face significant challenges. Beyond pandemic response, G20 members pledged to continue their support of the IMF in its governance reform and called on the World Bank Group to expand its efforts in mobilizing private financing for developing countries.

At the 2021 Rome Summit, the G20 reacknowledged its commitment in maintaining a resilient “international financial architecture.”²⁷³⁶ The G20 reaffirmed its commitment from the previous summits to maintain a Global Financial Safety Net that is centered on a strong, well-equipped IMF. G20 members re-committed to supporting the IMF's governance reform.

At the 2022 Bali Summit, the G20 continued its pledge to strengthen “the long-term financial resilience of the international financial architecture.”²⁷³⁷ Additionally, G20 members anticipated further dialogue with international organizations to ensure consistent application of international frameworks for capital flow management measures.

At the 2023 New Delhi Summit, the G20 stressed “reforming international financial institutions” to make them “better, bigger and more effective,” thereby marking a stride in commitments from previous summits.²⁷³⁸ This was in light of its recognition of the “need” for “revitalized multilateralism” in solving 21st-century global challenges and making global governance “more representative, effective, transparent and accountable.” G20 members recalled the Declaration on the Commemoration of the 75th anniversary of the United Nations. G20 members also recognized the need to “evolve” the MDB ecosystem, particularly stressing it must cater to the poorest countries.

At the 2024 Rio de Janeiro Summit, the G20 reiterated the need to “reform global governance” anchored in the UN Charter principles and international law, to sustain a multilateral system that is “more representative, effective, transparent and accountable” as stated at the 2023 New Delhi Summit.²⁷³⁹ The G20 also pledged to strengthen the role of the General Assembly and the Economic and Social Council. Notably at Rio, the G20 welcomed the creation of a 25th chair at the IMF Executive Board for Sub-Saharan Africa, celebrating increased representation of developing countries in MDB decision-making.

Commitment Features

The overarching welfare target of this commitment is to effectively govern social, economic and political global realities by reforming both UN bodies and other relevant international organizations to be 1) more representative, 2) more effective and 3) more transparent and accountable. Therefore, each G20 member must take strong action to meet all three key criteria for reforming both the UN bodies and other relevant international organizations to advance the welfare target. UN bodies include the UN General Assembly (UNGA), the UN Security Council (UNSC), the UN Economic and Social Council, the UN Human Rights

Council, and the Food and Agriculture Organization. Other relevant international organizations include the IMF, the World Trade Organization (WTO), and the Organisation for Economic Co-operation and Development (OECD). Overall, the focus of this commitment is on reforming international institutions.

Definitions and Concepts

“Deliver” refers to “achieve or produce something that has been promised.”²⁷⁴⁰

“Institution” refers to an organization or body “established by a treaty or other instrument governed by international law and possessing its own international legal personality.”²⁷⁴¹ Its members, typically states, public entities and private entities, are themselves “subjects of international law with the capacity of concluding international treaties.” Institutions serve as mechanisms for “organizing the international political order.”

“Promise” refers to the act of making an assurance or a statement committing to doing something.²⁷⁴²

“Pledge” refers “to make a serious or formal promise to give or to do something.”²⁷⁴³

“Reinvigorated” is understood to mean “to make something stronger, ... or successful again.”²⁷⁴⁴

“Strengthened” is understood to mean to make or become stronger.²⁷⁴⁵ A reinvigorated and strengthened multilateral system is better able to sustain the purposes and principles set out in international law.

“Renewed” is understood to mean “happening again after having stopped for a period of time.”²⁷⁴⁶

“Purpose” is defined as “an intention or aim; a reason for doing something or for allowing something to happen.”²⁷⁴⁷

“Principle” is defined as “a basic idea or rule that explains or controls how something happens or works.”²⁷⁴⁸

The “UN Charter” is “the founding document of the United Nations” and “an instrument of international law” by which “UN Member States are bound by.”²⁷⁴⁹ The UN Charter also codifies major principles underlying international relations.

“International law” defines “the legal responsibilities of States in their conduct with each other, and their treatment of individuals within State boundaries.”²⁷⁵⁰

“Reformed” is understood to mean “changed and improved because of no longer doing something harmful.”²⁷⁵¹ For this assessment, renewed and reformed refers to directing institutions towards more effectively achieving their main aims.

General Interpretive Guidelines

This commitment requires strong actions in the renewal of institutions through reforming UN bodies and other relevant international organizations and emphasizing the key criteria of a) institutional representation, b) institutional effectiveness and c) institutional transparency and accountability. In the context of this commitment, “institutional representation” refers to inclusive and meaningful participation of different G20 members in the decision-making process representing diverse social, economic and political interests.²⁷⁵² “Institutional effectiveness” refers to the extent to which an organization’s goals are met.²⁷⁵³ “Institutional transparency and accountability” refers to an organization’s ability to provide accessible, reliable and timely information regarding their actions, conditions and decisions.²⁷⁵⁴

Full compliance, or a score of +1, will be given to a G20 member that takes strong actions to reform at least one UN body or at least one other international organization and meets all of the key criteria: a) institutional representation, b) institutional effectiveness and c) institutional transparency and accountability.

Strong actions reforming the “institutional representation” of a UN body includes evidence of individual member contribution at meetings to reform regional imbalances in the UNSC. Strong actions reforming the “institutional effectiveness” of a UN body includes ratifying enforcement measures in the UNGA. Strong actions reforming the “institutional transparency and accountability” of a UN body includes establishing a framework for disclosing UNSC negotiations. Strong actions reforming the “institutional representativeness” of other relevant international organizations include expanding OECD membership to economies in the Global South for broader regional representation. Strong actions reforming the “institutional effectiveness” of other relevant international organizations include implementing a dispute resolution system at the WTO or altering the quota system at the IMF. Strong actions reforming the “institutional transparency and accountability” of other relevant international organizations include amending the dispute settlement process when appealing to the WTO Appellate Body.

Partial compliance, or a score of 0, will be assigned to a G20 member that has taken moderate action to reform one UN body or one other international organization and meets two of the key criteria: a) institutional representation, b) institutional effectiveness and c) institutional transparency and accountability. Moderate actions include verbal affirmations to reform the role of the WTO Secretariat or participating in meetings to reform the UNSC veto power representation.

Non-compliance, or a score of –1, will be assigned to a G20 member that has taken no steps to reform the UN nor other relevant international organizations and failed to meet any of the key criteria: a) institutional representation, b) institutional effectiveness and c) institutional transparency and accountability; or 2) if it has

engaged in actions directly and explicitly antithetical to the commitment. Actions that are antithetical to the commitment include terminating agreements on governance reform, halting funding to international organizations and withdrawing from international institutions. G20 members that take steps to weaken the multilateral system through weakening international law or not abiding by the purposes and principles of the UN Charter will also be scored as non-compliant.

Scoring Guidelines

-1	The G20 member has not taken any steps to reform a UN body or another relevant international organization and has failed to meet the key criteria of being a) representative, b) effective and c) transparent and accountable; or has taken actions directly and explicitly antithetical to the commitment.
0	The G20 member has taken moderate action to reform either one UN body or one other relevant international organizations and has met two of the three key criteria of being a) representative b) effective and c) transparent and accountable.
+1	The G20 member has taken strong action to reform at least one UN body or at least one other relevant international organizations and has met all three key criteria of being a) representative, b) effective and c) transparent and accountable.

Compliance Director: Grace (Yujung) Choi
Lead Analyst: Alisha Aslam

Argentina: -1

Argentina has not complied with its commitment to work for a reinvigorated and strengthened multilateral system, rooted in the purposes and principles of the United Nations Charter and international law, with renewed institutions and a reformed governance that is more representative, effective, transparent and accountable, reflecting the social, economic and political realities of the 21st century.

On 5 February 2025, presidential spokesperson Manuel Adorni announced that President Javier Milei ordered Foreign Minister Gerardo Werthein to withdraw Argentina from the World Health Organization (WHO) because of distinct divergences over the WHO's handling of the Covid-19 pandemic.²⁷⁵⁵

On 27 May 2025, Argentine Minister of Health Mario Lugones and U.S. Health and Human Services Secretary Robert F. Kennedy, Jr. and released a joint statement about their withdrawal from the WHO, citing the lack of reforms, transparency, excessive economic demands and increased politicization of the WHO as reasons for their withdrawal.²⁷⁵⁶

On 8 July 2025, Ambassador Gustavo Nerio Lunazzi, who serves as the Chair of the World Trade Organization's (WTO) Council for Trade in Goods (CTG), led discussions around improving the council's transparency and trade relations.²⁷⁵⁷

On 1 September 2025, President Javier Milei announced that Argentina will be withdrawing from the UN Human Rights Council (UNHRC) and will not present its candidacy for the following term.²⁷⁵⁸ This initiative

²⁷⁵⁸ El Gobierno retira a la Argentina del Consejo de Derechos Humanos de la ONU y no se postulará para el próximo período, Infobae (Buenos Aires) 1 September 2025. Translation provided by Google Translate. Access Date: 28 October 2025. <https://www.infobae.com/politica/2025/09/01/el-gobierno-retira-a-la-argentina-del-consejo-de-derechos-humanos-de-la-onu-y-no-se-postulara-para-el-proximo-periodo/>

is antithetical to the commitment as Argentina has taken steps to weaken multilateral forums for cooperation.²⁷⁵⁹

On 8 September 2025, the Ministry of National Security in collaboration with the Inter-American Development Bank held the Regional Summit on Citizen Security and Justice to address institutional capacity-building and enhance cooperation in the Latin American and Caribbean region.²⁷⁶⁰ The Summit engaged ministers of justice and security from IDB member countries, as well as representatives from non-regional IDB member countries, stakeholders and other stakeholders.

Argentina has not complied with its commitment to work for a reinvigorated and strengthened multilateral system, rooted in the purposes and principles of the UN Charter and international law. Instead, Argentina has taken an action antithetical to the commitment, withdrawing from the WHO and the UNHRC.

Thus, Argentina receives a score of -1 .²⁷⁶¹

Australia's commitment to the full implementation of UNSCRs. Further, the report called on the UNSC to re-establish the Panel of Experts to bolster the institutional effectiveness of the UN.

Australia has partially complied with its commitment to work for a reinvigorated and strengthened multilateral system, rooted in the purposes and principles of the UN Charter and international law. Australia has taken moderate action in endorsing initiatives to enhance the effectiveness and transparency and accountability of a UN body and international organizations such as the International Maritime Organization, IATI, ASEAN and the UN. However, Australia has not taken strong action towards reforming a UN body or another relevant international organization.

Thus, Australia receives a score of 0.

Analyst: Ngila Stone

Brazil: +1

Brazil has fully complied with its commitment to work for a reinvigorated and strengthened multilateral system, rooted in the purposes and principles of the United Nations Charter and international law, with renewed institutions and a reformed governance that is more representative, effective, transparent and accountable, reflecting the social, economic and political realities of the 21st century.

On 6 December 2024, the Southern Common Market (MERCOSUR) and the European Union concluded negotiations for the MERCOSUR-EU Partnership Agreement, where Brazil emphasized its commitment to transparency and inclusivity by allowing local communities, unions and non-governmental organizations to participate in monitoring the Agreement.²⁷⁸⁵ Brazil's participation in the Agreement and the provisions it has placed aims to foster greater investment and ensure that civilians can adequately benefit from it.

On 19 December 2024, Brazil voted in favour of a resolution on the "Request for an advisory opinion of the internal Court of Justice on the obligations of Israel in relation to the presence and activities of the United Nations, other international organizations and third States."²⁷⁸⁶ This demonstrates Brazil's commitment to bolstering the institutional effectiveness of the UN.

On 1 January 2025, Brazil took over the BRICS presidency with aims to create more inclusive global artificial intelligence governance, reform the multilateral peace and security architecture to improve effectiveness, as well as improve the structure of the BRICS, more broadly.²⁷⁸⁷ By leading and overseeing BRICS, Brazil is strengthening its commitment to promoting multilateralism and transparency within international institutions.

On 21 January 2025, Secretary for Economic and Financial Affairs Mauricio Carvalho Lyrio announced Brazil's launch of the Global Alliance against Hunger and Poverty under the G20 Task Force at the ECOSOC Financing for Development Forum.²⁷⁸⁸ The initiative highlights efforts to address climate change internationally and the reform of global governance institutions, including the Bretton Woods system and the World Trade
